

Philipp Hilbert. *Staff Product Manager shaping AI coaching from zero to launch.*

Positioning, 13 years shipping products in regulated industries, now focused on AI-native consumer experiences where behaviour design and clear product definitions decide outcomes.

§ WHY SAMSUNG FOOD

Samsung Food sits at the intersection of daily consumer behaviour and AI-driven personalisation, a space where the product definition work is hard because the interaction model is still being invented. The posting asks someone to define not just what the coach says, but when it stays quiet, which is the more interesting problem. Working across teams in Europe, Asia, and North America on a platform embedded in one of the world's largest consumer hardware ecosystems is a different kind of constraint set than most consumer AI roles offer. *That specificity of scope is where I do my best work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec work and edge-case generation
- **GitHub Copilot**, assisted coding and prototype scaffolding
- **Cursor**, codebase navigation and refactoring
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy interface work
- **Gamma.app**, product one-pagers and stakeholder decks
- **GPT**, research, drafting, and evaluation loops

- **n8n**, agentic workflow design and automation
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, ArgoCD, GitOps rollout and rollback, Docker, Jenkins, CI/CD pipelines, Dagster, dbt, PostgreSQL, MongoDB, REST APIs, Python, Kotlin (Spring Boot), Kafka, OpenShift, Azure DevOps, Figma, Jira, Confluence.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B construction staffing marketplace built and operated solo.

- Matches construction firms with workers using an anonymity-until-payment model that protects both sides until commitment.
 - WhatsApp and Telegram as the product surface; LLM agents run the funnel end-to-end so one person operates the day-to-day.
 - Built zero to one: discovery, spec, build, launch, and funnel analysis in SQL, all without a team.
 - Directly relevant here: proves the ability to define and ship a product alone from an ambiguous starting point.
-

§ HOW I WOULD WORK AT SAMSUNG FOOD

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the engineering, data science, and design teams to understand what the coaching model already knows, what signals it receives, and where the current decision logic breaks down.

WEEK 2

Sketch the behaviour model.

Draft a first version of the coaching logic, what triggers a message, what format it takes, and what conditions keep it silent, and get it in front of the team for challenge.

Write buildable definitions.

Turn the agreed behaviour model into specs with clear interfaces, failure handling, and acceptable first-release scope, so the distributed teams across Europe, Asia, and North America can move without daily synchronisation.

I COVER LETTER

Dear Samsung Food team,

I am applying for the Staff Product Manager role on the AI coaching capability in Samsung Health. The problem you are solving, defining what an AI coach says and when it stays quiet, is one I find worth doing carefully. Getting that silence decision wrong is as harmful as getting the coaching wrong, and I have not seen many teams think about it that way. That framing in the posting is what made me want to apply.

My background is 13 years of product ownership across regulated and technically complex environments: defence AI platforms, national public-sector analytics, insurance SaaS, healthcare mobile apps, and fintech. Each of those required turning ambiguous briefs into buildable definitions for cross-functional teams, often across organisational and geographic boundaries. At Rohde & Schwarz I owned the product definition for an AI and data platform serving multinational engineering teams across the FCAS European programme, writing specs and decision logic that distributed teams in multiple countries could work from without daily hand-holding. At CLINET I cut a roadmap to its top 10% against agreed success criteria and took user acceptance up more than fivefold, that kind of scoping decision, accepting first-release limitations in exchange for a coherent experience, is exactly what the coaching MVP will need.

The AI product context requirements in the posting match where I work today. I design systems around what information reaches a model, when it reaches it, and what constitutes an acceptable answer. I have shipped LLM agent workflows, written evaluation loops for output quality, and prototyped coaching-style interaction models using Claude Code and Lovable. I know the gap between "the model can do this" and "the product should do this," and I work on that gap deliberately.

Working across Samsung's teams in Europe, Asia, and North America is a coordination challenge I have navigated before, and I understand the additional layer that platform constraints, parent-company review processes, and regulatory requirements add to every release decision. I do not treat those as blockers; they are part of the product definition.

I am available as an independent contractor, based in Berlin, and ready to start on short notice.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Staff Product Manager and product owner with 13 years of product ownership in regulated industries, including defence AI, public-sector analytics, insurance, healthcare, and fintech. I define AI-native products from ambiguous starting points, turn user needs and technical constraints into buildable specifications, and lead cross-functional teams through agile delivery across organisational and geographic boundaries.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Spearheaded development of the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design, instrumented two competing workflows; the UI-led one recorded exactly zero clicks.

- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline, then introduced Dagster and dbt so quarterly imports ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis went from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent; cut time-to-market for new insurance products from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN,
MÖNCHENGLADBACH | 09/2021-03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

- Government, secure data platform. Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL |
12/2025-06/2026

- Construction staffing, two-sided B2B marketplace. Zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel so one person runs the day-to-day.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN |
01/2016-12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes against enterprise resistance to long installation cycles. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN |
02/2013-11/2018

- Fintech, mobile group-based P2P payments. Built from zero to acquisition by Sparkasse, inside the girocard ecosystem.

§ SKILLS

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI (program increment) planning.

Analytics and Data: funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, Matomo, MicroStrategy.

Technical Environments: Kubernetes (K8s), OpenShift, Docker, GitOps with ArgoCD, CI/CD, Jenkins, Python, Kotlin (Spring Boot), REST APIs, SQL, MongoDB, Kafka, Azure DevOps.

Governance and Business: GDPR (DSGVO), Deputy IT Security Officer, identity management, budget ownership and financial planning, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
-
