## § WHY BIRDIE HR

Birdie HR sits at a point where product decisions depend on reading API documentation as fluently as user feedback, and where a PM who cannot reason about backend behaviour is a bottleneck rather than an accelerant. The ticket lifecycle ownership the role describes, discovery through QA sign-off, is exactly how I have worked across every role I have held. The mention of A/B testing and structured data collection for meaningful analysis caught my attention: at Rohde & Schwarz I instrumented two competing workflows to let usage data settle a design argument, and the result changed the entire product direction. *That kind of decision-making is what I find most useful to bring to a team.*

---

## § AI-NATIVE STACK

*Daily tools, not buzzwords.*

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, development acceleration
- **Cursor**, AI-assisted coding environment
- **Lovable**, rapid front-end prototyping
- **GPT**, research and edge-case generation
- **Framer**, design-heavy prototyping
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder presentations

---

## § TECHNICAL ENVIRONMENT

*Shipped with, not just listed.*

REST APIs, PostgreSQL, MongoDB, Python, Kotlin (Spring Boot), Kubernetes, Docker, ArgoCD, Jenkins, CI/CD pipelines, GitLab, Azure DevOps, Dagster, dbt, ETL pipelines, Kafka, Jira, Confluence, Matomo, MicroStrategy, Shopware.

---

## § SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

*Two-sided B2B marketplace matching construction firms with workers.*

- Anonymity-until-payment model protects both sides until commitment is made.
  - WhatsApp and Telegram as the product surface, keeping onboarding near zero.
  - LLM agents across the funnel so one person runs the day-to-day operations.
  - Funnel and conversion analysis in SQL, directly transferable to A/B test structure and data collection work at Birdie HR.
- 

## § HOW I WOULD WORK AT BIRDIE HR

*First weeks, concrete.*

### WEEK 1

#### **Listen, map, find the gaps.**

Read existing specifications, map the current ticket lifecycle, and talk to developers to understand where requirements are causing rework.

### WEEK 2

#### **Audit and sharpen.**

Pick one active workstream, trace it from discovery through QA, and identify where the handoffs break down.

### WEEK 3+

#### **Ship clean specs.**

Own the next feature end-to-end: write the specification, track it through development, and close the loop at QA sign-off.

---

## *I* COVER LETTER

Dear Birdie HR team,

I am applying for the Product Manager role. I have 13 years of product ownership across insurance, public-sector analytics, healthcare, payments, and defence AI, regulated environments where incomplete information is the norm and clear specifications are the difference between a team that ships and one that stalls.

The data and analytics side of this role is where I spend a lot of my time. At the Federal Employment Agency I owned a national labour-market analytics platform: I introduced Dagster and dbt to make quarterly data imports run without hand-holding, and I integrated test automation into the Jenkins pipeline to free QA hours every week. At Rohde & Schwarz I instrumented two competing UI workflows to settle a design argument, the data showed that the visually polished option recorded exactly zero clicks, which redirected the entire platform strategy and increased pipeline runs by 200%. I bring that same instinct to A/B test design and funnel analysis.

On the technical side, I can read API documentation and request/response structures, reason about backend configuration and how it shapes frontend behaviour, and spot integration risks before they reach a developer. At CLINET Platforms I owned the CGM interface into hospital information systems, which required working through complex integration specifications and coordinating with external technical partners. I have shipped production work across REST APIs, PostgreSQL, Docker, Kubernetes, and CI/CD pipelines, which means I can write specifications that developers can act on without coming back for clarification.

The insurance domain is one I know from multiple angles: at EMIL Group I ran an 18-person delivery organisation building a B2B SaaS platform for insurers, reinsurers, brokers, and underwriters, and at AOK ITSCare I owned a B2B procurement webshop for three insurance organisations and roughly 20,000 employees. That background means I understand how platform configurations in insurance products propagate into user-facing behaviour.

I am available at short notice and happy to discuss the role in more detail.

Best regards, *Philipp Hilbert*

---

## *II* CURRICULUM VITAE

---

## § PROFILE

Product manager and product owner with 13 years of product ownership in regulated industries including insurance, public-sector analytics, healthcare, payments, and defence AI. I run continuous discovery, translate user needs and technical constraints into requirements and a prioritised roadmap, and lead cross-functional teams through agile delivery. I read and interpret API documentation, own the full ticket lifecycle from discovery through QA, and structure data collection and A/B tests to drive product decisions.

---

## § HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
  - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
  - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
  - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
- 

## § WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

*Defence and aerospace. Internal AI and data platform for the FCAS European programme.*

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. I instrumented two competing workflows and the beautiful UI-led one recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams, and making the platform hotfix-capable.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

*Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.*

- Introduced Dagster and dbt so quarterly data imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Integrated test automation into the Jenkins pipeline and freed several QA hours every week.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

*Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.*

- Implemented the CGM interface into hospital information system (KIS) workflows: the digital anamnesis went from 30 minutes to 5 from form to database.
- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

*Insurance. B2B SaaS platform for insurers, reinsurers, brokers, and underwriters.*

- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for new insurance products from months to less than a week.
- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees. Backlog refinement, user stories, and acceptance criteria in Jira.

---

## § FOUNDER TRACK

### FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing, two-sided B2B marketplace. Anonymity-until-payment model, LLM agents across the funnel, funnel and conversion analysis in SQL.

### CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption. Shipped a three-layer product that installs in under two minutes. Later Chair of the board.

### FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- Fintech, mobile P2P group payments. Built from zero, acquired and operated by Sparkasse inside the girocard ecosystem.

---

## § SKILLS

**Product Management:** continuous discovery, product roadmap, prioritisation, MVP definition, A/B testing, funnel and churn analysis, user research and interviews, prototyping, go-to-market support, KPI definition.

**Product Ownership:** requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

**Analytics and Data:** event-tracking logic, funnel analysis, ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, Matomo, MicroStrategy, SQL.

**Agile and Scaled Delivery:** Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI planning.

**Technical Environments Owned:** REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Docker, Kubernetes (K8s), ArgoCD, Jenkins, CI/CD, GitLab, Azure DevOps, Shopware.

**AI Products and Tooling:** LLM agents, agentic workflows, prompt engineering, Claude Code, GitHub Copilot, Cursor, Lovable.

**Stakeholder and Leadership:** stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, GDPR, Deputy IT Security Officer.

**Insurance and Platform:** insurance B2B SaaS platform delivery, claims workflows, insurer/broker/underwriter domain knowledge.

---

## § EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
- 

## § LANGUAGES

German (native speaker, C2) · English (C2, business and technical fluency)
