

Philipp Hilbert. *AI Product Manager for document intelligence and extraction.*

Positioning, I have shipped AI/ML products in regulated B2B environments where a wrong number costs real money, and I know how to turn model metrics into decisions engineers and executives can act on.

§ WHY K1X

K1X sits at the intersection of document AI and tax compliance, a domain where extraction errors translate directly into filing mistakes. The job description is specific about what makes this hard: precision and recall trade-offs, straight-through rates, and a September, November filing peak that demands real capacity planning. That matches the kind of AI product work I have done, not the kind that ships a chatbot wrapper. *That specificity is what drew me to this posting.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, day-to-day coding support
- **Cursor**, LLM-assisted development
- **Lovable**, rapid front-end prototyping
- **GPT**, research and document drafting
- **Framer**, design-heavy prototyping
- **Gamma.app**, stakeholder presentations
- **n8n**, agentic workflow design

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, ArgoCD, Docker, GitOps rollout and rollback, Jenkins, CI/CD pipelines, Dagster, dbt, PostgreSQL, MongoDB, REST APIs, Python, Kotlin (Spring Boot), Azure DevOps, GitLab, Kafka, OpenShift, Jira, Confluence.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built solo.

- Anonymity-until-payment model that protects both parties until commitment is made.
 - WhatsApp and Telegram as the product surface, with LLM agents running the funnel end-to-end.
 - Funnel and conversion analysis written in SQL.
 - Demonstrates the same human-in-the-loop design and agentic workflow thinking this role requires for confidence-driven review.
-

§ HOW I WOULD WORK AT K1X

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I would read every existing accuracy report and extraction spec, sit with Tax Content and Client Success to understand how defects currently get reported and escalated, and map the gap between what the model reports and what clients actually experience.

WEEK 2

Audit the roadmap.

I would size the existing backlog against team capacity, identify which document types are closest to a viable straight-through rate, and flag any items missing test data or acceptance criteria before they get into sprint.

WEEK 3+

Ship the accuracy report.

I would own the first recurring accuracy report: one document that translates per-field precision and coverage into user-facing outcomes, built so it can be read by Tax, Finance, and Engineering without a translation layer.

I COVER LETTER

Dear K1X team,

I have been a product manager on AI and data products in regulated B2B environments for several years, most recently at Rohde & Schwarz where I owned the internal AI and data platform for the FCAS European programme. The work involved exactly the trade-offs your job description names: precision versus coverage, evaluation set design, cost per inference, and how to explain model failures to stakeholders who care about outcomes, not model internals.

Your posting is specific about what makes this role hard. You need someone who can own the accuracy definition end-to-end, from per-field precision to straight-through rate to the user corrections that show up in Client Success tickets. At the Federal Employment Agency I built the ETL and data pipeline that fed a national labour-market analytics platform. Accuracy in that context was not abstract: a wrong indicator number in a published dataset was a policy error. I introduced Dagster and dbt to make quarterly data updates repeatable and auditable, and I integrated test automation into the Jenkins pipeline so QA could verify data quality without hand-holding. That is the kind of unglamorous, high-stakes data discipline your accuracy report work requires.

On prioritisation and roadmap planning, I have run RICE and opportunity scoring on backlogs at EMIL Group (18-person delivery organisation, B2B SaaS fintech) and at CLINET Platforms (healthcare, five-person team). At CLINET I cut the roadmap to the top 10% of features against agreed success measures, and user acceptance rose more than fivefold. I know how to size a roadmap against real team capacity and how to sequence dependencies when the September-to-November filing peak means you cannot afford a late-breaking scope change.

The tax domain is new to me, and I am comfortable saying so. I have worked in defence, public sector, insurance, healthcare, and payments, all domains where I had to learn the failure modes fast. What I bring is the framework for doing that quickly: I find the people who know where the footnotes are and I ask them the right questions.

I would welcome a conversation about how my background fits what you are building.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product manager and product owner with 13 years of product ownership in regulated B2B environments including defence AI, public-sector analytics, insurance, healthcare, fintech, and payments. I own AI and data platform roadmaps, translate model-level metrics into user outcomes, and lead cross-functional teams through agile delivery. I run continuous discovery, turn strategy and technical constraints into requirements and a prioritised roadmap, and keep stakeholders from Tax to Engineering aligned on what accuracy actually means.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. I instrumented two competing workflows and the beautiful UI-led one recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams and making the platform hotfix-capable.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly data imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Integrated test automation into the Jenkins pipeline and freed several QA hours every week, then migrated a bare-metal system fully into containers.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut a roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis dropped from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021-06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL |
12/2025-06/2026

- Construction staffing, two-sided B2B marketplace. Zero to one alone: LLM agents across the funnel, WhatsApp and Telegram as product surface, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN |
01/2016-12/2021

- IT security, quantum-secure encryption. Shipped a three-layer product that installs in under two minutes for enterprise buyers. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN |
02/2013-11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Product Management: continuous discovery, product vision and product roadmap, prioritisation (RICE, WSJF, Kano, opportunity scoring), MVP definition, acceptance criteria, PoC (proof of concept), A/B testing, user research and interviews, voice-of-customer synthesis, go-to-market support.

Product Ownership: requirements engineering, user stories, definition of done, epics, backlog refinement, sprint planning, velocity and burndown, release planning, UAT (user acceptance testing), Jira, Confluence, Figma, Miro.

Analytics and Data: KPI definition, funnel analysis, ETL (extract, transform, load), Dagster, dbt, PostgreSQL, MicroStrategy, Matomo.

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI planning.

Technical Environments Owned: Kubernetes, ArgoCD, Docker, GitOps, CI/CD, Jenkins, Python, REST APIs, PostgreSQL, MongoDB, Kafka, Azure DevOps.

Stakeholder and Leadership: C-level and executive reporting, cross-functional team leadership, workshop facilitation, conflict resolution, change management.

Governance and Business: GDPR, B2B fintech compliance, Deputy IT Security Officer, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
-
