

# Philipp Hilbert. *Senior Product Manager, Trading.*

*Positioning*, crypto-native product manager with 13 years shipping regulated financial products, a live perpetuals trading practice, and an AI-native build workflow.

## § WHY CRYPTO.COM

Retail trading is the sharpest edge of the consumer crypto experience: latency, UX, and trust collapse into a single moment when someone places an order. Crypto.com's scale, 80M+ users, spot and perpetuals on the same app, means every decision in the trading charter is a high-leverage one, which is exactly the constraint I find clarifying rather than intimidating. The posting is explicit that the playbook for perpetuals, spot, and adjacent markets is still being written, and that the Senior Director sets strategic direction while the PM owns how and when. I have run that structure before at R&S and at the Federal Employment Agency, and it suits the way I work. *That is exactly the environment where my strengths compound.*

---

## § AI-NATIVE STACK

*Daily tools, not buzzwords.*

- **Claude Code**, in-repo spec generation and edge-case coverage
- **Cursor / VSCode**, AI-assisted backlog and PRD drafting
- **GitHub Copilot**, code-review fluency alongside engineers
- **Lovable**, rapid front-end prototyping before engineering picks up a ticket
- **Framer**, design-heavy interaction flows and concept validation
- **GPT**, research synthesis and competitive landscape summaries
- **n8n**, agentic workflow automation and funnel instrumentation

- **Gamma.app**, stakeholder and cross-functional alignment decks
- 

## § TECHNICAL ENVIRONMENT

*Shipped with, not just listed.*

Kubernetes, ArgoCD, Helm, Docker, GitOps rollout and rollback, CI/CD with Jenkins and GitLab, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipeline design, Azure DevOps, Git.

---

## § SIDE PROJECT

CRYPTO BACKTEST ENGINE [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

*A personal algorithmic trading and backtesting framework built to stress-test execution strategies on real historical data.*

- Ingests tick-level OHLCV data from CEX and DEX venues, including perpetuals on Hyperliquid and Bitget.
  - Implements slippage, price impact, and funding-rate models to simulate real fill costs rather than mid-price assumptions.
  - Cross-chain bridge cost modelling (Across Protocol, 1inch routing) folds execution-path economics into strategy P&L.
  - Directly transferable to trading product work: the same microstructure intuition that informs strategy design informs UX decisions around order flow, liquidation warnings, and risk display.
- 

## § HOW I WOULD WORK AT CRYPTO.COM

*First weeks, concrete.*

### WEEK 1

**Listen, map, find the gaps.**

Shadow live trading sessions with power users and review the existing trading funnel analytics to map where volume, retention, and conversion break down before touching the roadmap.

## WEEK 2

### Slice and validate.

Identify the three highest-leverage trading UX or feature gaps surfaced in week one and size them against volume and retention data, cutting a first prioritisation view the team can pressure-test.

## WEEK 3+

### Ship and close loops.

Align Engineering, Design, QA, and Compliance on the first sprint scope, clear the first dependency, and get the first iteration of the highest-priority trading improvement into review.

---

## *I* COVER LETTER

Dear Crypto.com Hiring Team,

Trading is where users feel a crypto product every day. A slow order entry, an unclear liquidation warning, or a funding-rate display that takes three taps to find are not UX nits, they are retention events. I have spent the past eight years as an active participant in crypto markets across Hyperliquid, Bitget, Jupiter, and 1inch, and the past several years studying market microstructure: slippage, price impact, routing quality, and liquidation heatmaps via Coinglass and Hyblock Capital. I trade perpetuals and spot. I run backtests on real execution data. I understand the difference between what a trader says they want and what their order history reveals they actually need. That is the user research lens the Senior Product Manager, Trading role calls for.

On the product side, I bring 13 years of end-to-end ownership in regulated, high-stakes environments. At Rohde & Schwarz I ran a cross-functional team of 15+ engineers and data scientists, restructured the roadmap based on instrumented workflow analysis, and cut platform rollout time from days to 30 minutes through GitOps delivery with ArgoCD. At the Federal Employment Agency I carried a full ETL migration, a UI relaunch, and container migration in parallel while serving as Deputy IT Security Officer, the kind of multi-dependency coordination the trading charter requires across Engineering, Design, QA, Analytics, Marketing, and Compliance. Earlier, at EMIL Group, I took over an 18-person delivery organisation that was losing its senior engineers and its client trust, restructured it into three lean teams, and shipped the Claims Center from concept to production. I know what cross-functional alignment looks like when it is genuinely stalled, not just slow.

The fintech and payments thread runs deeper than the CV headline. Kvitt Payment Solutions, the P2P mobile payments startup I co-founded, was acquired and operated by Sparkasse inside the girocard ecosystem, a regulated, consumer-facing financial product taken from zero to

acquisition. The AI-native workflow requirement in the posting is not a checkbox for me: I use Claude Code, Cursor, Lovable, and n8n daily for spec generation, prototyping, and agentic workflow automation. I also build my own crypto dev agent framework and a backtesting engine, which means I can work alongside your engineering team with genuine technical context rather than as a translator.

What draws me specifically to Crypto.com is the combination of scale and frontier scope. Serving 80M+ users on spot and perpetuals simultaneously is a different product problem than building a niche trading tool: every prioritisation call has global distribution consequences, and the compliance constraints are real across multiple jurisdictions. I have shipped in that kind of regulated, multi-region environment, at R&S across a multinational FCAS programme, at the Federal Employment Agency at national scale, and I find those constraints sharpening rather than limiting.

I would welcome the chance to talk through the trading roadmap and where the role sits in Crypto.com's priorities for the year ahead.

Best regards, *Philipp Hilbert*

---

## **II** CURRICULUM VITAE

---

### § BEARING

Product manager and product owner with 13 years of end-to-end ownership across regulated financial, defence AI, and data platform products. At Rohde & Schwarz I led a 15+ person cross-functional team shipping an AI and data platform for the FCAS programme; at the Federal Employment Agency I owned a national analytics platform and served as Deputy IT Security Officer. I co-founded Kvitt Payment Solutions, a mobile P2P fintech product acquired by Sparkasse inside the girocard ecosystem, and Qcrypt AG, a quantum-secure encryption product. Eight years as an active crypto and DeFi participant, trading perpetuals, spot, and cross-chain, with hands-on backtest and market microstructure analysis, now applying that depth to consumer trading product at global scale.

---

### § WHAT I CAN DO

**Product Management:** continuous discovery, product roadmap, prioritisation, MVP definition, A/B testing, user research and interviews, prototyping, go-to-market support, product lifecycle

management, fintech and payment flow design, crypto/DeFi domain depth (CEX/DEX, perpetuals, AMMs, bridges, oracles)

**Product Ownership:** requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, UAT, Jira, Confluence, Figma, Miro

**AI Products and Tooling:** LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, Framer, n8n, Gamma.app

**Agile and Scaled Delivery:** Scrum, Kanban, SAFe, ART, PI planning, GitOps, CI/CD, ArgoCD, release gating, regression and end-to-end test automation

**Analytics and Data:** funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy

**Technical Environments:** Kubernetes, OpenShift, Docker, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka

**Governance:** GDPR/DSGVO, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning

**Platform and Insurance:** B2B SaaS platform delivery, insurance product launches, claims workflow, data platform

---

## § PROFESSIONAL EXPERIENCE

### ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Led 15+ engineers and data scientists (Scrum, Jira/Confluence) on the internal AI and data platform for the FCAS European programme; GitOps rollout with ArgoCD cut deployment from days to 30 minutes; redirected roadmap via instrumented workflow analysis, increasing pipeline runs 200%.

### BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS PLATFORM 2023-2024

Owned national labour-market analytics platform; integrated test automation into Jenkins pipeline, introduced Dagster and dbt cutting data-update time by 75%, and led full container migration and UI relaunch. Deputy IT Security Officer.

### CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut roadmap to top 10% of features against agreed success measures; user acceptance rose more than fivefold. Shipped CGM/KIS interface reducing digital anamnesis from 30 minutes to 5.

#### EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022

Restructured 18-person delivery org into three lean teams; reduced senior-engineer attrition from near-total exodus to one departure. Shipped Claims Center concept to production; cut insurance product time-to-market from months to under one week.

#### SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS & POS 2021-2022

Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning; retail and payments, POS and forecourt systems.

#### BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

#### AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B PROCUREMENT 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production.

#### WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

---

#### § FOUNDER & EARLY-STAGE EXPERIENCE

#### CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-2026

Zero-to-one two-sided B2B marketplace; anonymity-until-payment model, WhatsApp/Telegram as product surface, LLM agents across the funnel.

#### QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Owned hardware/software product for quantum-secure encryption; shipped three-layer install in under two minutes for enterprise buyers. Later Chair of the board.

#### KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013-2018

Built mobile group-based P2P payments product from zero to acquisition by Sparkasse inside the girocard ecosystem.
