§ BEARING

Product Manager with 13 years of ownership in operationally complex, regulated domains. I run continuous discovery, turn user workflows and technical constraints into prioritised roadmaps, and lead cross-functional squads through agile delivery without heavy documentation overhead. My most productive pattern: instrument competing approaches cheaply, read what the data actually says, and redirect before sinking build budget into the wrong path. Looking to apply that discipline to logistics and supply chain automation at Zencargo.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision, product roadmap, prioritisation, MVP definition, PoC, prototyping, A/B testing, user research and interviews, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, epics, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Analytics and Data: funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt (data build tool), Matomo, MicroStrategy, PostgreSQL, SQL.

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART, PI planning, CI/CD, GitOps, ArgoCD.

SaaS Platform and Technical Environments: Kubernetes, Docker, REST APIs, Python, PostgreSQL, MongoDB, Kafka, Jenkins, Azure DevOps.

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership.
