

Philipp Hilbert. *Global workforce enablement PM with a decade of regulated-industry delivery.*

Positioning, ten years shipping product in regulated B2B environments, compliance, cross-functional teams, 3, 6-month cycles, maps directly onto Safeguard Global's model.

§ WHY SAFEGUARD GLOBAL

Safeguard Global created the employer-of-record category and now operates it at scale across 170 countries, that is a genuinely complex compliance and operations problem, not a commodity software play. The job description calls out "human when it matters" as the core philosophy, which is exactly the kind of constraint that makes product work interesting: you cannot automate your way out of a local labour law edge case, so the PM has to hold both the technical and the regulatory dimensions at once. I have done that in public-sector analytics, defence-AI platforms, and insurance SaaS, each with its own audit and compliance surface. *That is the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo feature delivery and spec generation
- **GitHub Copilot**, development acceleration
- **Cursor**, code-first prototyping
- **Lovable**, rapid front-end prototypes for discovery
- **GPT**, qualitative synthesis and stakeholder draft copy
- **Gamma.app**, executive storytelling and roadmap decks

- **Framer**, design-heavy prototype work
 - **n8n**, agentic workflow automation
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, ArgoCD, GitOps, Docker, Jenkins, GitLab, Azure DevOps, CI/CD pipelines, Dagster, dbt, PostgreSQL, MongoDB, REST APIs, Python, Kotlin with Spring Boot, Kafka, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

LIBERATION OF BAJOR GITHUB.COM/HILBERTP →

A multi-agent coding framework built solo as a production tool, not a demo.

- Orchestrates file-queue-based agent loops so a single operator can drive parallel development workstreams.
 - Designed around a supervisor-worker pattern with structured handoff files between agents.
 - Used in anger as the execution layer for construct8, a two-sided B2B staffing marketplace built from zero.
 - Directly relevant to Safeguard Global's automation and efficiency agenda: the same architecture that runs a solo founder's operations can drive product-side workflow experiments.
-

§ HOW I WOULD WORK AT SAFEGUARD GLOBAL

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow customer success and in-country HR experts to map the actual compliance and workforce workflows before touching the roadmap.

WEEK 2

Instrument, then cut.

Identify the two or three pain points with the clearest data signal, drop-off, manual workaround volume, support ticket clusters, and draft a prioritised problem statement for stakeholder alignment.

WEEK 3+

Experiment, then ship.

Run the cheapest possible test of the top candidate solution, get a read from real users, and sequence the first 3-month delivery commitment with engineering.

I COVER LETTER

Safeguard Global created the employer-of-record category and has spent fifteen years learning what others are still guessing at: that successful global expansion needs local compliance expertise wired into the product, not bolted on afterward. That framing, "human when it matters", is the kind of product constraint I find genuinely useful, because it forces real prioritisation rather than endless feature addition.

My background is ten years of product ownership in regulated B2B environments: defence-AI platforms for FCAS under multinational governance, a national labour-market analytics system for Germany's Federal Employment Agency, a B2B insurance SaaS platform for underwriters and reinsurers, a healthcare patient app piloted in hospitals, and secure identity-management infrastructure for the Robert Koch Institute. Across those engagements the common thread is managing complexity in undefined problem spaces while keeping cross-functional teams, engineering, QA, data science, compliance, C-level stakeholders, aligned on what matters within the current delivery horizon.

The job description calls for delivery within 3, 6 month horizons, iterative experiments before committing to a build, and commercial awareness of how product decisions land on revenue and customer satisfaction. Those are the mechanics I run by default. At Rohde & Schwarz I redirected an entire product stream, from a UI-led design that recorded zero real usage to a developer-code-first approach, based on two instrumented workflows. At CLINET I cut a roadmap to its top 10% of features and watched user acceptance rise more than fivefold. At EMIL I restructured an 18-person delivery organisation that was losing engineers and client trust, and shipped the Claims Center from concept to production, cutting time-to-market for a new insurance product from months to under a week.

The stakeholder range in this role, engineering, design, data, business, sales, marketing, customer success, is the environment I work best in. I have spent years translating between technical

constraints and business outcomes, and I take the communication obligation seriously: the same message needs to land differently in a sprint review and an executive briefing. I have done both.

I am based in Berlin, authorised to work across the EU without restriction, and available with four weeks' notice.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of end-to-end ownership in regulated B2B environments: defence AI, public-sector analytics, insurance SaaS, healthcare, and fintech. I run continuous discovery, translate strategy and user research into a prioritised roadmap, and lead cross-functional teams through agile delivery. My working style is problem-first, cheap experiments before expensive builds, with the technical fluency to hold the delivery chain accountable end to end.

§ WHAT I CAN DO

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP and PoC definition, A/B testing, user research and interviews, prototyping, go-to-market support, KPI definition.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, agile release trains, PI planning.

Stakeholder and Leadership: C-level and executive reporting, cross-functional team leadership, workshop facilitation, conflict resolution, change management.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo.

Technical Environments Owned: Kubernetes, ArgoCD, GitOps, Docker, Jenkins, GitLab, Azure DevOps, CI/CD, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership and financial planning, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI 2024 TO 2025

Internal AI and data platform for the FCAS European programme. Introduced GitOps with ArgoCD: rollout time fell from days to 30 minutes, platform became hotfix-capable. Redirected product to developer-code-first design after instrumenting two competing workflows; the UI-led alternative recorded zero real usage.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR 2023 TO 2024

National labour-market analytics platform. Integrated test automation into Jenkins, introduced Dagster and dbt, migrated from bare metal to containers, led a full UI relaunch. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Mobile patient app for iOS and Android. Cut roadmap to top 10% of features: user acceptance rose more than fivefold. Implemented CGM hospital interface myself: anamnesis time fell from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE SAAS 2022

B2B platform for insurers, reinsurers, and brokers. Restructured 18-person delivery organisation into three lean teams; attrition fell to a single departure. Shipped Claims Center from concept to production, cutting time-to-market for a new insurance product from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL & PAYMENTS 2021 TO 2022

POS and forecourt systems. Moved research results into production in a fully SAFe matrix organisation with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · GOVERNMENT DATA 2021

Secure data platform. Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE 2019 TO 2020

B2B procurement webshop. Migrated legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017 TO 2018

Clinical network. WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING 2025 TO 2026

Two-sided B2B marketplace, zero to one alone. Anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016 TO 2021

Quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · DEEP TECH 2018 TO 2021

Nanotechnology and agriculture. Took fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013 TO 2018

Mobile group-based P2P payments. Built from zero, acquired and operated by Sparkasse inside the girocard ecosystem.
