

Philipp Hilbert. *Data & AI Product Owner.*

Positioning, Senior Product Owner with 13 years shipping data platforms, AI tooling, and regulated B2B SaaS, ready to own backlog and delivery for a growing consultancy.

§ WHY WIRE IT

Wire IT sits at an interesting intersection: senior-led consulting with an explicit commitment to staying agile and people-centred rather than scaling into process bureaucracy. The posting asks for someone who can translate business needs into data and AI product priorities for global, virtual teams, exactly the mode I have operated in across defence AI (FCAS programme), public-sector analytics (Bundesagentur für Arbeit), and insurance B2B SaaS (EMIL Group). The explicit call-out of Microsoft Fabric and Azure data platforms alongside Generative AI product development signals that clients here are in real transformation, not just roadmap theatre. *That combination of genuine technical depth and stakeholder complexity is the environment where my delivery track record compounds.*

§ HONEST FRAMING

I have not shipped a product directly on Microsoft Fabric; my data platform experience runs on Dagster, dbt, PostgreSQL, and containerised ETL pipelines. The underlying patterns, data modelling, pipeline orchestration, stakeholder-facing metrics, and change management through a migration, transfer directly, and I am prepared to close the Fabric-specific gap quickly.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and edge-case sweeps
- **GitHub Copilot**, paired development and review
- **Cursor**, context-rich refactors across large codebases
- **Lovable**, rapid front-end prototyping for user-story validation
- **GPT**, stakeholder document drafting and synthesis
- **Gamma.app**, presentation and workshop prep
- **n8n**, agentic workflow design and automation
- **Framer**, design-heavy prototype handoffs

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Zero-to-one B2B marketplace for construction staffing, built and operated solo.

- Two-sided matching platform connecting construction firms with workers, removing the headhunter from the hire loop.
- Anonymity-until-payment model protecting both sides; WhatsApp and Telegram as the primary product surface.
- LLM agents across the funnel so a single operator runs day-to-day matching and conversion tracking.
- Demonstrates solo end-to-end delivery, discovery, backlog, implementation, funnel analysis in SQL, directly relevant to a lean consultancy environment.

§ HOW I WOULD WORK AT WIRE IT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the active client engagement, read existing backlog and any data platform architecture documentation, and map the stakeholder landscape, who sets priorities, who gates delivery, where dependencies live.

WEEK 2

Refine, slice, validate.

Run a backlog refinement session: surface under-specified tickets, write crisp user stories with acceptance criteria, and align the team on a sprint goal that delivers visible client value.

WEEK 3+

Ship, track, close loops.

Own a sprint end-to-end, planning through review, while establishing the lightweight metrics (velocity, dependency tracking, definition of done adherence) that let the client see progress without needing a status call every day.

I COVER LETTER

Dear Wire IT team,

I am writing to apply for the Data & AI Product Owner position. Wire IT's positioning, senior-led consulting that stays deliberately agile and people-centred, matches the way I prefer to work: close to the team, outcome-focused, and transparent with stakeholders about what the backlog can and cannot promise.

My most directly relevant experience is the internal AI and data platform I owned at Rohde & Schwarz for the FCAS European programme. I managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence, drove GitOps delivery with ArgoCD that cut rollout time from days to 30 minutes, and redirected the product strategy mid-cycle after workflow instrumentation showed that a UI-led approach was recording zero real usage. The result was a 200% increase in pipeline runs. That project required exactly the skills your posting highlights: translating business needs into product priorities, refining tickets and

writing user stories with clear acceptance criteria, coordinating dependencies across multinational teams, and maintaining sprint discipline across time zones.

At the Bundesagentur für Arbeit I owned a national labour-market analytics platform. I introduced Dagster and dbt for ETL orchestration, cutting quarterly data-update effort by roughly 75%, and carried a full UI relaunch and a bare-metal-to-containers migration through the same period. This is the data and analytics literacy your posting asks for, applied to a platform used by policymakers and researchers rather than internal engineers, which sharpened my ability to write requirements that bridge technical feasibility and business value.

My B2B SaaS and Insurance background comes from EMIL Group, where I shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to under a week. I restructured an 18-person delivery organisation into three lean teams with dedicated leads, reducing attrition from near-total exodus to a single departure. Stakeholder management under pressure, not just in calm water, is where that experience was built.

On the AI side, I prototype and iterate daily with Claude Code, GitHub Copilot, Cursor, and Lovable, and I have designed agentic workflows in n8n. I am honest that my data platform experience runs on Dagster, dbt, and PostgreSQL rather than Microsoft Fabric specifically, but the orchestration, modelling, and change-management patterns are the same, and I am ready to close that gap fast.

Wire IT's ambition to grow while keeping its agile, people-centred culture intact is the kind of challenge that suits a product owner who has done that restructuring work from the inside. I would be glad to bring that to your clients.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Owner and Product Manager with 13 years of ownership in regulated and data-intensive environments, defence AI, public-sector analytics, insurance B2B SaaS, and healthcare. I run continuous discovery, translate business needs into prioritised backlogs and clear acceptance criteria, and lead cross-functional teams through Scrum and Kanban delivery. At my best in environments where data literacy, stakeholder alignment, and sprint discipline all have to work at once.

§ WHAT I CAN DO

Data & AI Product Ownership: Data platform product ownership, ETL pipeline prioritisation, AI and Generative AI product development, LLM agent design, agentic workflow orchestration, AI governance, Explainable AI (XAI), EU AI Act.

Agile and Scrum: Backlog management and refinement, user stories, acceptance criteria, definition of done, sprint planning, daily stand-up, sprint review, retrospective, velocity and burndown, release planning, Scrum, Kanban, SAFe (Scaled Agile Framework), PI planning.

Stakeholder Management: Cross-functional team leadership, stakeholder communication and coordination, C-level reporting, workshop facilitation, global and virtual team collaboration, conflict resolution.

Analytics: KPI definition, funnel and churn analysis, Dagster, dbt, PostgreSQL, MicroStrategy, Matomo, ETL (extract, transform, load).

Technical Environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Azure DevOps, REST APIs, Python, PostgreSQL, MongoDB, Kafka, Jira, Confluence, Figma.

B2B and Insurance Domains: B2B SaaS platform delivery, insurance product lifecycle (Claims Center, underwriting workflows), healthcare and public-sector compliance, GDPR, identity management.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Led Scrum delivery for the FCAS AI and data platform across 15+ engineers and data scientists; GitOps rollout with ArgoCD cut release time from days to 30 minutes; pipeline usage up 200% after workflow-driven strategy pivot.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Owned national labour-market analytics platform; introduced Dagster and dbt, reducing data-update effort by 75%; migrated bare-metal system to containers; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Focused a five-person team's roadmap on top 10% of features by agreed success measures; user acceptance rose fivefold; integrated CGM/KIS interface cutting digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery org into three lean teams; shipped Claims Center concept to production; cut new-insurance-product time-to-market from months to under a week. Python, Kotlin, PostgreSQL.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS & POS 2021-2022

Moved research into production in a full SAFe setup with agile release trains and PI planning across a matrix organisation.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · B2B INSURANCE PROCUREMENT 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; backlog refinement, user stories, and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · INDUSTRIAL IT 2019

Full site IT modernisation end to end, wind energy.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE INFRASTRUCTURE 2017-2018

Wifi rollout across nine hospitals in a clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PRODUCT MANAGER · B2B STAFFING MARKETPLACE 2025-PRESENT

Zero to one: two-sided B2B marketplace, anonymity-until-payment model, LLM agents across the funnel, SQL-based funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER & PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software; shipped three-layer product with sub-two-minute install; later Chair of the Board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO & CFO · AGRITECH 2018-2021

Laboratory to investor rounds; financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · FINTECH P2P PAYMENTS
2013-2018

Built mobile group P2P payment product from zero to acquisition by Sparkasse inside the girocard ecosystem.
