

Philipp Hilbert. *Product Owner, crypto infrastructure and trading.*

Positioning, Ten years shipping regulated fintech products and eight years in crypto markets, from P2P payments to DeFi infrastructure, ready to own Revolut's crypto roadmap end to end.

§ WHY REVOLUT

Revolut has built the most ambitious financial super app in the world, and the crypto infrastructure underneath it, custody, liquidity routing, real-time pricing, multi-asset trading, is exactly the kind of systems problem I find most compelling. The posting calls out integration with liquidity venues, custodians, and market data providers: that is the layer I study in my own time, working with execution analytics on Hyperliquid, Coinglass, and Hyblock Capital to understand slippage, routing, and market microstructure. What draws me here specifically is the combination of global regulatory complexity, high-performance backend systems, and a product surface used by 75 million customers every day. *That is precisely the environment where rigorous product ownership compounds fastest.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, accelerated requirements drafting
- **Cursor**, in-editor prototyping and refactoring
- **Lovable**, rapid front-end prototyping for user testing
- **GPT**, structured analysis and stakeholder documents
- **n8n**, agentic workflow automation
- **Framer**, design-heavy UX exploration

- **Gamma.app**, fast deck and documentation output
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD pipelines, GitLab, Azure DevOps, REST APIs, Python, Kotlin with Spring Boot, Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipelines, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CRYPTO BACKTESTING AND AGENT FRAMEWORK [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A personal infrastructure project that has evolved into a serious trading and research environment.

- Backtesting engine for crypto markets, designed to evaluate execution quality across centralized and decentralized venues including Hyperliquid, Bitget, and Jupiter.
 - Architecture uses a file-queue-based agent loop for autonomous strategy evaluation, drawing on real-time and historical data from Coinglass and Hyblock Capital.
 - Hands-on work with perpetual futures mechanics, DEX aggregation, cross-chain bridging via Across Protocol, and liquidation heatmap analysis.
 - Directly relevant to Revolut's crypto pricing, latency, and trade UX optimisation mandate.
-

§ HOW I WOULD WORK AT REVOLUT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow liquidity venue integrations and custodian workflows, read the current crypto roadmap and compliance constraints, and identify where the largest friction sits between trading mechanics and customer-facing UX.

WEEK 2

Slice and validate.

Define three to five measurable outcomes against the existing roadmap, align with Engineering, Risk, and Treasury on feasibility and regulatory exposure, and cut anything blocking a clean first delivery cycle.

WEEK 3+

Ship and close loops.

Own the first feature through to production, instrument it with the right KPIs, and begin the discovery cycle on the next asset class or geography expansion.

I COVER LETTER

Dear Revolut hiring team,

Revolut's crypto product sits at an unusually interesting intersection: regulated financial infrastructure, real-time execution systems, and a consumer product used by tens of millions of people. That combination is what drew me to this role. I have spent ten years as a product owner and product manager in regulated fintech and enterprise software, and I have spent the last eight years as a serious participant in crypto markets, not as a casual user, but as someone who studies execution quality, market microstructure, and the infrastructure layer that makes digital asset markets function at scale.

My fintech roots are practical. I founded Kvitt Payment Solutions, a mobile P2P group payments product that was acquired by Sparkasse and integrated into the girocard ecosystem. That experience taught me what it means to build within a regulated payment network: the compliance constraints, the integration surface with banking infrastructure, and the gap between what users want and what a regulated environment permits. Later, at Bundesagentur für Arbeit, I acted as Deputy IT Security Officer while simultaneously owning the national labour-market analytics platform, managing ETL migrations, containerisation, and test automation on a live government system. Regulated, high-stakes, no margin for downtime, that is the environment I am comfortable in.

On the crypto side, I actively trade and manage positions across centralized and decentralized venues: Hyperliquid for perpetual futures, Jupiter and 1inch for DEX aggregation, Across Protocol for cross-chain bridging. I work with liquidation heatmaps and market data from Coinglass and Hyblock Capital, and I have built my own backtesting engine and agentic decision framework for evaluating execution quality. I understand the mechanics of order routing, price impact, slippage, and the custody and liquidity infrastructure that sits behind a product like

Revolut's crypto offering. This is not background reading, it is how I spend my evenings and weekends.

The role calls for experience delivering high-performance systems in regulated environments and driving integration with third-party infrastructure such as liquidity venues and custodians. At Rohde & Schwarz, I managed a cross-functional team of fifteen engineers and data scientists delivering the internal AI and data platform for the FCAS European defence programme, using GitOps with ArgoCD to cut deployment time from days to thirty minutes. At CLINET Platforms, I integrated a CGM hospital information system interface that reduced a clinical workflow from thirty minutes to five. These are the kinds of integration and delivery problems I have solved repeatedly, and the crypto infrastructure domain applies the same rigour at higher velocity.

I would welcome the opportunity to discuss how my background fits the specific challenges on your crypto roadmap.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product owner with 13 years of experience in regulated industries, fintech, defence AI, public-sector analytics, insurance, and healthcare, and eight years as an active participant in crypto and DeFi markets. I turn complex system requirements and compliance constraints into prioritised roadmaps, lead cross-functional teams through agile delivery, and have a direct track record integrating third-party financial infrastructure including payment networks and hospital information systems. I am technically fluent across backend environments, data pipelines, and DevOps toolchains.

§ WHAT I CAN DO

Crypto and DeFi: CEX/DEX mechanics, perpetual futures, AMMs, MEV, cross-chain bridging, order routing, slippage and price impact analysis, liquidation heatmaps, Hyperliquid, Jupiter, 1inch, Across Protocol, Coinglass, Hyblock Capital.

Fintech and regulated delivery: payment flow and PSP integration, P2P payments product design, girocard ecosystem, regulated environment product ownership, compliance and risk alignment.

Product Owner / Product Management: continuous discovery, product roadmap, prioritisation, MVP definition, prototyping (Lovable, Framer), user research, A/B testing, go-to-market support, Jira, Confluence, Figma.

Agile delivery: Scrum, Kanban, SAFe, backlog refinement, sprint planning, velocity and burndown, release planning, UAT.

Data and analytics: ETL pipeline ownership, Dagster, dbt, PostgreSQL, funnel and churn analysis, KPI definition.

Technical environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

AI tooling: LLM agents, agentic workflows, Claude Code, GitHub Copilot, Cursor, Lovable, prompt engineering, EU AI Act, Explainable AI.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA 2024-2025

GitOps delivery with ArgoCD cut rollout time from days to 30 minutes; increased pipeline runs 200% by redirecting strategy to developer-code-first workflows; led 15+ engineers and data scientists through Scrum on the FCAS European programme.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Owned national labour-market analytics platform; introduced Dagster and dbt, saving 75% of data update time; migrated bare-metal to containers; Deputy IT Security Officer; Jenkins test automation.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Cut roadmap to top 10% of features: user acceptance rose fivefold. Integrated CGM hospital information system interface, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery org into three lean teams; attrition near-eliminated. Shipped Claims Center from concept to production; cut time-to-market for new insurance products from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL AND PAYMENTS 2021-2022

POS and forecourt systems; moved research to production in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and 20,000 employees; still in production.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING 2025-2026

Zero-to-one B2B marketplace; anonymity-until-payment model; LLM agents across the funnel; SQL funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Shipped quantum-secure hardware and software product installing in under two minutes for enterprise buyers; later Chair of the Board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013-2018

Built mobile group P2P payments product from zero to acquisition by Sparkasse; integrated into girocard ecosystem.
