§ BEARING

Hands-on Product Manager with nearly ten years of experience translating complex operational and regulatory requirements into scalable, automated software. Background spans payment product design, regulated B2B SaaS, government data platforms, and AI systems – with consistent delivery ownership from discovery through production rollout. Comfortable operating in ambiguity, aligning cross-functional stakeholders without formal authority, and building the documentation and process structures that let teams move independently. Fluent in AI-native workflows and technically literate across the full modern software stack.

§ CORE STRENGTHS

- Translating complex operational and regulatory requirements into scalable product solutions
- Payment flow design, PSP integration, and consumer payment UX
- AI-assisted product execution and workflow automation
- Cross-functional stakeholder alignment without formal authority
- Backlog management, sprint discipline, and delivery velocity tracking
- KPI-oriented discovery, prioritisation, and product instrumentation
- Data platform and ETL pipeline product ownership
- Audit trails, data provenance, and compliance-aware product design
- Founder-level pragmatism: low ego, high agency, full ownership

§ PROFESSIONAL EXPERIENCE

Rohde & Schwarz 2024, 2025

Product Manager, AI Data Transformation

- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout
- Reduced deployment times from multiple days to 20–40 minutes by introducing GitOps with ArgoCD
- Improved data quality via filtering, tagging, reproducible transformation pipelines, and full data provenance audit trails
- Enabled ML training and evaluation on curated datasets with transparent evaluation concepts (SafeAI, ExplainableAI)
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature queued from the engineering team for over a year
- Led cross-functional team: architect, data scientists, backend and frontend engineers, QA, multinational stakeholders

Federal Employment Agency (Bundesagentur für Arbeit) 2023, 2024

Product Manager, Public Data Analytics

- Delivered labour shortage analytics, flexible regional comparison tooling, and modernised admin features on the Arbeitsmarktmotor platform
- Introduced Dagster for automated ETL and indicator generation, reducing manual data pipeline overhead
- Migrated legacy systems to Kubernetes and standardised CI/CD with full test integration at build time
- Served as Deputy IT Security Officer (IT-SV) with focus on compliance, governance, and data lineage
- Designed interactive dashboards and community features for regional stakeholders

Emil Group 2022, 2022

Product Manager, InsurTech SaaS Platform

- Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation for a B2B InsurTech platform reducing insurance time-to-market from one year to under one week
- Designed and delivered a Claims Center module from concept to production rollout

- Re-established sprint discipline by restructuring a 17-person team into smaller, effective Scrum units with ownership and deputy concepts
- Reintroduced velocity tracking and structured refinement lost under delivery pressure; reduced senior developer attrition to a single departure
- Regained client trust through structured communication and weekly product workshops in a prototype-stage environment

CLINET Platforms 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core flows for digital anamnesis, meal and therapy plans, transport, chat, and patient document storage on a mobile-first hospital app
 - Integrated CGM interface into hospital information system workflows
 - Built stakeholder trust through transparent communication of technical complexity involving legacy APIs and external databases
-

§ FOUNDER & EARLY-STAGE EXPERIENCE

Kvitt Payment Solutions 2013, 2018

Co-Founder & Product Lead

- Designed and built a group-based P2P payment product from zero: settlement logic, PSP integration, full UX and UI design, mobile app prototype on iOS and Android
- Operated the product for five years across real consumer payment conditions before acquisition and operation by Sparkasse
- Built deep practical knowledge of payment edge cases: partial settlements, failed retries, disputed splits, user abandonment at confirmation

Qcrypt AG 2016, 2018

Product Owner

- Owned backup, restore, checkpoint, and data-encryption product architecture for a quantum-secure encryption product based on one-time-pad keys and true random number generator hardware
- Served as deputy IT security officer; designed product for setup under two minutes with no technical knowledge required

COVID-19 Data Platform, Bundesdruckerei 2021, 2021

Product Owner

- Delivered RKI projects DIM and DESH: secure data structures and identity management for national pandemic data infrastructure

AOK Health Insurance ITSCare 2019, 2020

Proxy Product Owner

- Led migration of internal webshop to Shopware including complex catalogue and API integration and configurable approval policy workflows
