

Philipp Hilbert. *Regional product delivery lead at the intersection of retail, compliance, and multi-team coordination.*

Positioning, Thirteen years owning end-to-end product delivery across regulated, multi-stakeholder environments, now bringing that rigour to Amazon's MENA retail portfolio.

§ WHY AMAZON

The OHL Senior PM role is one of the more demanding configurations in product management: six tech partner teams, none of which you directly control, a MENA business context that adds localization and compliance layers on top of global feature work, and a portfolio spanning warranty and services programs where legal and operational readiness are as hard as the engineering. The job description's phrase "influenced-but-not-owned deliverables" is the precise challenge I have navigated at Rohde & Schwarz across a multinational FCAS programme and at Scheidt & Bachmann inside a full SAFe release-train setup. Amazon's scale and the GCC region's pace make this the right step up. *That is exactly the kind of environment where influence without authority either sharpens you or breaks you, and I have consistently found it sharpening.*

§ HONEST FRAMING

The MENA retail and home-and-leisure category is a domain I have not worked in directly; my retail exposure is a B2B procurement webshop for AOK insurance, not consumer e-commerce at Amazon's scale. The transferable mechanic is strong: I have repeatedly delivered cross-functional programmes where the product complexity was regulatory and operational rather than technical, and that is the dominant challenge this role describes.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and edge-case drafting
- **GitHub Copilot**, in-editor acceleration across Python and SQL
- **Cursor**, context-aware refactoring inside larger codebases
- **Lovable**, rapid front-end prototyping before engineering commits
- **GPT**, structured document drafting and stakeholder summary passes
- **Gamma.app**, leadership-ready roadmap and review deck production
- **n8n**, agentic workflow design and multi-step automation
- **Framer**, design-fidelity prototyping for UAT and stakeholder sign-off

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, ArgoCD, Docker, GitOps, Jenkins, CI/CD, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, REST APIs, Dagster, dbt, Azure DevOps, GitLab, Jira, Confluence, Shopware, Matomo, MicroStrategy.

§ SIDE PROJECT

PHOENIX882.COM GITHUB.COM/HILBERTP →

A crypto market backtesting engine built and operated solo.

- Reconstructs marginal prices over merit-order data for aFRR balancing markets; also hosts trading-strategy backtesting for crypto venues.
- Pipeline-first architecture: data ingestion, transformation, and strategy evaluation are separated into discrete stages, not a monolith.
- Feeds into a multi-agent coding framework (Liberation of Bajor) that automates repetitive implementation work.
- Demonstrates the analytical and data-pipeline fluency that applies directly to Amazon's KPI definition, funnel analysis, and business-readiness tracking.

§ HOW I WOULD WORK AT AMAZON

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Read every BRD, PRD, and delivery tracker in the portfolio; sit in on each of the six tech partner team's standups; map where dependencies cross and where MENA input is currently missing or late.

WEEK 2

Surface the blockers.

Consolidate gaps and risks into a single dependency map, flag the two or three that will slip Q4 if not resolved, and bring them to leadership with options rather than problems.

WEEK 3+

Own the cadence.

Stand up a weekly cross-team delivery review with a standard status template, drive UAT coordination for the nearest launch, and begin drafting the multi-year planning submission with the business requirements already aligned.

I COVER LETTER

Amazon's OHL Senior PM role in GCC Retail is, by design, a coordination problem at scale. Six tech partner teams, a MENA business context that adds localization, regulatory, and operational readiness layers to every feature, and a portfolio that includes warranty and services programs where legal sign-off is as load-bearing as the code. I have spent thirteen years working in exactly this configuration, regulated, multi-team, high-dependency programmes where the PM's primary job is to hold the entire delivery chain together without owning most of it.

At Rohde & Schwarz, I owned product and delivery for an AI and data platform inside the FCAS European defence programme: multinational team, no direct line authority over the engineering squads, and a delivery cadence that had to survive hotfixes. I introduced GitOps with ArgoCD, reduced rollout time from days to thirty minutes, and made the platform hotfix-capable, a change that required alignment across architects, data scientists, and programme management in three countries. That is the "influenced-but-not-owned" dynamic the job description names, and it is the mode I work in most naturally.

At Scheidt & Bachmann I operated inside a full SAFe release-train setup, moving research results into production across a matrix organisation with PI planning, ART coordination, and shared engineering bandwidth. At the Bundesagentur für Arbeit I served as Deputy IT Security Officer while simultaneously leading a full UI relaunch and a bare-metal-to-container migration, a workload that required keeping Finance, Security, and Operations aligned on status and decisions in parallel. Writing crisp BRDs and PRDs that a globally distributed partner team can act on without a phone call is a discipline I practise in every engagement.

The MENA context is additive rather than familiar: I have not managed a consumer retail category in the Gulf, and I say that plainly. What I bring is a proven pattern of landing quickly in complex, regulated, multi-stakeholder environments, identifying where the delivery chain is fragile, and building the coordination structures that make it robust. The localization and UAT coordination challenges the posting describes are familiar in shape even if the geography is new.

If there is a conversation worth having about the role and the portfolio, I would welcome it.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with thirteen years of end-to-end delivery in regulated, multi-team environments: defence AI, public-sector analytics, insurance, healthcare, payments, and retail. Consistently placed at the centre of high-dependency programmes where the PM must coordinate across teams without owning them, write requirements that global engineering partners can act on, and keep legal, finance, and operations aligned through to launch. Comfortable writing BRDs and PRDs at pace, running multi-team delivery reviews, and surfacing risks to leadership before they become commitments.

§ WHAT I CAN DO

Stakeholder and Leadership: stakeholder management and expectation alignment, cross-functional team leadership, C-level and executive reporting, workshop facilitation, conflict resolution, change management.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, UAT, release planning, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research, prototyping, product lifecycle management, go-to-market support.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable.

Technical Environments Owned: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, financial planning, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI / DATA PLATFORM 2024 TO 2025

Owned the product and delivery for an internal AI platform inside the FCAS European programme; introduced GitOps with ArgoCD across a multinational team, reducing rollout time from days to 30 minutes and making the platform hotfix-capable; redirected the product from a zero-adoption UI-first design to a developer-code-first model based on instrumented usage data.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023 TO 2024

National labour-market analytics platform; integrated test automation into Jenkins, introduced Dagster and dbt for autonomous quarterly imports, migrated from bare metal to containers, and carried a full UI relaunch in parallel. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut a three-person team's roadmap to the top 10% of features; user acceptance rose more than fivefold. Implemented the CGM hospital-information-system interface personally: digital anamnesis time fell from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production, cutting time-to-market for a new insurance product from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS 2021 TO 2022

Moved research results into production across a matrix organisation inside a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE / RETAIL 2019 TO 2020

Migrated a legacy procurement webshop to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK 2017 TO 2018

WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PM · CONSTRUCTION STAFFING MARKETPLACE 2025 TO 2026

Zero-to-one two-sided B2B marketplace; anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016 TO 2021

Shipped a three-layer hardware-software product that installs in under two minutes; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013 TO 2018

Built from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
