

Philipp Hilbert. *Product Manager, live intelligence and fan analytics.*

Positioning, ten years shipping data-led SaaS products across regulated and fast-moving environments, now targeting sports and entertainment intelligence.

§ WHY THE·TEAM

THE·TEAM is building proprietary data products, audience intelligence, deal valuation, fan analytics, at the intersection of sport, entertainment, and commercial strategy. That is a genuinely hard product problem: the data is fragmented, the stakeholders are opinionated, and the value is only visible when the insight reaches a decision-maker in a usable form. The posting describes exactly the kind of multi-workstream delivery environment I have run repeatedly: several concurrent builds, design and engineering to coordinate, and internal clients who need to adopt the outputs into their daily work. Reporting into a Senior Director of Product with real accountability for delivery pace and quality is the structure I prefer. *That is the environment where focused, organised product work compounds fastest.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, pair-programming and code review
- **Cursor**, context-aware refactors across codebases
- **Lovable**, rapid front-end prototyping from spec
- **Framer**, design-heavy interface iteration
- **n8n**, agentic workflow automation
- **Gamma.app**, internal stakeholder communications
- **GPT / Claude**, user story drafting and discovery synthesis

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, MongoDB, REST APIs, Dagster, dbt, ETL pipelines, Kubernetes, Docker, ArgoCD, GitOps, CI/CD with Jenkins, Python, Kotlin (Spring Boot), Kafka, Azure DevOps, GitLab, Jira, Confluence, Matomo, MicroStrategy.

§ SIDE PROJECT

LIBERATION OF BAJOR GITHUB.COM/HILBERTP →

A self-hosted multi-agent coding framework built to replace the headhunter in a two-sided hiring marketplace.

- Orchestrates file-queue-based agent loops so a single operator can run recruitment automation end-to-end.
 - Combines LLM agents with WhatsApp and Telegram as the product surface, eliminating a dedicated ops headcount.
 - Built and maintained solo alongside two other running projects, totalling thousands of commits across the stack.
 - Demonstrates the agentic workflow design and AI governance thinking directly relevant to THE·TEAM's intelligence product suite.
-

§ HOW I WOULD WORK AT THE·TEAM

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit in every active sprint ceremony, read every spec and acceptance criterion in the current pipeline, and map where the biggest delivery friction sits, between design and engineering, between backlog and build, or between product and internal client adoption.

WEEK 2

Tighten the rhythm.

Pick the one concurrent workstream most at risk of slipping, write or rewrite its user stories to remove ambiguity, and unblock whatever dependency is holding the team, whether that is a missing data definition, an unresolved design decision, or a stakeholder sign-off.

Ship, measure, feed back.

Manage the first release end-to-end, QA, UAT, rollout, track adoption signals from internal and client users, and feed that usage data back into the prioritisation decision for the next sprint cycle.

I COVER LETTER

Dear Simon,

I have spent ten years taking data products from scoped concept to shipped release, in regulated environments where specs have to be airtight, teams are distributed, and delivery pace is the thing that determines whether the product earns its seat at the table. THE TEAM's Performance product suite, audience data, deal intelligence, valuation automation, fan analytics, is exactly the kind of multi-workstream data SaaS environment I have been building delivery rhythm in since 2017.

At the Bundesagentur für Arbeit I owned a national labour-market analytics platform: I introduced Dagster and dbt so quarterly imports ran without hand-holding, automated the QA pipeline in Jenkins, and carried a full UI relaunch through the same delivery period, all without losing pace on regular releases to policymakers and researchers. At EMIL Group I ran an 18-person delivery organisation that was bleeding senior engineers; I restructured it into three lean teams with their own leads and shipped the Claims Center from concept to production, cutting time-to-market for a new insurance product from many months to under a week. Both situations called for exactly what the posting describes: owning the backlog, writing clear specs that design and engineering can execute against without coming back to ask, coordinating dependencies across concurrent builds, and keeping stakeholders informed without being asked.

On the AI side, I work daily with Claude Code, Cursor, GitHub Copilot, and Lovable for spec generation, edge-case enumeration, and rapid prototyping. I have also built a multi-agent coding framework from scratch and run agentic workflows via n8n. I understand where AI accelerates delivery and where it introduces scope risk, and I know that a PM's judgment, stakeholder credibility, and delivery discipline are what make those tools produce results rather than noise.

The sports and entertainment domain is new to me at the professional level, but the product mechanics are familiar: structured data pipelines, commercial decision-support tools, and internal client teams who need to embed the product into their day-to-day before the value is visible. I am genuinely interested in how audience intelligence and fan analytics are reshaping commercial strategy in sport, it is a problem space with real complexity and real stakes.

The role is based in Dubai, which is a location I am actively targeting and willing to relocate to. I am available at short notice and ready to move quickly once an offer is in place.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years of end-to-end delivery across data platforms, B2B SaaS, and regulated industries. I run backlog and sprint planning across multiple concurrent workstreams, write user stories and acceptance criteria that engineering can execute against without ambiguity, and manage releases from QA through UAT to internal and client rollout. My strongest returns come in environments where data pipelines, product interfaces, and commercial stakeholders need to be aligned at the same time, which is precisely the shape of THE·TEAM's Performance product suite.

§ WHAT I CAN DO

Backlog management and sprint planning: user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence.

Data product ownership: ETL, Dagster, dbt, PostgreSQL, MicroStrategy, Matomo, KPI definition, funnel and churn analysis.

SaaS delivery: prioritisation, MVP definition, PoC, A/B testing, product lifecycle management, go-to-market support, continuous discovery.

AI products and tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI; prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Agile and scaled delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Stakeholder and leadership: cross-functional alignment, C-level reporting, workshop facilitation, conflict resolution, change management.

Technical environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024-2025

Introduced GitOps delivery with ArgoCD across a multinational team; rollout time fell from days to 30 minutes. Redirected a UI-led product to developer-code-first design after instrumentation showed the original recorded zero real usage.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · LABOUR-MARKET ANALYTICS 2023-2024

Integrated Dagster and dbt into a national analytics platform so quarterly imports ran without hand-holding; automated QA in Jenkins; carried a full UI relaunch and full containerisation in the same period. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Cut a three-person team's roadmap to its top 10% of features; user acceptance rose more than fivefold. Implemented CGM hospital-system integration, reducing digital anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE SAAS 2022-2022

Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to one departure. Shipped the Claims Center from concept to production, cutting time-to-market for a new insurance product from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND PAYMENTS 2021-2022

Moved research results into production across a matrix organisation in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · SECURE DATA PLATFORM 2021-2021

Data structures and identity management for the Robert Koch Institute's DIM and DESH programmes.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE SAAS 2019-2020

Migrated a legacy procurement system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019-2019

Full site IT modernisation end to end across two Enercon locations.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
2017-2018

WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING 2025-2026

Zero-to-one two-sided B2B marketplace; LLM agents across the funnel so one person runs day-to-day operations.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped a three-layer quantum-secure encryption product that installs in under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER CDO AND CFO · AGRITECH
2018-2021

Took a nanotechnology fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile group-based P2P payments, built from zero and taken to acquisition by Sparkasse inside the girocard ecosystem.
