

Philipp Hilbert. *Senior Product Manager, Agentic AI Assistants.*

Positioning, Product manager with 13 years shipping regulated B2B SaaS who builds agentic AI systems hands-on, evals, tool-calling, orchestration, and all.

§ WHY DEEL

Deel has built the only payroll and HR platform that genuinely operates at global scale, \$11.2 billion paid out in a single year across nearly 100 currencies is not a marketing claim, it is an infrastructure statement. The complexity that hides behind a single "Pay" button, compliance rules per jurisdiction, worker classification, benefits eligibility, contract generation, is exactly the kind of structured, high-stakes domain where agentic AI creates real leverage rather than novelty. The role sits at the intersection I find most interesting: proprietary knowledge bases turned into autonomous action, not just chatbot answers. *That is the kind of PM work where the product decision and the model architecture decision are the same decision.*

§ HONEST FRAMING

Deel's domain is global payroll, HR compliance, and benefits, I have not shipped a product in that vertical. What I do bring is a track record of getting up to speed on highly regulated, structured-knowledge domains fast: defence AI governance at Rohde & Schwarz, GDPR-critical identity data at Bundesdruckerei, clinical data flows at CLINET, insurance rule engines at EMIL Group. The mechanic, turning domain complexity into clear agent tool schemas and eval criteria, transfers directly.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo prototyping and spec generation
 - **GitHub Copilot**, day-to-day code assistance
 - **Cursor / VSCode**, LLM-assisted development environment
 - **Lovable**, rapid front-end prototype iteration
 - **n8n**, multi-agent workflow orchestration
 - **GPT**, prompt design and evaluation drafting
 - **Claude**, context engineering and agent loop design
 - **Framer**, interactive concept validation
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, Docker, ArgoCD, GitOps rollout and rollback, Jenkins CI/CD, GitLab, Azure DevOps, Dagster, dbt, Django, SQL, all in production contexts spanning defence AI platforms, national analytics infrastructure, healthcare mobile apps, and insurance SaaS.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

A two-sided B2B staffing marketplace built solo, zero to one, with LLM agents running the entire funnel.

- Matches construction firms with workers, cutting out the recruiter middleman via an anonymity-until-payment model.
- WhatsApp and Telegram as the primary product surface; LLM agents handle intake, screening, and matching so one operator runs the day-to-day.
- Funnel and conversion analysis in SQL; full agentic workflow design from discovery through close.
- Directly mirrors the Deel challenge: turning a complex, multi-party coordination problem into an agent-first product where the AI takes action rather than just answering.

§ HOW I WOULD WORK AT DEEL

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow support agents and customer-facing sessions to understand where the AI assistants break today, accuracy failures, latency pain points, tasks users abandon, and map the existing eval coverage against those real failure modes.

WEEK 2

Instrument and prioritise.

Instrument the top three failure modes with lightweight evals (accuracy, task-completion rate, latency), run them against the current stack, and bring a ranked gap list to the engineering and data science leads before the second sprint ends.

WEEK 3+

Ship, measure, redirect.

Ship a first focused improvement, tighter tool schemas, a retrieval fix, a prompt change, with the eval suite as the gate, then hold a short retrospective to decide which bet to kill and which to double.

I COVER LETTER

Dear Hiring Team,

Deel is doing something genuinely hard: turning the most compliance-dense corner of global business, cross-border payroll, worker classification, benefits, into a product experience that feels simple. The AI assistants role is the place where that ambition either becomes real or stays a demo, and that is the kind of inflection point I want to be at.

I have spent 13 years shipping product in regulated, complexity-heavy domains: a defence AI and data platform for the FCAS programme at Rohde & Schwarz, a national labour-market analytics platform at the Federal Employment Agency, clinical data integration at CLINET, an insurance SaaS at EMIL Group. In every case the challenge was the same: deeply structured domain knowledge, high stakes if something is wrong, and users who will not tolerate an answer that is merely plausible. That framing maps directly onto what a Deel AI assistant needs to be.

The hands-on piece matters to me, and I want to be direct about it. At Rohde & Schwarz I did not specify the AI platform; I prototyped agent workflows, instrumented two competing interaction patterns, and used the traces to kill the one that looked good but got zero real usage. At construct8, my construction staffing marketplace, I built the entire agentic funnel myself, LLM-driven intake, screening, and matching on WhatsApp and Telegram, with n8n orchestrating the workflow and SQL measuring where the funnel broke. I have written evals, designed tool-calling schemas, and debugged retrieval failures. I use Claude Code and Cursor daily. When you say "be hands-on with the technology", I take that to mean what I already do.

What I would bring to the Agentic AI Assistants role specifically: a habit of designing evaluation systems before writing a single line of agent code, a bias toward shipping small and measuring rather than planning large, and the cross-functional credibility, with engineers, data scientists, legal, and support, to keep a complex AI product moving without turning it into a process machine. I have restructured a failing 18-person delivery org at EMIL Group, introduced GitOps rollout at Rohde & Schwarz that cut deployment time from days to 30 minutes, and watched a beautiful UI die because I instrumented it. I make decisions from data, including decisions to kill my own ideas.

I am an EU citizen based in Berlin, available on four weeks' notice, and the fully remote structure is a natural fit. I would be glad to walk through a concrete eval design or agent architecture problem in a working session, that tends to be a faster signal than a further round of interviews.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager with 13 years of product ownership across defence AI, public-sector data platforms, insurance SaaS, healthcare, payments, and fintech. I own roadmaps end to end in regulated, technically complex environments, lead cross-functional teams through agile delivery, and build AI-native products hands-on, designing evals, orchestrating agentic workflows, and shipping LLM-powered features to production. My edge is translating deep domain complexity into precise agent tool schemas and measurable quality systems, then driving iteration until the data says the product actually works.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Agile and Scaled Delivery (SDLC): Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI planning, WIP limits.

Analytics and Data: funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, Matomo, MicroStrategy.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, UAT, Jira, Confluence, Figma, Miro.

SDLC and Delivery Practices: GitOps rollout and rollback with ArgoCD, CI/CD, regression and end-to-end test automation, containerised environments, branching and merging strategy, same-day hotfix paths.

Technical Environments Owned: Kubernetes, OpenShift, Docker, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, PostgreSQL, MongoDB, Kafka.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance and Business: GDPR (DSGVO), Deputy IT Security Officer, identity management, budget ownership and financial planning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Internal AI and data platform for FCAS. Led 15+ engineers and data scientists; GitOps rollout cut deployment from days to 30 minutes; 200% pipeline-run increase by prioritising developer-code-first over UI-led design.

**BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS
2023-2024**

National labour-market analytics SaaS for policymakers. Integrated test automation into Jenkins; introduced Dagster and dbt, cutting data-update time by 75%; migrated bare-metal to containers; delivered full UI relaunch and ETL migration. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

iOS/Android patient app. Cut roadmap to top 10% of features; user acceptance rose fivefold. Shipped CGM/KIS integration: digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022-2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production; cut new-product launch from months to under one week.

**SCHEIDT & BACHMANN · PRODUCT OWNER, INTEGRATION · RETAIL AND
PAYMENTS 2021-2022**

POS and forecourt systems. Moved research results into production in a fully SAFe setup with agile release trains and PI planning.

**BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA
2021-2021**

Secure data platform. Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

B2B procurement webshop. Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019-2019

Full site IT modernisation end to end.

**WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE INFRASTRUCTURE
2017-2018**

Wifi infrastructure rollout across nine hospitals in a clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING 2025-2026

Two-sided B2B marketplace, zero to one solo. LLM agents across the funnel; WhatsApp and Telegram as product surface; SQL funnel analysis; anonymity-until-payment model.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software. Shipped three-layer product installing in under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · NANOTECHNOLOGY 2018-2021

Nanotechnology and agriculture. Laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile group-based P2P payments platform. Built from zero to acquisition by Sparkasse inside the girocard ecosystem.
