§ BEARING

Philipp Hilbert ist Diplom-Wirtschaftsingenieur (TU Berlin) mit über zehn Jahren Erfahrung als Product Manager und Product Owner in regulierten und datenintensiven Umgebungen. Sein Schwerpunkt liegt an der Schnittstelle zwischen fachlichen Domänen und Datentechnik: ETL-Plattformen, KI-Trainingsdaten-Pipelines und datengetriebene Migrationsprojekte in komplexen Unternehmensstrukturen. Er arbeitet AI-first, führt Teams ohne Ego und verhandelt Outcomes statt Outputs.

§ WHAT I CAN DO

Data and AI platforms. Multimodal AI training data pipelines, ETL orchestration and migration, analytics platforms for public use. Kafka, Python, Kotlin, Dagster, dbt, LLM agents.

Product craft. Continuous discovery, prototype-led validation, outcome negotiation with stakeholders, backlog and release ownership, SAFe at scale (PI planning, release trains), metric definition before build.

Integration and platforms. Clinical interfaces (CGM/KIS), payment and forecourt systems, e-commerce platforms (Shopware), messaging APIs (WhatsApp, Telegram).

Cloud, delivery and operations. Bare-metal to container migration, rollout and hotfix pipelines, GitOps. Kubernetes, OpenShift, Red Hat, ArgoCD, Jenkins, Git, GitLab, Azure DevOps.

AI-first building. Claude Code, GitHub Copilot, Lovable, agent frameworks under own guardrails.

Regulated environments. Defence, public sector, health data and insurance: identity management, highest privacy requirements, audit and governance cycles.

Working tools: Jira, Confluence.
