

Philipp Hilbert. *Product Owner who closes the loop between strategy and sprint.*

Positioning, ten years of backlog ownership, cross-functional alignment, and regulated-environment delivery, now targeting Abu Dhabi on-site.

§ WHY HALIAN

Halian's requirement sits at the precise intersection I have lived for a decade: regulated, customer-facing digital products, Agile ceremonies as the actual engine of delivery, and a mandate to translate between technical teams and business stakeholders. The posting calls out health-tech and insurance as preferred domains, I hold direct experience in both, from a national health data platform at Bundesdruckerei through InsurTech low-code SaaS at EMIL Group. Abu Dhabi on-site is a location I am actively targeting, not a compromise. *That is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, continuous coding assist
- **Lovable**, full front-end prototyping
- **Framer**, design-heavy flows
- **GPT**, research, edge-case generation
- **Gamma.app**, stakeholder-ready decks from raw notes
- **Jira**, backlog and sprint management

- **Miro**, async workshop facilitation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

WhatsApp and Telegram APIs, LLM agents (construct8); Kafka, Kotlin, Python (Rohde & Schwarz defence AI); Dagster, dbt, bare-metal-to-container migration (Bundesagentur); Shopware e-commerce (AOK ITSCare); CGM/KIS clinical interface (CLINET); Kubernetes, ArgoCD, GitLab, Jenkins, Azure DevOps across multiple roles.

§ SIDE PROJECT

HILBERTP [GITHUB.COM/HILBERTP](https://github.com/HILBERTP) →

Personal infrastructure for crypto-market analysis and algorithmic trading.

- Backtesting engine for crypto markets: parameterised strategy runner over historical tick data.
- Agent framework built on file-queue loops and n8n orchestration, deployable without a cloud dependency.
- Integrates liquidation heatmap data (Coinglass, Hyblock) for signal generation.
- Demonstrates autonomous, end-to-end feature delivery, the same muscle that drives backlog-to-ship cycles in product work.

§ HOW I WOULD WORK AT HALIAN

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the sprint cycle, read existing backlog items against the stated product roadmap, and produce a gap map showing where acceptance criteria are missing, where business value is assumed rather than measured, and where stakeholder alignment is weakest.

WEEK 2

Slice and sharpen.

Run a backlog refinement session with engineering and QA to rewrite the top-ten items into user stories with testable acceptance criteria, using Miro to visualise the workflow and Jira to track the output.

WEEK 3+

Ship and measure.

Own sprint planning end-to-end, establish a lightweight KPI dashboard tracking delivery velocity and customer satisfaction signals, and close the first sprint with a review that ties completed features to business outcomes.

I COVER LETTER

Halian's Product Owner posting describes a role I have held, in substance, across ten years and six organisations: owning the backlog, running Agile ceremonies, bridging technical teams and business stakeholders, and driving delivery in regulated, customer-facing environments. That is not a stretch of my experience, it is a precise description of it.

At EMIL Group I inherited a seventeen-person team delivering an InsurTech low-code SaaS platform. Velocity was poor, ownership was diffuse, and the backlog was a wish list. I restructured the team into three focused squads with embedded leads, launched the Claims Center, and shifted prioritisation from stakeholder volume to business-value scoring. The platform lets insurers launch products in days instead of months; that outcome required exactly the backlog discipline and stakeholder negotiation the Halian posting calls out.

At Bundesdruckerei I owned two RKI projects, DIM and DESH, tracking vaccination statistics and viral-mutation data for Germany's national health authority. The environment combined the strictest identity management requirements with genuine urgency; requirements had to be airtight before a line of code was written, and every change had an audit trail. I translated epidemiological workflows into product requirements and held the line on scope under significant institutional pressure. That experience maps directly to the regulated-environment and compliance-management dimension of this role.

At Bundesagentur für Arbeit I ran a full ETL migration and UI relaunch for a public labour-market analytics platform. The work required decomposing legacy data workflows into discrete, deliverable slices, precisely the skill the posting names as breaking down complex business workflows into actionable product requirements. The platform went from inaccessible raw data to searchable, filterable, social-media-ready insights; the migration happened without a single public-facing outage.

I operate AI-first: a disputed flow becomes a clickable prototype in a day using Lovable or Framer, which compresses the discovery-to-decision cycle and keeps engineering time focused on validated work. Jira and Miro are daily tools, not credentials I list for completeness.

Abu Dhabi on-site is a location I am actively pursuing and willing to relocate to immediately. I am available on four weeks' notice.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Ten years of Product Owner and Product Manager roles across defence, public sector, health data, InsurTech, and B2B SaaS, always in regulated, multi-stakeholder environments. I own the full product lifecycle: discovery through delivery, backlog through retrospective, metric definition through outcome measurement. I translate between technical teams and business stakeholders without losing precision in either direction, and I restructure delivery structures when the underlying team model is the real constraint.

§ WHAT I CAN DO

Product craft. Continuous discovery, prototype-led validation, outcome negotiation with stakeholders, backlog and release ownership, SAFe at scale (PI planning, release trains), metric definition before build.

Regulated environments. Defence, public sector, health data and insurance: identity management, highest privacy requirements, audit and governance cycles.

Integration and platforms. Clinical interfaces (CGM/KIS), payment and forecourt systems, e-commerce platforms (Shopware), messaging APIs (WhatsApp, Telegram).

AI-first building. I own production code without writing it: Claude Code, GitHub Copilot, Lovable for full prototyping, agent frameworks under my own guardrails.

Cloud, delivery and operations. Bare-metal to container migration, rollout and hotfix pipelines, GitOps. Kubernetes, OpenShift, Red Hat, ArgoCD, Jenkins, Git, GitLab, Azure DevOps.

Data and AI platforms. Multimodal AI training data pipelines, ETL orchestration and migration, analytics platforms for public use. Kafka, Python, Kotlin, Dagster, dbt, LLM agents.

Working tools: Jira, Confluence, Miro, Figma.

§ PROFESSIONAL EXPERIENCE

CONSTRUCT8 · PRODUCT MANAGER · CONSTRUCTION MARKETPLACE, B2B SAAS 2025 TO NOW

Zero-to-one product build; AI-assisted operations; WhatsApp/Telegram APIs, LLM agents.

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM (FCAS), B2B SAAS 2024 TO 2025

Unified multimodal AI training data to one standard; rollout compressed from days to 30 minutes, fully hotfix-capable; steered product from UI-heavy to dev-code-friendly. Kafka, Kotlin, Python.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC ANALYTICS PLATFORM 2023 TO 2024

Public labour-market data made searchable, filterable, and social-media-ready; bare-metal-to-container migration; full ETL migration and UI relaunch. Dagster, dbt.

EMIL GROUP · PRODUCT MANAGER · INSURTECH LOW-CODE SAAS 2022

Insurers launch products in days, not months; Claims Center launched; 17-person team restructured into three focused squads with embedded leads.

CLINET · PRODUCT OWNER · HEALTH-TECH MOBILE APP 2021 TO 2022

Native iOS/Android; integrated the CGM/KIS clinical interface directly.

BUNDESDRUCKEREI · PRODUCT OWNER · NATIONAL HEALTH DATA PLATFORM (RKI) 2021

RKI projects DIM and DESH: vaccination statistics and viral-mutation tracking; identity management, highest privacy requirements.

SCHEIDT & BACHMANN · PRODUCT OWNER · FUEL-RETAIL INTEGRATION 2020 TO 2021

POS, payment, and forecourt systems; SAFe: PI planning and release trains.

AOK ITSCARE · PROXY PRODUCT OWNER · PROCUREMENT PLATFORM 2019 TO 2020

Full migration of a legacy webshop to a modern Shopware application for approximately 20,000 users.

ENERCON · PROJECT LEAD · IT MODERNISATION, WIND ENERGY 2019

Full site modernisation: end devices, servers, switches, lines, software.

§ FOUNDER & EARLY-STAGE EXPERIENCE

Kvitt (mobile payments, acquired by Sparkasse) · Qcrypt (encryption) · Smart Soil Technologies (nanotech)
