

Philipp Hilbert. *Senior B2B SaaS Product Manager – full lifecycle ownership.*

Positioning, ten years driving complex software products from strategy through sunset in regulated B2B environments, across InsurTech, GovTech, and defence.

§ WHY THIS COMPANY

A 160-person SaaS vendor building secure digital communication, electronic signatures, and legally compliant archiving for public-sector and regulated-industry clients is exactly the kind of environment where product complexity is real: compliance requirements shift, enterprise buyers have long decision cycles, and the product must earn trust before it earns adoption. The posting explicitly names responsibility for the full product lifecycle – from strategy through sunset – which is the scope I have operated at, not just contributed to. The combination of technical depth and structured stakeholder communication this role demands is where I spend most of my working hours. *That is precisely the environment where careful product thinking compounds.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, spec drafting, edge-case generation, stakeholder document production
- **GitHub Copilot**, in-repo review and implementation support
- **Cursor/VSCode**, assisted development and refactoring
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy concept work
- **Gamma.app**, stakeholder decks and product narrative

- **n8n**, agentic workflow automation
 - **GPT**, research synthesis and interview analysis
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kotlin (Spring Boot), Python, Django, JavaScript, PostgreSQL, MongoDB, REST APIs, Kubernetes, ArgoCD, Argo Workflows, OpenShift, Helm, Dagster, dbt, DuckDB, Jenkins, Bitbucket, Git, Redpanda, AngularJS, Ionic, MicroStrategy, CGM API integration, Shopware.

§ SIDE PROJECT

QCRYPT AG [YOUTUBE.COM/WATCH?V=NT06F71LGFE](https://www.youtube.com/watch?v=NT06F71LGFE) →

Quantum-secure encryption SaaS, co-founded and owned as Product Owner.

- Owned the product architecture for backup, restore/checkpoint, and data-encryption modules built on one-time-pad keys and true random number generator hardware.
 - Designed for non-technical end users: full setup under two minutes, zero prior cryptography knowledge required.
 - Served concurrently as deputy IT security officer, covering attack vector mitigation and compliance.
 - Direct precedent for this role: product ownership of a security-critical B2B SaaS aimed at organisations that cannot afford trust failures.
-

§ HOW I WOULD WORK AT THIS COMPANY

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Interview the product team, key account contacts, and engineering leads to map where the current roadmap reflects genuine customer signal and where it reflects internal assumptions – prioritising the compliance and archiving product lines named in the posting.

WEEK 2

Audit and sharpen.

Run a structured review of existing backlog items against customer value, regulatory fit, and strategic relevance, and produce a first-pass prioritisation rationale the Product Owner can act on immediately.

WEEK 3+

Close loops fast.

Own the next roadmap communication cycle – written artefact, stakeholder review, and any open client escalations – so the team and customers can see a consistent, reliable product voice.

I COVER LETTER

I am applying for the Senior Product Manager role at your company – placed through Experis GmbH – because the combination of secure digital communication, electronic signatures, and legally compliant archiving for public-sector clients is a product space I have navigated directly, not adjacent to.

At Rohde & Schwarz I owned a central AI and data management platform inside the European defence programme FCAS. That environment required exactly what your posting describes: translating regulatory constraints and multinational stakeholder requirements into a prioritised roadmap, managing a cross-functional team across architecture, data science, backend, frontend, and QA, and maintaining delivery credibility under high compliance scrutiny. I drove full-lifecycle feature delivery – user stories through GitOps rollout – and unblocked infrastructure problems independently that had been open with the engineering team for over a year.

At Emil Group I took over a B2B InsurTech SaaS platform in a state of delivery crisis. Client trust had eroded, a 17-person team was operating without sprint discipline, and senior developers were leaving. Within weeks I restructured the team into effective Scrum units, reintroduced velocity tracking and structured refinement, and re-established weekly product workshops with clients. I designed and shipped a Claims Center module from concept to production. The product served primary insurers, reinsurers, MGAs, brokers, and underwriters – an enterprise buyer landscape not far from your regulated-industry client base.

Earlier, as co-founding Product Owner at Qcrypt AG, I owned the architecture of a quantum-secure encryption product built on one-time-pad keys and true random number generator hardware. The USP was security at consumer simplicity – full setup under two minutes, no technical knowledge required. I also served as deputy IT security officer. That experience gave me a clear model for how to position a security product to non-technical buyers while keeping the technical substance accurate and defensible.

I cover the full scope this posting names: product strategy and value proposition, roadmap ownership, market and competitive analysis, KPI-based steering, user research and data-driven validation, business case development, and representation of the product to customers and partners. I am technically fluent enough to challenge engineers constructively and to understand what is genuinely complex versus what is organisational friction. I work closely with Product Owners without overstepping into their execution domain.

I am available within four weeks and open to discussing the engagement scope in detail.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager with nearly ten years of experience owning the full product lifecycle in regulated B2B software environments. Background spans defence AI platforms, InsurTech SaaS, public-sector analytics, mobile healthcare, and security-critical encryption products.

Consistently effective in ambiguous, high-stakes delivery contexts where requirements are incomplete and stakeholder trust must be built from first principles. Technically fluent across modern software stacks; comfortable translating between engineering, compliance, and commercial stakeholders without losing precision on either side. Low ego, high agency, strong written and verbal communicator in German and English.

§ CORE STRENGTHS

- Full product lifecycle ownership, strategy through sunset
- Regulated B2B SaaS delivery and roadmap management
- KPI-based product steering and business case development
- Cross-functional stakeholder alignment across engineering, compliance, and commercial
- Market and competitive analysis with structured prioritisation
- User research, product validation, and data-driven decision-making
- Security and compliance product ownership
- Sprint discipline, team restructuring, and delivery stability
- Technical fluency without crossing into implementation ownership

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Owned the product lifecycle for a central AI and data management platform inside the European defence programme FCAS, serving multinational stakeholders under strict compliance and auditability requirements.
- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout.
- Defined KPIs and evaluation concepts for ML training data quality, covering SafeAI and ExplainableAI transparency requirements.
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD; unblocked infrastructure-level issues in OpenShift that had been open with the engineering team for over a year.
- Led a cross-functional team across architect, data scientists, backend and frontend engineers, and QA.

FEDERAL EMPLOYMENT AGENCY (BUNDESAGENTUR FÜR ARBEIT) 2023, 2024

Product Manager, Public Data Analytics

- Advanced the Arbeitsmarktmonitor analytics platform for regional labour market and demographic data, serving public-sector stakeholders with strict data governance requirements.
- Defined and delivered new feature areas including labour shortage analytics, flexible regional comparison, and modernised admin tooling.
- Served as Deputy IT Security Officer (IT-SV) with responsibility for compliance, governance, and data lineage.
- Introduced Dagster for automated ETL and indicator generation; standardised CI/CD with full test integration at build time.
- Migrated legacy systems to Kubernetes and managed major system upgrades with no service disruption.

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Owned the product for a B2B InsurTech platform serving primary insurers, reinsurers, MGAs, brokers, and underwriters – reducing insurance product time-to-market from over one year to under one week.
- Designed and delivered a Claims Center module from concept to production rollout.

- Rebuilt delivery credibility: restructured a bloated 17-person team into effective Scrum units, reintroduced velocity tracking and structured refinement, and re-established client trust through structured weekly product workshops.
- Reduced senior developer attrition from near-total to a single departure by restoring sprint stability and ownership clarity.

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Owned the product for a mobile-first pilot app (iOS and Android) serving hospitals, covering digital anamnesis, meal and therapy plans, transport, chat, and patient document management.
 - Integrated CGM interface into hospital information system workflows; managed stakeholder expectations around legacy API constraints transparently.
-

§ FOUNDER & EARLY-STAGE EXPERIENCE

QCRYPT AG 2016, 2018

Product Owner & Deputy IT Security Officer

- Co-founded and owned the product for a quantum-secure encryption SaaS built on one-time-pad keys and true random number generator hardware; designed for non-technical buyers with setup under two minutes.
- Served as deputy IT security officer covering attack vector mitigation, compliance, and product security positioning.

KVITT PAYMENT SOLUTIONS 2013, 2018

Founder & CFO

- Founded a group-based P2P payment product on a P2P backbone; owned PSP integration, full UX/UI design, and mobile app prototype. Later acquired and operated by Sparkasse.

AOK HEALTH INSURANCE – ITSCARE 2019, 2020

Proxy Product Owner

- Led migration of internal webshop to Shopware, including complex product catalogue and API integration and configurable approval policy workflows for a regulated public-sector health insurer.
