

Philipp Hilbert. *Founding product lead who builds before he hires.*

Positioning, zero-to-one platform builder with 13 years shipping regulated products, payments, health, insurance, who writes his own code and gets to first bookings fast. ≤ 25 words.

§ WHY LONGEVIMUM

Longevium is attempting something genuinely hard: making premium longevity and diagnostics programs bookable the way a hotel room is, which means solving clinic onboarding, payment trust, and supply curation simultaneously before you have scale to negotiate with. The job description is honest about the tension, move fast with a lean setup, prove the model, then grow the team, which is precisely the sequence I have run before, most recently at construct8 where I went from zero to a live two-sided marketplace alone. The phrase "define what should be automated and what can stay manual" is the right question to be asking at this stage, and it is one I know how to answer from evidence rather than opinion. *That bias toward cheap experiments before expensive infrastructure is exactly the environment where my strengths compound.*

§ HONEST FRAMING

Longevium operates in the longevity-travel and medical-tourism vertical specifically, which I have not shipped in before. What I have shipped is the adjacent structural problem: regulated healthcare workflows at CLINET Platforms and Waldburg-Zeil, payment flows at Kvitt (acquired into the girocard ecosystem), and supplier-side onboarding on a two-sided marketplace at construct8. The operational mechanics, compliance, supplier trust, booking-to-payment loop, transfer directly even if the clinical domain is new.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo feature delivery and refactors
- **Lovable**, rapid front-end prototyping
- **GitHub Copilot**, code completion and review
- **Cursor / VSCode**, local agentic development
- **n8n**, agentic workflow automation
- **GPT**, spec drafting and edge-case generation
- **Gamma.app**, stakeholder decks
- **Framer**, design-heavy landing pages

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, PostgreSQL, MongoDB, REST APIs, Kotlin (Spring Boot), Django, SQL, Kafka, Docker, Kubernetes, ArgoCD, GitOps, CI/CD with Jenkins and GitLab, Azure DevOps, Shopware (e-commerce), Dagster, dbt, Matomo.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B staffing marketplace for the construction sector, built solo from zero to live.

- Anonymity-until-payment model protects both firm and worker until commitment is made.
- WhatsApp and Telegram as the core product surface, zero app-install friction on the supply side.
- LLM agents across the funnel so one person runs operations; funnel and conversion tracked in SQL.
- Directly relevant: the same zero-to-one marketplace dynamic Longevium needs for clinic and patient onboarding.

§ HOW I WOULD WORK AT LONGEVIMUM

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Walk every clinic and supplier flow end-to-end with real stakeholders, map the booking-to-payment loop on a whiteboard, and surface the three riskiest assumptions before writing a single line of code.

WEEK 2

Slice, validate, prototype.

Pick the single thinnest vertical slice that can prove a real booking happens, one clinic, one program, one payment, and build it in Lovable or a similar tool to get a URL in front of a real user.

WEEK 3+

Ship, measure, iterate.

Get the first bookings live on a minimal but real stack, instrument the funnel from first click to confirmed payment, and decide what to harden versus what to leave manual for the next ninety days.

I COVER LETTER

Dear Longevium team,

You are building something that does not yet exist in a clean form: a platform where a patient can find, compare, and book a longevity diagnostic program the same way they book a flight, without a phone call, without a broker, and with payment handled in the same flow. That is a genuine product problem, and the job description is honest about what it requires: someone who builds the first version themselves rather than writing specifications for a team that does not exist yet.

That description matches the work I have been doing for the past decade. At Kvitt Payment Solutions I took a mobile P2P payments product from zero to acquisition into the Sparkasse girocard ecosystem. At CLINET Platforms I led a five-person team in a hospital-piloted patient app, integrating CompuGroup Medical's KIS interface and cutting digital anamnesis time from 30 minutes to 5. At construct8, my most recent venture, I built a two-sided B2B marketplace alone, clinic-side supplier onboarding, an anonymity-until-payment model, LLM agents running the operational funnel, and got to live bookings without a team. The Longevium brief is structurally the same problem: connect supply (clinics, doctors, programs) with demand (patients), close the payment loop, and do it fast enough to learn before you spend.

On the tooling side, I work daily with Claude Code, Lovable, GitHub Copilot, and n8n for agentic workflow automation. I do not need a developer to build a working prototype; I ship it myself and use the result to have a real conversation with a clinic partner or a user rather than a hypothetical one. The Codex and Lovable experience the posting calls out as a strong advantage is part of my standard workflow.

The one gap I will name honestly: I have not shipped inside the longevity-travel vertical specifically. What I have shipped is the surrounding infrastructure, regulated health workflows, payment trust layers, supplier onboarding on a two-sided platform, and the operational discipline to know when to automate and when to leave something manual until the pattern is clear. That judgment is what makes the difference between an MVP that teaches you something and one that costs six months to unwind.

I would welcome a short call to talk through the platform's current state and where the first bottleneck sits. I am available at four weeks' notice and can work remotely or relocate.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and founder with 13 years shipping regulated digital products across payments, health, insurance, and e-commerce. Strongest in zero-to-one: I build the first version myself using AI-native tooling, validate assumptions with real users and real transactions, and grow the team only once the model is proven. Comfortable owning the full platform surface, supplier onboarding, booking flows, payments integration, analytics, without a supporting cast from day one.

§ WHAT I CAN DO

AI products and tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, Claude Code, GitHub Copilot, Cursor, Lovable, n8n, Gamma.app, Framer

Platform and marketplace: two-sided marketplace design, supplier onboarding, booking flow design, anonymity-until-payment models, B2B and B2C platform product ownership

Payments: P2P payment product design, PSP integration, girocard ecosystem, payment UX and edge-case handling

Product management: continuous discovery, MVP and PoC definition, roadmap ownership, prioritisation, A/B testing, user research, go-to-market support, product lifecycle management

Product ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity tracking, UAT, Jira, Confluence, Figma, Miro

Agile and scaled delivery: Scrum, Kanban, SAFe, ART, PI planning

Analytics and data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, SQL

e-commerce: Shopware, webshop implementation, B2B procurement flows

Technical environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Python, Kotlin, Django, REST APIs, PostgreSQL, MongoDB, Kafka

Governance: GDPR, Deputy IT Security Officer, identity management, EU AI Act

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; led 15+ engineers and data scientists on the FCAS internal AI and data platform; redirected strategy from UI-led to developer-code-first, increasing pipeline runs 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Introduced Dagster and dbt, saving 75% of time per data update; migrated bare-metal infrastructure to containers; carried full UI relaunch and ETL migration in parallel. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut roadmap to top 10% of features; user acceptance rose fivefold. Integrated CGM/KIS interface, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production; cut insurance product launch from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND
PAYMENTS POS 2021-2022

Moved research into production across a matrix organisation in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT
DATA PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE E-
COMMERCE 2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY SITE IT MODERNISATION 2019

Full-site IT modernisation end to end, Wismar and Magdeburg.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING MARKETPLACE 2025-2026

Zero to live alone: two-sided B2B marketplace, anonymity-until-payment model, WhatsApp/Telegram product surface, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped a three-layer hardware-software product that installs in under two minutes for enterprise buyers; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY AND AGRICULTURE 2018-2021

Took a fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
