

Philipp Hilbert. *Platform product manager for hospitality SaaS.*

Positioning, I build the platform layers that every other product depends on, APIs, shared services, data consistency, and I have done it in production across B2B SaaS and regulated industries.

§ WHY MAPAL

Mapal Operating System is an internal platform product: it has no direct end users to interview, so the job is almost entirely about making other product teams and engineering faster. That is the kind of work I find interesting, the ROI comes from multiplying every team that sits on top, not from a single feature. The phrase "source of truth for a global ecosystem" is precise, not marketing, and getting that right requires the same data-modeling discipline I applied to the Bundesagentur für Arbeit analytics platform. *That type of invisible infrastructure work is where I do my best thinking.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, day-to-day code assistance
- **Cursor / VSCode**, LLM-assisted development
- **Lovable**, rapid front-end prototyping
- **GPT**, research and edge-case generation
- **Gamma.app**, stakeholder presentations
- **n8n**, agentic workflow automation
- **Framer**, design-heavy prototyping

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipelines, Jira, Confluence, Azure DevOps, GitLab.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers.

- Anonymity-until-payment model protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the product surface, LLM agents running the funnel end-to-end.
 - Funnel and conversion analysis written in SQL; one person runs the full day-to-day.
 - Directly relevant: building zero-to-one with API-first design and agentic automation at the core.
-

§ HOW I WOULD WORK AT MAPAL

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Interview every product team that builds on MoS to map which shared services are painful, which APIs are being duplicated, and where data consistency breaks down today.

WEEK 2

Audit and prioritise.

Walk the existing MoS backlog with engineering, score items against adoption impact and stability risk, and produce a first draft roadmap for shared services including authentication, notifications, and integrations.

WEEK 3+

Ship and instrument.

Pick one shared service, take it through design and delivery with engineering, set up the metrics dashboard to track adoption across products, and start the loop.

I COVER LETTER

Dear Mapal team,

I have spent 13 years as a Product Manager and Product Owner in B2B SaaS and regulated industries, and a consistent thread through that work has been platform products: the shared data layers, the integration points, and the internal services that make everything else possible. The role for MoS caught my attention because it is one of the harder PM jobs, you serve other product teams rather than external users, and success is measured in multiplied velocity across the whole suite, not in a single product metric.

At Rohde & Schwarz I owned the internal AI and data platform for the FCAS programme. That meant designing the shared services and data pipelines that 15+ engineers and data scientists across multinational teams depended on daily. I moved rollout from days to 30 minutes by championing GitOps with ArgoCD, and I increased pipeline runs by 200% by redirecting the roadmap based on instrumented workflow analysis rather than assumption. The problem space is structurally the same as MoS: invisible infrastructure, high blast radius, and other teams as the primary stakeholder.

At Bundesagentur für Arbeit I owned a national labour-market analytics platform from the data layer up, ETL migrations, containerisation, CI/CD pipeline work, and a full UI relaunch running in parallel. I introduced Dagster and dbt to cut the time per data update by roughly 75%, and I migrated the system from bare metal to containers so the team owned its own environments. That kind of data consistency and interoperability work is exactly what MoS needs as Mapal scales.

I understand APIs, system architecture, and data modeling well enough to have genuine technical conversations with engineering, not just to relay requirements. I have shipped shared services, authentication patterns, integrations, notification flows, across several of these roles, so I can translate architectural needs into product goals without an intermediary.

Hospitality operations at scale is a new domain for me, and I would spend the first weeks learning how the individual Mapal products use MoS in practice before touching the roadmap. That is my standard approach: spend a little to learn before spending a lot to build.

I would be glad to talk through how my background maps to the MoS roadmap in more detail.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in B2B SaaS and regulated industries. I build platform and data products: shared services, APIs, ETL pipelines, and the internal infrastructure other teams depend on. I run continuous discovery, translate technical architecture into clear product goals, and lead cross-functional teams through agile delivery (Scrum, Kanban, SAFe).

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes for a shared AI and data platform across multinational teams.
- Redirected product strategy based on instrumented workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving roughly 75% of the time per data update.
- Migrated a bare-metal system fully into containers, giving the team autonomous control of its own environments, alongside a full UI relaunch and a large ETL migration.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows, reducing digital anamnesis from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019-12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017-06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

- Construction staffing B2B marketplace. Zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

- IT security, quantum-secure encryption. Shipped a three-layer product that installs in under two minutes. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Platform and Data: REST APIs, data modeling, ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, MongoDB, Kafka, data consistency and interoperability.

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI (program increment) planning.

Technical Environments: Kubernetes (K8s), OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, GitLab, Azure DevOps, Python, Kotlin (Spring Boot), SQL.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Analytics: KPI definition, funnel and churn analysis, Matomo, MicroStrategy.

Governance: GDPR (DSGVO), Deputy IT Security Officer, identity management, budget ownership.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
