

Philipp Hilbert. *Senior Product Owner for data platforms.*

Positioning, I turn business questions into data platform roadmaps, ship through cross-functional Agile teams, and keep the backlog anchored to outcomes rather than outputs.

§ WHY SYSMAP SOLUTIONS

SysMap is building data products that sit at the intersection of cloud infrastructure and real business decisions, exactly the kind of work where a Product Owner needs to speak both languages fluently. The posting calls out Google Cloud Platform and data integrations as core to the role, which maps directly to the ETL and data platform work I did at the Federal Employment Agency and at Rohde & Schwarz. The emphasis on discovery, stakeholder alignment across departments, and roadmap ownership reflects how I have spent most of the last four years. *That combination of technical depth and cross-functional facilitation is what I do best.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, assisted coding and review
- **Cursor**, VSCode-integrated AI pair programming
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy mockups
- **Gamma.app**, stakeholder decks and documentation
- **n8n**, agentic workflow automation
- **GPT**, discovery research and synthesis

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes (K8s), OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, MicroStrategy, Matomo.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers.

- Anonymous-until-payment model built zero to one, with WhatsApp and Telegram as the product surface.
 - LLM agents handle the funnel end-to-end so one person runs the day-to-day operation.
 - Funnel and conversion analysis in SQL; product iteration driven by drop-off data.
 - Demonstrates full-stack PM ownership, discovery, build, analytics, and continuous improvement, directly applicable to a data platform Product Owner role.
-

§ HOW I WOULD WORK AT SYSMAP

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I sit with Data Engineering, Analytics, and the business teams to map existing data flows, identify where the backlog lacks acceptance criteria, and learn which stakeholders are least aligned, before touching any priorities.

WEEK 2

Sharpen and prioritise.

I run a backlog refinement session, convert rough requirements into user stories and epics with clear acceptance criteria, and surface the top dependencies and risks to the team.

WEEK 3+

Ship and close loops.

I lead the first sprint review with business stakeholders, establish the cadence for tracking product metrics and KPIs, and start building the roadmap based on what discovery has taught me.

I COVER LETTER

Dear SysMap Solutions team,

I have spent 13 years as a Product Owner and Product Manager, and the last several years specifically inside data and analytics platforms. The Senior Product Owner, Data role at SysMap is a strong match for where my experience sits.

At the Federal Employment Agency I owned a national labour-market analytics platform built on ETL pipelines, Dagster, dbt, and PostgreSQL. I introduced automated pipeline runs so that quarterly data imports and new indicators no longer required hand-holding, cutting time per data update by close to 75%. I also carried a full ETL migration and a containerised infrastructure move through the same period, working across Data Engineering, Analytics, and the broader organisation. That is the kind of cross-functional data platform ownership your posting describes.

At Rohde & Schwarz I was Product Manager for an internal AI and data platform for the FCAS European programme. I led a cross-functional team of 15+ engineers and data scientists through Scrum, managed the backlog in Jira and Confluence, and ran discovery that redirected the product strategy: pipeline usage increased 200% after I shifted from UI-led to developer-code-first design based on workflow instrumentation. Translating business needs into clear requirements for technical teams, and then tracking the results, was the core of the job.

Your posting asks for knowledge of Data Platforms, Data Lakes, Data Warehouses, and GCP. My production experience covers ETL pipelines, Dagster, dbt, containerised data environments, and Kubernetes. GCP-specific services are the one area I would be ramping on, but the architectural thinking transfers directly and I move quickly in cloud-native environments.

I write tight user stories and epics, facilitate discovery workshops, run Scrum ceremonies, and keep stakeholders aligned across departments and seniority levels. I would be glad to bring that to the SysMap data platform team.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Owner and Product Manager with 13 years of product ownership across data platforms, public-sector analytics, defence AI, insurance, healthcare, and payments. I own the backlog, run discovery, translate business needs into user stories, epics, and acceptance criteria, and lead cross-functional Agile teams through delivery. Strong in ETL pipeline ownership, data platform product strategy, stakeholder alignment across engineering and business, and continuous improvement driven by product metrics and KPIs.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence; owned the backlog, epics, and roadmap for the internal data platform.
- Redirected product strategy based on workflow instrumentation: pipeline usage increased 200% after shifting to developer-code-first design.
- Championed GitOps delivery with ArgoCD, cutting rollout time from days to 30 minutes and making the platform hotfix-capable.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics Platform for policymakers and researchers.

- Introduced Dagster and dbt so quarterly ETL imports and new indicators ran without hand-holding, saving close to 75% of the time per data update.
- Carried a full containerisation migration and a large ETL migration through the same period, maintaining continuous delivery throughout.
- Integrated test automation into the Jenkins pipeline, freeing QA capacity each week.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CompuGroup Medical interface into hospital information system workflows, reducing digital anamnesis time from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS Platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads; attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production; cut time-to-market for new insurance products from months to under a week.

PRODUCT OWNER, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL,
MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments. POS and forecourt systems in a SAFe (Scaled Agile Framework) setup with agile release trains and PI planning.

- Moved research results into production across a matrix organisation using Scrum and Kanban within the SAFe framework.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

Government, secure data platform. Data structures and identity management for the Robert Koch Institute.

- Defined data structures and requirements for the RKI programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance. B2B procurement webshop for three AOK insurers.

- Migrated legacy system to Shopware for roughly 20,000 employees; still in production. Ran backlog refinement, user stories and acceptance criteria in Jira.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

- Two-sided B2B marketplace: anonymous-until-payment model, LLM agents across the funnel, conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

- Quantum-secure encryption product; shipped a three-layer installation in under two minutes for enterprise buyers. Later Chair of the board.

FOUNDER, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

- Mobile group-based P2P payments; built from zero to acquisition by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Data and Analytics: ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, SQL, MongoDB, Kafka, MicroStrategy, Matomo, KPI (key performance indicator) definition, funnel and churn analysis.

Product Ownership: user stories, epics, acceptance criteria, definition of done, backlog refinement, sprint planning, sprint review, retrospective, story-point estimation, velocity and burndown, release planning, UAT (user acceptance testing), Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP (minimum viable product), PoC (proof of concept), A/B testing, user research and interviews, prototyping, go-to-market support.

Agile and Scaled Delivery: Scrum, Kanban, WIP limits, SAFe (Scaled Agile Framework), ART (agile release train), PI (program increment) planning.

Technical Environments: Kubernetes (K8s), OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, Explainable AI (XAI), EU AI Act, Claude Code, GitHub Copilot, Cursor, Lovable.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance: GDPR (General Data Protection Regulation), Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
