

Philipp Hilbert. *Product Owner with 13 years in regulated industries.*

Positioning, Agile Product Owner with a decade-plus track record turning complex stakeholder needs into shipped software, now bringing that discipline to digital health.

§ WHY DENTAL21

Dental21 sits at an interesting intersection: a fast-moving startup applying digital tools to a sector that has historically resisted them. The job description calls for someone who can own the backlog end-to-end, bridge business and engineering, and think clearly about where AI adds real value in a product. That is a role I have played across healthcare, insurance, defence, and public-sector platforms. One concrete signal that caught my attention: you are actively building AI-powered products, which means the AI integration work here is not a vague future ambition but something that shows up in backlogs and sprint reviews right now. *That is the kind of product work I find most engaging.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, pair-programming support
- **Lovable**, rapid front-end prototyping
- **Cursor**, codebase-level edits
- **GPT**, user story drafts and edge-case generation
- **Gamma.app**, stakeholder presentations
- **n8n**, agentic workflow automation
- **Framer**, design-heavy prototypes

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, microservices, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Dagster, dbt, Shopware, Azure DevOps, GitLab, Jira, Confluence.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built and run solo.

- Matches construction firms with workers, removing the headhunter from the hire.
 - WhatsApp and Telegram as the product surface, LLM agents across the full funnel.
 - Anonymity-until-payment model protects both sides until commitment is made.
 - Demonstrates exactly the kind of lean, AI-assisted product execution this role calls for.
-

§ HOW I WOULD WORK AT DENTAL21

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit in on every ongoing Scrum ceremony, read the existing backlog end to end, and identify where User Stories lack acceptance criteria or where the Development, Design handoff creates rework.

WEEK 2

Groom and sharpen.

Run a focused grooming session with the team to tighten the top 20% of the backlog: rewrite ambiguous stories, add missing acceptance criteria, and surface any blockers before Sprint Planning.

WEEK 3+

Ship and close loops.

Take full ownership of Sprint Planning and Reviews, introduce a lightweight data review into each retrospective, and start driving the AI product roadmap items with the Product Lead.

I COVER LETTER

Dear Dental21 team,

I am applying for the Product Owner role at Dental21. I have 13 years of Product Owner and Product Manager experience in regulated industries, including healthcare (CLINET Platforms, Waldburg-Zeil Kliniken, AOK ITSCare), insurance, defence AI, and public-sector analytics. I know how to own a backlog, run Scrum ceremonies, and translate stakeholder input into User Stories with precise acceptance criteria.

At CLINET Platforms, I inherited a backlog a five-person team could not realistically deliver. I cut it to the top 10% of features against agreed success measures and user acceptance rose more than fivefold. At Rohde & Schwarz, I managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence while delivering an AI and data platform for the FCAS European programme. I understand how to keep Sprint Planning focused and how to identify impediments before they slow a team down.

Your posting specifically asks for experience developing and managing AI-powered products. At Rohde & Schwarz I owned an internal AI and data platform. At construct8, my current project, I run LLM agents across the product funnel so one person can operate the day-to-day. I use AI tooling daily for spec generation, user story drafting, edge-case analysis, and rapid prototyping. I can speak concretely with your development team about where AI integration adds real value and where it adds noise.

On the technical side, I have hands-on experience with APIs, microservices, containerised environments, and GitOps workflows. I have also worked as a Deputy IT Security Officer, which means I understand data governance and the constraints that come with regulated products. Both are relevant when building AI-powered tools in a healthcare context.

German is my native language and my English is C2. I can switch between both in the same sprint review without friction. I am based in Berlin, available with four weeks' notice, and happy to work hybrid or remote.

I would welcome the chance to talk through how my background fits what you are building.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Owner and Product Manager with 13 years of product ownership in healthcare, insurance, defence AI, and public-sector platforms. I run continuous discovery, turn stakeholder requirements and user feedback into User Stories with clear acceptance criteria, and lead cross-functional teams through Scrum and Kanban. I have direct experience developing AI-powered products and integrating AI into product workflows.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Spearheaded development of the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.
- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline and freed several QA hours every week; introduced Dagster and dbt so data updates ran without hand-holding, saving almost 75% of the time per update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system (KIS) workflows: digital anamnesis went from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

- Retail and payments, POS and forecourt systems. Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

- Health insurance, B2B procurement webshop. Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, User Stories and acceptance criteria in Jira.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019-12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017-06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

- Construction staffing B2B marketplace, built zero to one: anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel so one person runs day-to-day operations. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to meet enterprise adoption requirements. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

- Fintech, mobile group-based P2P payments. Built from zero to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Product Ownership: User Stories, acceptance criteria, definition of done, epics, backlog refinement (grooming), Sprint Planning, daily stand-up, sprint review, retrospective, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI planning.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); daily use of Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product roadmap, prioritisation, MVP definition, A/B testing, user research and interviews, prototyping, go-to-market support.

Analytics and Data: funnel and churn analysis, KPI definition, data-driven decision making, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL.

Technical Environments: REST APIs, microservices, Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Azure DevOps.

Governance and Business: GDPR (DSGVO), Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
