### PROFILE

Product Owner and Product Manager with 13 years of product ownership in healthcare, insurance, defence AI, and public-sector platforms. I run continuous discovery, turn stakeholder requirements and user feedback into User Stories with clear acceptance criteria, and lead cross-functional teams through Scrum and Kanban. I have direct experience developing AI-powered products and integrating AI into product workflows.

### HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

### WORK EXPERIENCE

#### Product Manager, Rohde & Schwarz, Munich / Remote | 07/2024-05/2025

*Defence and aerospace. Internal AI and data platform for the FCAS European programme.*

- Spearheaded development of the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.
- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.

#### Product Manager, Bundesagentur für Arbeit, Nuremberg / Remote | 05/2023-07/2024

*Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.*

- Integrated test automation into the Jenkins pipeline and freed several QA hours every week; introduced Dagster and dbt so data updates ran without hand-holding, saving almost 75% of the time per update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

#### Product Owner, CLINET Platforms, Berlin | 01/2023-07/2023

*Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.*

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system (KIS) workflows: digital anamnesis went from 30 minutes to 5 from form to database.

#### Product Manager, EMIL Group, Berlin | 04/2022-12/2022

*Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.*

- Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to less than a week.

#### Product Owner Integration Team, Scheidt & Bachmann Fuel & Convenience Retail, Mönchengladbach |
