

Philipp Hilbert. *Product Manager for regulated identity infrastructure.*

Positioning, I have 13 years shipping B2B products in regulated industries, and the Reusable KYB domain sits squarely in that space.

§ WHY SUMSUB

Sumsub is building the compliance layer that regulated businesses actually run on, not just a point tool. The focus on Reusable KYB, specifically bridging proven KYC mechanics into corporate identity and pioneering reliance networks, is a product problem I find interesting: the user pain is concrete, the regulatory constraints are real, and the market gap is measurable. The fact that the roadmap asks for both multi-quarter vision and daily sprint delivery is exactly the mode I work in. *That is the combination where I do my best work.*

§ HONEST FRAMING

The posting asks for familiarity with corporate identity initiatives such as GLEIF, eIDAS 2.0, and accredited reliance models. I know these from the outside in: I have read the standards and follow the space, but I have not shipped a product directly on top of them. What I do bring is deep experience shipping regulated data and identity products under GDPR and for government programmes, which is the same pattern of compliance constraint, data trust, and stakeholder scrutiny.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation

- **GitHub Copilot**, day-to-day coding assistance
 - **Cursor**, refactoring and exploration
 - **Lovable**, rapid front-end prototyping
 - **GPT**, research and document drafting
 - **Gamma.app**, stakeholder decks and briefings
 - **n8n**, agentic workflow design and automation
 - **Framer**, design-heavy prototyping
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Dagster, dbt, ETL pipelines, identity management, GDPR-constrained data products.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Two-sided B2B marketplace for construction staffing, built zero to one alone.

- Matches firms with workers directly, cutting headhunters out of the hire.
 - Anonymity-until-payment model protects both sides until commitment is made.
 - WhatsApp and Telegram as the product surface; LLM agents across the funnel so one person runs the day-to-day.
 - Demonstrates the same B2B marketplace and data thinking that applies to a corporate identity reliance network.
-

§ HOW I WOULD WORK AT SUMSUB

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I would sit in on customer calls and support tickets for Reusable KYB, map the current onboarding funnel against what Reusable KYC already does, and write down the top five friction points with evidence.

WEEK 2

Slice and prioritise.

One sprint worth of clearly scoped tickets, ranked by adoption impact, with acceptance criteria written and engineering aligned on what done looks like.

WEEK 3+

Ship and measure.

First improvement out the door, instrumentation in place, and the 90-day roadmap draft shared with the Head of Reusable Identity for feedback.

I COVER LETTER

Dear Sumsb team,

I am applying for the Product Manager (Reusable KYB) role. I have 13 years of B2B product ownership in regulated industries, insurance, public-sector analytics, defence AI, healthcare, and fintech, and the Reusable KYB domain maps closely to work I have done before.

At EMIL Group I built and shipped a claims platform from concept to production for an insurance SaaS serving brokers, underwriters and reinsurers. The core challenge was the same one Reusable KYB faces: taking a complex regulated process, understanding where business customers get stuck, and turning that into a product that actually reduces their operational load. At Bundesagentur für Arbeit I owned a national data platform as deputy IT security officer, which meant working directly with compliance constraints, data trust requirements, and multi-stakeholder sign-off, the same dynamics that govern identity and business verification products.

The technical side of the role is comfortable territory for me. I work daily with REST APIs, have shipped products on top of microservice architectures, and have owned products where tokens, webhooks, and backend data flows were central to how the product worked rather than incidental to it. I also have eight years of hands-on crypto experience, which gives me practical context for the VASP and Travel Rule dimensions of the roadmap.

What draws me specifically to this posting is the product challenge of bridging Reusable KYC mechanics into KYB. The two verification domains share structural similarities but diverge in ways that matter: entity hierarchies, beneficial ownership, document refresh cycles, and the reliance model that lets one check serve multiple counterparties. I have read enough of the GLEIF and eIDAS 2.0 landscape to know where the hard problems sit, and I want to work on them with a team that is serious about solving them at scale.

I run discovery continuously, not as a quarterly ceremony, and I measure success by adoption and customer outcome rather than features shipped. That is the standard I would hold this product to.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries, including FinTech, insurance, public-sector analytics, healthcare, and defence AI. I run continuous discovery, translate strategy and user needs into a prioritised roadmap, and lead cross-functional teams through agile delivery. I am comfortable with REST APIs, microservice architectures, and data-heavy B2B products. I have eight years of hands-on crypto experience alongside enterprise B2B SaaS delivery.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes for an AI and data platform across multinational teams, and making the platform hotfix-capable.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Spearheaded development of the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline and freed several QA hours every week, then introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, putting the team in autonomous control of its own environments, and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- A five-person team faced a roadmap it could not deliver. I cut it to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM (CompuGroup Medical) interface into hospital information system (KIS) workflows: the digital anamnesis went from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- An 18-person delivery organisation was losing its senior engineers and its client trust. I restructured it into three lean teams with their own leads: attrition fell from a near-total exodus to a single departure.

- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments. POS and forecourt systems in a fully SAFe setup.

- Moved research results into production across a matrix organisation with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

Government, secure data platform. Identity management for the Robert Koch Institute.

- Data structures and identity management for the RKI programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance. B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019 - 12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

- Construction staffing B2B marketplace: anonymity-until-payment model, LLM agents across the funnel, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

- IT security, quantum-secure encryption. Shipped a three-layer product that installs in under two minutes. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

- FinTech, mobile group-based P2P payments. Built from zero, acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, go-to-market support, product lifecycle management.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

B2B and Regulated Domains: FinTech, insurance, crypto, public sector, healthcare, defence; GDPR (DSGVO), Deputy IT Security Officer, identity management, data trust and compliance workflows.

Technical Environments Owned: REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Git.

Data and Analytics: ETL, Dagster, dbt, funnel and churn analysis, KPI definition, Matomo, MicroStrategy.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, EU AI Act; Claude Code, GitHub Copilot, Cursor, Lovable.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, WIP limits.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
