

Philipp Hilbert. *DeFi product leader with full-cycle delivery experience.*

Positioning, 13 years of product ownership, hands-on DeFi infrastructure knowledge, and a track record of shipping in complex regulated and technical environments.

§ WHY TAGUS LABS

Tagus Labs is building in Liquid Staking and Liquid Restaking, one of the few DeFi verticals where the product decisions directly affect protocol security and capital efficiency at the same time. That is a tighter constraint set than most product roles, and it demands someone who understands the mechanics, not just the market. The fact that you want a PM who can lead from ideation through launch, and work across engineering, design, and marketing in an Agile setup, matches how I have operated across every role. *That is the kind of scope where I do my best work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo feature delivery and spec generation
- **GitHub Copilot**, daily coding assistance and code review
- **Cursor**, context-aware refactoring in VSCode
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy UI iteration
- **GPT**, research, edge-case generation, and drafting
- **n8n**, agentic workflow design and automation
- **Gamma.app**, fast stakeholder decks

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, ArgoCD, Helm, Docker, GitOps rollout and rollback, Jenkins, GitLab, Azure DevOps, CI/CD pipelines, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, REST APIs, Kafka, Dagster, dbt, DuckDB, Jira, Confluence, Figma.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Two-sided B2B marketplace for construction staffing, built solo from zero.

- Anonymity-until-payment model protecting both sides of the hire until commitment.
 - WhatsApp and Telegram as the product surface, LLM agents across the full funnel.
 - Funnel and conversion analysis in SQL; one person runs day-to-day operations.
 - Proves I can take a marketplace from zero to one, relevant to any protocol-level product that needs both supply and demand to function.
-

§ HOW I WOULD WORK AT TAGUS LABS

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I sit with engineering and protocol leads to map the current Liquid Staking and Liquid Restaking product surface, where the user flows break, where the data instrumentation is missing, and where the roadmap is carrying features nobody asked for.

WEEK 2

Cut, prioritise, validate.

I take the gaps from week one and score them against user evidence and strategic bets, run the first discovery calls with power users or protocol partners, and bring a tightened backlog to the next sprint planning.

WEEK 3+

Ship, measure, repeat.

I own the release cycle end to end: acceptance criteria in Jira, gating on agreed metrics, and a post-launch review within two weeks of every feature hitting production.

I COVER LETTER

Dear Tagus Labs team,

I have followed the Liquid Staking and Liquid Restaking space closely for several years, not as a spectator but as an active participant. I trade and manage assets across Hyperliquid, Jupiter, 1inch, and Across Protocol, work with liquidation heatmaps on Coinglass and Hyblock Capital, and have spent years studying execution quality, protocol incentives, and the infrastructure that makes DeFi usable at scale. I also bring 8 years of crypto and DeFi product experience, including work on L2 protocols. When I read your job description, the overlap was hard to ignore.

What Tagus Labs is building is technically demanding. Liquid Staking and Liquid Restaking products live at the intersection of smart contract design, tokenomics, user trust, and market dynamics. Getting the product wrong here has real financial consequences for users. That demands a PM who can read the protocol docs, challenge engineering assumptions, and still translate everything into a roadmap the whole team can execute against. That is what I have done in every complex environment I have worked in, from an AI and data platform for the FCAS European defence programme, where I managed 15+ engineers and data scientists through Scrum in Jira, to a national labour-market analytics platform at the Federal Employment Agency, where I owned a full ETL migration and a UI relaunch simultaneously.

In each of those roles, I started by instrumenting what was actually happening rather than trusting assumptions. At Rohde & Schwarz, I ran two competing workflows side by side and found that the UI-led design recorded exactly zero clicks, redirecting the strategy increased pipeline runs by 200%. At CLINET Platforms, I cut a roadmap a five-person team could not deliver down to the top 10% of features: user acceptance rose more than fivefold. The pattern is the same: measure first, then decide, and keep the outcome in view rather than the output.

On the Web3 side, I actively use and analyze the product layer: DEX aggregation, cross-chain bridging, perpetual futures, and the stablecoin and custody infrastructure underneath. I build my own dev agent framework, a backtest engine for crypto markets, and trading bots. I am not interested in token prices alone, I am engaged with the systems, incentives, and operational mechanics that make digital asset markets function. That is the mindset you need to ship a Liquid Staking product that users actually trust.

I would welcome a conversation about how I can contribute to the Tagus Labs roadmap.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership, including 8 years in crypto and DeFi. I run continuous discovery, turn strategy, user needs, and technical constraints into a prioritised roadmap, and lead cross-functional teams through agile delivery (Scrum, Kanban, SAgile). My background spans DeFi infrastructure, AI and data platforms, regulated B2B SaaS, and payments.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams, and making the platform hotfix-capable.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.

- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline and introduced Dagster and dbt, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut a roadmap a five-person team could not deliver to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis went from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from a near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments. POS and forecourt systems in a fully SAFe setup with agile release trains and PI planning.

- Moved research results into production across a matrix organisation.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 -
06/2021

Government. Secure data platform. Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance. B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

Construction staffing. Two-sided B2B marketplace matching firms with workers.

- Built zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

IT security. Integrated hardware and software for quantum-secure encryption.

- Shipped a three-layer product that installs in under two minutes for enterprise buyers. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

Fintech. Mobile group-based P2P payments.

- Built from zero to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Web3 and DeFi: DeFi product management, Liquid Staking, DEX aggregation, cross-chain bridging, perpetual futures, CEX/DEX mechanics, AMMs, MEV, oracles, wallet management, crypto backtest engine, trading bots, Hyperliquid, Jupiter, 1inch, Across Protocol.

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP (minimum viable product) definition, PoC (proof of concept), A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, daily stand-up, sprint review, retrospective,

story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI planning.

Data (data): funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt, PostgreSQL, MicroStrategy, Matomo.

Technical Environments Owned: Kubernetes (K8s), ArgoCD, Docker, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
