

Philipp Hilbert. *Product Manager for regulated B2B identity infrastructure.*

Positioning, Thirteen years shipping regulated B2B products, from payments to defence AI, now focused on identity infrastructure where compliance friction is the product problem.

§ WHY SUMSUB

Sumsub is building the layer that makes compliance operationally tractable at scale, not just a verification widget but a trust infrastructure connecting KYB, KYC, fraud, and transaction monitoring. The Reusable KYB brief is specific: close the gap between KYC and KYB mechanics, then push into corporate identity wallets and reliance networks. That is a zero-to-one problem sitting on top of an existing product, which is the kind of work I do well. The mention of GLEIF and eIDAS 2.0 as directional bets also tells me Sumsub is thinking about interoperability at the standard level, not just feature parity. *That is the kind of roadmap I want to own.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and refactor work
- **GitHub Copilot**, daily coding assistant
- **Cursor/VSCode**, prototyping and review
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy work
- **GPT**, research and edge-case generation
- **n8n**, agentic workflow design
- **Gamma.app**, stakeholder decks

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, Kubernetes, Docker, ArgoCD, GitOps rollout and rollback, Jenkins CI/CD, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Dagster, dbt, Git, GitLab, Azure DevOps, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B marketplace for construction staffing, built solo from zero.

- Anonymity-until-payment model protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, with LLM agents across the funnel.
 - Funnel and conversion analysis in SQL; one person runs the full day-to-day.
 - Directly relevant: marketplace trust mechanics and identity-gated workflows map cleanly onto KYB onboarding design.
-

§ HOW I WOULD WORK AT SUMSUB

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow customer onboarding calls and support tickets to understand where KYB verification breaks down today, and map the delta between current KYC reusability mechanics and what KYB workflows actually need.

WEEK 2

Slice, prioritise, align.

Run a prioritisation session with engineering and the Reusable team to turn the gap analysis into a ranked initiative list, with measurable adoption targets tied to each slice.

WEEK 3+

Ship, measure, close loops.

Drive the first sprint cycle, instrument the key KYB adoption events, and set up the feedback cadence with B2B customers so discovery and delivery run in parallel from day one.

I COVER LETTER

Dear Sumsub team,

I have spent 13 years shipping regulated B2B products, payments, insurance platforms, defence AI data infrastructure, public-sector analytics, and the through-line in all of it is the same problem Sumsub is solving: how do you make compliance workflows fast and reliable enough that they stop blocking growth?

The Reusable KYB role is a concrete brief. You want someone to close the feature gap between KYC and KYB reusability, then build toward corporate identity wallets and reliance networks. I have done the gap-close motion before: at CLINET Platforms I inherited a bloated roadmap, cut it to the top 10% of features against agreed success criteria, and user acceptance rose more than fivefold. At EMIL Group I shipped the Claims Center from concept to production while restructuring a delivery organisation that was close to collapse. The pattern is the same, find what actually moves the metric, cut everything else, ship it.

On the technical side, I am comfortable in the REST API, webhook, and microservices layer that KYB workflows run on. At Rohde & Schwarz I owned a GitOps-based AI and data platform for the FCAS programme and drove rollout time from days to 30 minutes through ArgoCD pipelines. At the Federal Employment Agency I ran a full ETL migration from bare metal to containers while keeping a national analytics platform live. I can talk to your engineers about token architectures and webhook reliability without needing a translator.

The B2B RegTech angle is also where my crypto and fintech background adds something specific. Kvitt Payment Solutions, which I co-founded, was acquired into the Sparkasse girocard ecosystem, so I have built a regulated payment product from zero through acquisition. I follow GLEIF's LEI ecosystem and eIDAS 2.0 closely because they define where B2B digital identity is heading, and they inform how I would think about the long-term roadmap for corporate wallets and reliance networks.

What I bring to Sumsub is not a KYB specialist background, I will say that clearly. What I bring is 13 years of turning complex regulated workflows into shippable, measurable product, a track record of earning engineer trust quickly, and the drive to own a product line end to end. If you want someone who will run discovery with your B2B customers on Monday and be in sprint planning with engineering on Tuesday, I am ready.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries, including FinTech, insurance, defence AI, public-sector analytics, and healthcare. I run continuous discovery, translate strategy and customer insight into prioritised roadmaps, and lead cross-functional teams through agile delivery. Comfortable with B2B SaaS, REST APIs, and data-heavy backend environments. Fluent in English and German.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes for an AI and data platform across multinational teams, and making the platform hotfix-capable.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline and freed several QA hours per week; introduced Dagster and dbt so data updates ran without hand-holding, saving almost 75% of time per import.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut an undeliverable roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows: digital anamnesis time fell from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent; cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021-06/2021

Government, secure data platform. Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance, B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - PRESENT

Construction staffing, two-sided B2B marketplace.

- Built zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as the product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

IT security, quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes to meet enterprise buyers' constraints. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

FinTech, mobile group-based P2P payments.

- Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, go-to-market support, B2B customer validation.

Technical Environments Owned: REST APIs, Kubernetes, Docker, ArgoCD, GitOps, Jenkins CI/CD, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Dagster, dbt, Git, GitLab, Azure DevOps.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, backlog refinement, sprint planning, velocity and burndown, Jira, Confluence, Figma, Miro.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership and financial planning as CFO, ROI reasoning.

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
