

Philipp Hilbert. *Product Manager, payments and checkout.*

Positioning, Thirteen years owning products end to end in fintech, payments, insurance, and B2B SaaS, now focused on high-growth platforms where data drives the roadmap.

§ WHY DEUNA

DEUNA is solving a real problem: large enterprises running payments through a patchwork of PSPs lose money on every point of friction. ATHIA's orchestration layer, 300+ integrations, centralized reconciliation, a single API, is the kind of structural bet that actually changes unit economics rather than just moving numbers around. The checkout product role is the piece I find most interesting, because conversion lift at that layer is directly measurable and the iteration cycles are short. *That combination of clear data and direct revenue impact is where I do my best work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, pair programming on Python and SQL scripts
- **Cursor**, context-aware edits across larger codebases
- **Lovable**, rapid front-end prototyping before engineering picks it up
- **Framer**, design-heavy wireframes and interactive prototypes
- **GPT**, first-draft requirements and edge-case enumeration
- **n8n**, agentic workflow automation and multi-step integrations
- **Gamma.app**, stakeholder decks and roadmap presentations

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, SQL, PostgreSQL, REST APIs, Kafka, Kotlin (Spring Boot), Dagster, dbt, Kubernetes, Docker, ArgoCD, Jenkins, GitLab, Azure DevOps, Jira, Confluence, Matomo, MicroStrategy, Shopware.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the product surface, keeping adoption friction near zero.
 - LLM agents across the funnel so one person runs the full day-to-day operation.
 - Funnel and conversion tracking in SQL, the same analytics muscle DEUNA's checkout role needs.
-

§ HOW I WOULD WORK AT DEUNA

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit with the checkout analytics in Amplitude and map every drop-off point in the current funnel before proposing anything, the data tells me where the highest-value problems are before I talk to anyone.

WEEK 2

Slice and validate.

Take the top two or three conversion opportunities to engineers and design, size them roughly, and check which one can be A/B tested quickly enough to prove impact within the next sprint.

WEEK 3+

Ship, measure, iterate.

Push the first instrumented change to production, track the metric I defined upfront, and run the next prioritisation cycle from the results rather than from instinct.

I COVER LETTER

Dear DEUNA team,

Large enterprises running payments across dozens of PSPs are bleeding money at every integration seam. I have seen the same problem from multiple sides, as the founder of Kvitt Payment Solutions, a P2P fintech acquired by Sparkasse and brought inside the girocard ecosystem, and as a product manager at companies ranging from a B2B insurance SaaS to a federal public-sector analytics platform. DEUNA's ATHIA platform is a infrastructure play, not a feature wrapper, and that is the kind of work I want to do next.

The checkout product role matches what I actually do. I mine analytics regularly, not when a stakeholder asks. At Rohde & Schwarz I instrumented two competing workflows and let the data kill the one the team was in love with, it had recorded exactly zero clicks. At CLINET Platforms I cut a backlog to the top 10% of features against agreed success metrics and user acceptance rose more than fivefold. At the Federal Employment Agency I introduced Dagster and dbt so quarterly data imports ran without hand-holding, saving 75% of the time per update. In each case the discipline was the same: agree what success looks like before building, measure it after, and let the numbers run the next prioritisation cycle.

I can build my own analysis. I write SQL to pull data beyond what an analytics tool exposes, I work in Amplitude-style funnel and cohort views without needing someone to hand me a dashboard, and I use Python for anything that benefits from scripting. I also prototype quickly in Lovable and Framer when I need to test an idea with a client before it touches the engineering backlog.

The payments and e-commerce context is not new territory for me. Kvitt ran inside the girocard network, which means I have lived PSP integration constraints, edge-case payment flows, and the reconciliation headaches that come with them. My Shopware implementation for AOK insurance touched the procurement and checkout side of e-commerce. DEUNA's 300+ PSP integrations and the reconciliation layer are a more complex version of problems I have already worked through.

I am based in Berlin, work fully remote, and am available on four weeks' notice. I would be glad to walk through a specific checkout scenario or past analytics work in a first call.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in payments, fintech, insurance, e-commerce, and regulated B2B SaaS. I run continuous discovery, turn strategy, user needs, and technical constraints into requirements and a prioritised roadmap, and lead cross-functional teams through agile delivery (Scrum, Kanban, SAFe). Strong data orientation: I build my own funnel analysis and cohort views, write SQL to go beyond dashboard-level data, and instrument new features from day one so their impact is measurable.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. Instrumented two competing workflows; the UI-led one recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving 75% of the time per data update.
- Integrated test automation into the Jenkins pipeline and freed several QA hours per week.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the backlog to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows, reducing digital anamnesis time from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent; cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN,
MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance, B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, user stories and acceptance criteria in Jira.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019-12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017-06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL |
12/2025-06/2026

- Construction staffing B2B marketplace built solo. Anonymity-until-payment model, WhatsApp/Telegram product surface, LLM agents across the funnel, conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN |
01/2016-12/2021

- IT security, quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes to overcome enterprise procurement resistance. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN |
02/2013-11/2018

- Fintech, mobile group-based P2P payments. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN |
03/2018-08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.
-

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, sprint review, retrospective, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Analytics and Data: funnel and cohort analysis, KPI definition, SQL, PostgreSQL, Amplitude-style product analytics, Matomo, MicroStrategy, ETL, Dagster, dbt.

Fintech and Payments: P2P payment flows, PSP integration, girocard ecosystem, payment edge-case handling, e-commerce checkout, Shopware.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning, SDLC, CI/CD, GitOps, branching strategy, release gating.

Technical Environments Owned: Kubernetes, Docker, ArgoCD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, EU AI Act, Explainable AI; prototyping with Claude, GitHub Copilot, Cursor, Lovable.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning, insurance regulatory context.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
