

Philipp Hilbert. *Product Manager, brokerage back-office platforms.*

Positioning, I have 13 years shipping regulated operational platforms, payments, insurance, public-sector data, and I want to put that into the trading infrastructure problem.

§ WHY MULTIBANK GROUP

MultiBank operates across 18+ regulators, five continents, and 100 countries from a single trading ecosystem. That scale means the back-office is never a support function, it is the product, and a misconfigured account type or a broken KYC status sync has real regulatory and client-money consequences. The job description calls out MT5 lifecycle management, reconciliation, and exception handling as core work, not edge cases. That is a systems-integration problem as much as a product problem, and it is exactly the kind of problem I have been solving in regulated environments for the last thirteen years.

That combination of regulatory weight and platform complexity is where I do my best work.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, in-editor code review
- **Cursor/VSCoDe**, requirement-driven prototyping
- **Lovable**, rapid front-end prototyping
- **GPT**, research and draft synthesis
- **Gamma.app**, stakeholder deck iteration
- **Miro**, workflow and data-flow mapping

- **Jira + Confluence**, backlog and acceptance criteria
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, webhooks, PostgreSQL, MongoDB, Kafka, Python, Kotlin (Spring Boot), Django, SQL, Kubernetes, Docker, ArgoCD, GitOps, CI/CD with Jenkins, GitLab, Azure DevOps, Dagster, dbt, ETL pipelines, GDPR-compliant data flows, and identity management systems.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B staffing marketplace built and run solo from zero.

- Matches construction firms with workers; removes the headhunter from the hire with an anonymity-until-payment model.
 - WhatsApp and Telegram as the product surface, LLM agents across the funnel.
 - Funnel and conversion tracking in SQL; one operator runs the full day-to-day.
 - Proves I can own a full product lifecycle alone, relevant for a back-office role where many system dependencies connect to a single PM.
-

§ HOW I WOULD WORK AT MULTIBANK GROUP

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow Operations, Support, and Dealing to map the current MT5 account lifecycle end to end, account types, status transitions, leverage changes, KYC triggers, and identify where manual workarounds signal missing platform logic or broken integrations.

WEEK 2

Audit and slice.

Audit the existing backlog against what I learned, retire tickets that no longer reflect reality, and cut the first batch of properly specified requirements, data flows, system-of-record ownership, acceptance criteria, for the highest-pain integration gaps.

WEEK 3 +

Ship and close loops.

Run the first UAT cycle with Operations and Compliance, track defect-to-fix time as a metric, and start the first vendor conversation with the third-party platform partner backed by a clear gap list.

I COVER LETTER

Dear MultiBank Group team,

I am applying for the Product Manager role focused on back-office capabilities. My background is thirteen years of owning product in regulated environments, payments, insurance, public-sector analytics, and defence AI, where the platform is always connected to compliance obligations and operational risk. That is the same terrain MultiBank operates in, just with trading accounts and MT5 where I have previously worked with KYC pipelines, PSP integrations, and status synchronisation across multi-entity setups.

The work described in the posting is familiar: translating operational requirements into PRDs and acceptance criteria, owning integrations between systems that each believe they are the system of record, and managing a vendor relationship where you cannot always ship what you want and have to be precise about what you ask for. At EMIL Group I owned a B2B SaaS insurance platform across 18 engineers, rebuilt a broken delivery organisation, and shipped the Claims Center from concept to production. At the Federal Employment Agency I carried a full ETL migration and a UI relaunch simultaneously while maintaining a live national analytics platform. Both required the same skill this role asks for: keeping interconnected systems stable while evolving them under operational pressure.

I have worked with REST APIs, webhooks, data flows, and reconciliation patterns as first-class product concerns rather than engineering details I hand off. At Rohde & Schwarz I instrumented competing data-pipeline workflows, cut rollout time from days to 30 minutes with GitOps, and increased pipeline runs by 200% by redirecting strategy based on what the usage data actually showed. I am comfortable in a technical discovery conversation with an architect and equally comfortable translating the outcome into a workflow a compliance officer can sign off on.

Payments is a strength. Kvitt Payment Solutions, which I co-founded, was acquired and operated by Sparkasse inside the girocard ecosystem. I have designed P2P payment flows, handled edge-case and exception logic, and worked through the operational side of a regulated payment product. I also have direct experience with KYC/AML integration design and multi-entity data flow problems from the insurance platform work at EMIL Group.

I am based in Berlin and actively targeting the UAE. I am ready to relocate to Dubai and work on-site, which removes any remote-work ambiguity from this conversation. I would welcome a call to go deeper on the MT5 lifecycle and vendor management aspects of the role.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries: payments, insurance, public-sector analytics, and defence AI platforms. I translate complex operational requirements into prioritised roadmaps and clear technical specifications, own integrations between third-party and internal systems, and lead cross-functional teams through agile delivery. I am comfortable discussing REST APIs, data flows, system-of-record responsibilities, and reconciliation patterns as product concerns.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams, and making the platform hotfix-capable.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL
EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Integrated test automation into the Jenkins pipeline and freed several QA hours every week; introduced Dagster and dbt so quarterly imports ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut an undeliverable roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows: digital anamnesis dropped from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production; cut time-to-market for a new insurance product from months to less than a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021-06/2021

Government, secure data platform.

- Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance, B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, user stories, and acceptance criteria in Jira.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017-06/2018

Healthcare, clinical network.

- Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

Construction staffing, two-sided B2B marketplace.

- Built zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

IT security, quantum-secure encryption hardware and software.

- Shipped a three-layer product that installs in under two minutes against enterprise buyer requirements. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN |
02/2013 - 11/2018

Fintech, mobile group-based P2P payments.

- Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Platform and Integration: REST APIs, webhooks, system-of-record design, data flows, status synchronisation, event-driven and asynchronous processes, reconciliation, exception handling, integration failure and retry patterns, access control and permissions.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, UAT (user acceptance testing), release planning, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, A/B testing, user research, prototyping, product lifecycle management, go-to-market support.

Regulated Domains: GDPR, Deputy IT Security Officer, identity management, KYC/AML integration, Payments (girocard, P2P, PSP), insurance platforms, public-sector data platforms.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, WIP limits, CI/CD, GitOps with ArgoCD.

Analytics and Data: ETL, Dagster, dbt, PostgreSQL, MongoDB, Kafka, funnel and churn analysis, KPI definition, Matomo.

Technical Environments Owned: Kubernetes, OpenShift, Docker, Jenkins, GitLab, Azure DevOps, Python, Kotlin (Spring Boot), Django, SQL, REST APIs, Git.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable.

Governance and Business: budget ownership and financial planning as CFO, ROI reasoning, C-level reporting, stakeholder management.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
