

Philipp Hilbert. *Technical Product Manager for AI-native software products.*

Positioning, 13 years shipping regulated B2B products across insurance, defence AI, healthcare, and fintech, now targeting a platform-stage PM role.

§ WHY CNTXT AI

CNTXT AI sits at the intersection of language models and real enterprise workflows, a space where product decisions compound quickly because the underlying technology is still moving. The job description calls for someone who can run user research, write tight specs, and hold the roadmap while also working fluently with engineering: that is the exact motion I have run across six consecutive roles. The line about validating product decisions through A/B testing and feedback loops is where I spend most of my working hours. *That is the kind of product work I want to do at scale.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
- **GitHub Copilot**, assisted development and review
- **Cursor**, IDE-level AI pair programming
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy mockups
- **GPT**, discovery interviews and spec drafts
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder presentations

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD pipelines, GitLab, Azure DevOps, REST APIs, Python, Kotlin with Spring Boot, Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipeline ownership, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Two-sided B2B marketplace matching construction firms with workers, built solo from zero.

- Anonymity-until-payment model that protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the product surface, keeping onboarding friction near zero.
 - LLM agents across the funnel so one operator runs the day-to-day without headcount.
 - Funnel and conversion analysis in SQL, same instrumentation discipline a SaaS PM applies at scale.
-

§ HOW I WOULD WORK AT CNTXT AI

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the engineering and design standups, read every open ticket in Jira and every page in Confluence that touches the current roadmap, and finish the week with a written map of where requirements are clear versus where they are ambiguous or undiscovered.

WEEK 2

Run first user interviews.

Pick the three to five user segments named in the roadmap and run structured discovery sessions to confirm or challenge the current prioritisation before any sprint commitment is made.

WEEK 3+

Ship, measure, iterate.

Own the first feature end to end, user stories, acceptance criteria, sprint coordination with engineering and design, and a Scrum review with stakeholders, then close the loop with data from whatever analytics instrumentation is in place.

I COVER LETTER

Dear CNTXT AI team,

I am applying for the Product Manager role. I have 13 years of product ownership across B2B SaaS, FinTech, HealthTech, insurance, and defence AI, and I want to bring that experience to an AI-native product company where the problems are still being defined.

The description mentions driving A/B testing, user research, and feedback loops to validate product decisions. That is the core of how I work. At EMIL Group I restructured a struggling 18-person delivery organisation into three focused teams, shipped the Claims Center from concept to production, and cut the time to launch a new insurance product from months to under a week. At Bundesagentur für Arbeit I introduced Dagster and dbt into a national labour-market analytics platform and reduced data update time by 75%. Both outcomes started with discovery, understanding what was actually blocking people, before touching the backlog.

I work comfortably across the full SaaS product lifecycle: writing specifications and user stories in Jira and Confluence, running sprint ceremonies in Scrum, designing flows in Figma, and reading the data in Matomo or SQL to decide what to do next. I also write and read code, which means I can pressure-test a technical spec with engineers rather than just hand it over. At Rohde & Schwarz I instrumented two competing product workflows and used the data to redirect strategy, pipeline runs increased 200%.

CNTXT AI is building in a domain where the tooling and user expectations are changing faster than most roadmaps can track. That is a product environment I find interesting, and it is where close collaboration between PM, engineering, and design matters most. I have run that motion in regulated industries where the cost of a wrong decision is high, and I want to do it here.

I would be happy to walk through any of the projects above in more detail.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product manager and product owner with 13 years of product ownership across B2B SaaS, FinTech, HealthTech, insurance, and defence AI. I run continuous discovery, write detailed product specifications and user stories, and lead cross-functional teams through Scrum, Kanban, and SAFe delivery. I have shipped production features in regulated environments where requirements, business goals, and technical feasibility all have to be balanced at once.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams.
- Spearheaded development of the AI and data platform for the FCAS programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly imports and new indicators ran without hand-holding, saving almost 75% of time per data update.
- Integrated test automation into the Jenkins pipeline and freed several QA hours every week. Migrated a bare-metal system into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

HealthTech. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows: digital anamnesis fell from 30 minutes to 5 from form to database.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers, and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent. Cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments. POS and forecourt systems in a fully SAFe setup with agile release trains and PI planning.

- Moved research results into production across a matrix organisation.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

- Government, secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance. B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Managed backlog refinement, user stories, and acceptance criteria in Jira.

PROJECT LEAD, ENERCON, WISMAR / MAGDEBURG | 04/2019-12/2019

- Wind energy, full site IT modernisation end to end.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017-06/2018

- HealthTech, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

- Construction staffing, two-sided B2B marketplace. Zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

- IT security. Quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes. Later Chair of the board.

CO-FOUNDER, CDO AND CFO, SMART SOIL TECHNOLOGIES, BERLIN | 03/2018-08/2021

- Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds, owning financial planning and investor reporting.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

- FinTech, mobile group-based P2P payments. Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support, SaaS product delivery.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, sprint review, retrospective, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, WIP limits, SDLC.

Analytics and Data: funnel and churn analysis, KPI definition, A/B testing, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL, SQL.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable.

Technical Environments Owned: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning, stakeholder management, C-level reporting, workshop facilitation.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
