§ WHY THINKMARKETS

ThinkMarkets sits at the intersection of execution-quality trading and AI-assisted product delivery, two areas I work in daily. The job description calls out Claude and Claude Code explicitly as part of the product workflow, which matches how I already work: I use them for discovery, requirements drafting, and edge-case generation on every product cycle. The focus on FX and CFDs is a good fit because I track market microstructure on Hyperliquid, Bitget and Jupiter as a practitioner, not just as a researcher. *That hands-on market familiarity makes the product decisions less abstract and faster to ground.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo requirements and spec generation
- **Claude**, discovery, edge-case and acceptance-criteria drafting
- **GitHub Copilot**, assisted coding and code review
- **Cursor**, IDE-level LLM pair work
- **Lovable**, rapid front-end prototyping
- **Gamma.app**, stakeholder decks from structured content
- **n8n**, agentic workflow automation
- **Framer**, design-heavy prototyping

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, GitLab, Azure DevOps, REST APIs, CI/CD pipelines, Dagster, dbt, PostgreSQL, MongoDB, Kafka, Python, Kotlin with Spring Boot, Django, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built and operated solo.

- Anonymity-until-payment model protecting both sides until commitment is exchanged.
 - WhatsApp and Telegram as the product surface, with LLM agents handling funnel steps so one person runs the day-to-day.
 - Funnel and conversion tracking in SQL; full backlog, user stories, and sprint discipline maintained solo.
 - Demonstrates end-to-end ownership from zero to live, the same scope this role asks for across multiple parallel initiatives.
-

§ HOW I WOULD WORK AT THINKMARKETS

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I would sit in on sprint ceremonies, read the existing backlog top to bottom, and map the live ThinkTrader feature set against the roadmap to understand where the gaps between business intent and delivery reality actually sit.

WEEK 2

Slice and sharpen.

I would take the two or three highest-priority epics and rewrite them as properly sized user stories with clear acceptance criteria and definition of done, ready for estimation.

WEEK 3 +

Ship and close loops.

I would run backlog refinement sessions, keep the sprint on track, and start feeding AI-assisted discovery outputs, edge cases, requirement gaps, release notes, back into the documentation workflow.

I COVER LETTER

Dear ThinkMarkets team,

I am applying for the Technical Product Owner role with a focus on FX and CFDs. I have 13 years of product ownership in regulated industries, and I spend real time in the FX and crypto markets as a practitioner, working with instruments like perpetual futures, spot pairs, and cross-chain execution across Hyperliquid, Bitget, and Jupiter. That gives me a starting point for prioritisation conversations that does not require a long on-ramp.

The job description calls out Claude and Claude Code as part of the daily workflow. I use both already: I draft user stories and acceptance criteria in Claude, run in-repo spec generation through Claude Code, and use Lovable for rapid front-end prototyping before handing anything to engineering. The requirement to review and validate AI outputs is one I take seriously. At Rohde & Schwarz I managed AI and data platform delivery for the FCAS programme, where governance and auditability of outputs were non-negotiable, so I have built that validation discipline into how I work.

My backlog ownership track record spans some demanding environments. At CLINET Platforms I inherited a five-person healthcare team with a roadmap it could not deliver. I cut it to the top 10% of features against agreed success measures, and user acceptance rose more than fivefold. At EMIL Group I restructured an 18-person delivery organisation that was losing engineers, brought attrition under control, and shipped the Claims Center from concept to production. At Bundesagentur für Arbeit I carried a full ETL migration and a UI relaunch in parallel while introducing Dagster and dbt, saving close to 75% of the time per data update.

The multi-initiative scope in this role matches how I have worked for the past several years. I can hold several parallel streams in view without losing sight of the business priority behind each one, and I keep stakeholders informed through clear sprint reviews and documented decision trails rather than status-update meetings that add no value.

I would welcome the chance to talk through how my background maps to the ThinkTrader platform roadmap and the AI-assisted delivery model you are building.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Owner and product manager with 13 years of product ownership in regulated industries, including fintech, insurance, defence AI, healthcare, and public-sector analytics. I own and prioritise product backlogs, define roadmaps, write user stories and acceptance criteria, and lead cross-functional teams through Scrum and Kanban delivery. I work actively in FX and crypto markets as a practitioner and use AI tooling including Claude, Claude Code, and GitHub Copilot as a daily part of product discovery and requirements work.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
 - Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.
-

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE |
07/2024-05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Spearheaded development of the internal AI and data platform for the FCAS European programme, managing a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.
- Championed GitOps delivery with ArgoCD, reducing rollout time from days to 30 minutes and making the platform hotfix-capable across multinational teams.
- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT, NUREMBERG /
REMOTE | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly data imports and new indicators ran without hand-holding, saving almost 75% of the time per data update.
- Migrated a bare-metal system fully into containers, carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut the roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital information system workflows, reducing digital anamnesis from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads, reducing attrition from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production and cut time-to-market for new insurance products from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL &
CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021-03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN |
03/2021-06/2021

Government, secure data platform.

- Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019-05/2020

Health insurance, B2B procurement webshop.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, user stories and acceptance criteria in Jira.
-

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025-PRESENT

Construction staffing, two-sided B2B marketplace.

- Zero to one alone: anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel, conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016-12/2021

IT security, quantum-secure encryption hardware and software.

- Shipped a three-layer encryption product that installs in under two minutes to meet enterprise buyers' hard limit on installation time. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013-11/2018

Fintech, mobile group-based P2P payments.

- Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.
-

§ SKILLS

Product Ownership: user stories, acceptance criteria, epics, backlog refinement, sprint planning, definition of done, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, agile release trains, PI planning, SDLC.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, Claude, GitHub Copilot, Cursor, Lovable.

Analytics and Data: fintech data, KPI definition, funnel and churn analysis, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Technical Environments Owned: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, SQL, MongoDB, Kafka.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
