§ PROFILE

Product Owner with 13 years of product ownership in SaaS, defence AI, public-sector analytics, insurance, healthcare, and payments. I run cross-functional development teams through Scrum and Kanban, translate product decisions into buildable specifications, and challenge estimates and trade-offs with engineering leads. I started as an engineer and now use AI tools daily for planning and delivery.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
 - On a new product I spend a little to learn before spending a lot to build.
 - Outcome over output. I agree what would count as success before we build and check afterwards whether it happened.
 - I keep the whole value chain in view, not just the backlog.
