---

Dear Hiring Team,

I am applying for the Product Owner role at Halian in Abu Dhabi. Ten years of product ownership across defence, health-tech, insurtech, and public-sector SaaS programmes have given me the backlog discipline, stakeholder management skills, and regulated-environment experience the posting describes. Abu Dhabi specifically is a location I am actively pursuing, so the on-site requirement is a positive.

The job description centres on two capabilities: translating complex business workflows into actionable development tasks, and keeping cross-functional teams aligned around a prioritised backlog. Both sit at the core of what I have done across my career. At EMIL Group, I broke a sprawling 17-person team into three focused squads, each with a lead and a sharp outcome scope, and shipped the Claims Center module within the same quarter. At Rohde & Schwarz, I steered a defence AI data platform from UI-heavy to developer-code-friendly while keeping a Kafka/Kotlin/Python engineering team and a set of demanding military programme stakeholders moving together, reducing rollout time from days to thirty minutes and making the release pipeline fully hotfix-capable.

Regulated environments are explicitly listed as preferred. I have owned product at Bundesdruckerei on the RKI national health data platform (vaccination statistics, viral-mutation tracking, identity management under the highest German privacy standards) and at Bundesagentur für Arbeit on a public analytics platform requiring compliance with public-procurement and accessibility obligations. I understand that in these environments, an acceptance criterion is not a suggestion and governance sign-off is a hard dependency, not a ceremony.

On tooling: the posting names Jira, Miro, and Figma. I use all three daily, alongside Claude Code and Lovable for prototype-speed validation, a disputed flow becomes a clickable demo in a day, which shortens the stakeholder alignment cycle considerably.

I am available on four weeks' notice and willing to relocate to Abu Dhabi for the duration of the contract. I would welcome a conversation about the programme and team setup.

Best regards, *Philipp Hilbert*
