

Philipp Hilbert. *GenAI product owner who has shipped it, not just pitched it.*

Positioning, ten years of product leadership across regulated, AI-native environments, now focused on owning the GenAI backlog end-to-end at scale.

§ WHY DISCOVERED MENA

The role calls for someone who has actually shipped something GenAI-related, not written a strategy deck about it. At construct8, I run an AI-assisted operations product where LLM agents and messaging APIs (WhatsApp, Telegram) are core to the live product, not a roadmap item. Financial services adds a regulated-environment layer I know from Bundesdruckerei (national health data, identity management) and Scheidt & Bachmann (payment systems, SAFe at scale), environments where "shaky launches" carry real consequences. The MENA expansion context means stakeholder coordination across business, technology, and vendor boundaries in a high-velocity setting, precisely the coordination surface I managed at Rohde & Schwarz across defence, engineering, and data-science teams. *That is exactly the kind of accountability gap I was built to close.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo ownership without writing production code
- **GitHub Copilot**, IDE-level acceleration
- **Lovable**, full-stack prototype from a brief in a day
- **n8n**, multi-agent and agentic workflow orchestration
- **GPT**, rapid spec and edge-case generation

- **Gamma.app**, stakeholder-facing decks from structured content
 - **Framer**, design-heavy prototyping and UX validation
 - **Cursor / VSCode**, agent-assisted development environment
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

LLM agents integrated into live products (construct8), Kafka and Kotlin for multimodal AI data pipelines (Rohde & Schwarz), Python and Dagster for ETL orchestration and big data migration (Bundesagentur für Arbeit), Kubernetes, OpenShift, ArgoCD, and Jenkins for bare-metal-to-container rollout, WhatsApp and Telegram messaging APIs, Shopware for e-commerce platform migration, CGM/KIS clinical interfaces (CLINET), PostgreSQL, MongoDB, REST APIs.

§ HOW I WOULD WORK AT DISCOVERED MENA

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Interview the engineering leads, business stakeholders, and any existing vendor contacts to build an honest picture of what the GenAI backlog actually contains versus what leadership believes it contains, then write it down and circulate it.

WEEK 2

Slice, validate, prioritise.

Take the three highest-uncertainty backlog items and define the cheapest instrument, prototype, spike, or vendor demo, that resolves the risk before a sprint begins.

WEEK 3+

Ship, measure, close loops.

Stand up the first testable release with clear adoption metrics agreed in advance, track usage and performance data from day one, and run the first retrospective with the full cross-functional team.

I COVER LETTER

To the hiring team at Discovered MENA,

I am applying for the Generative AI Product Owner role. The description asks for someone who has shipped GenAI products, not just presented on them, so let me be specific about what that means in my case. At construct8, where I am currently the product manager, the core product is built on LLM agents integrated with WhatsApp and Telegram APIs. I own the backlog, I write the user stories, I coordinate with engineering, and I track adoption after launch. That is the job you are describing.

Before that, at Rohde & Schwarz, I owned a multimodal AI data platform for the FCAS defence programme, the product that converts heterogeneous sensor and training data into a single homogeneous standard for AI model training. I steered the product away from a UI-heavy architecture toward a developer-friendly one by running structured discovery with the engineering team and presenting the case to senior defence stakeholders. Rollout time dropped from days to thirty minutes. That kind of outcome-over-output discipline is what I bring to a backlog.

The financial services context matters to me because I have worked in regulated environments before. At Bundesdruckerei, I owned the national health data platform for the RKI, vaccination statistics and viral-mutation tracking, with identity management and the highest privacy requirements in German public infrastructure. At Scheidt & Bachmann, I coordinated POS, payment, and forecourt system integration inside a SAFe programme with PI planning and release trains. Regulated means slower? It means more precise. I am comfortable in that room.

On the stakeholder coordination side: the role asks for someone comfortable with execs, engineers, and vendors simultaneously. At EMIL Group, I managed a seventeen-person team, diagnosed why delivery had stalled, and split the group into three nimble cross-functional teams with independent leads. The Claims Center launched on schedule. That restructuring decision required buy-in from the CTO, the engineering leads, and the business owners at the same time. It is not a skill I list, it is a pattern I repeat.

I am actively targeting the UAE and willing to relocate. The combination of a GenAI ownership mandate, a financial services context, and a team that is clearly serious about shipping rather than positioning makes this the kind of role I want to take next.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Ten years of product leadership across regulated, AI-native, and platform environments, with a consistent pattern: take unclear mandates, resolve the largest uncertainty first, and ship things that produce measurable outcomes. Currently running a live GenAI product at construct8; previously owned AI data platform strategy at Rohde & Schwarz and national-scale data infrastructure at Bundesdruckerei. Comfortable owning the backlog, coordinating across business, engineering, and vendors, and defining success metrics before a sprint begins.

§ WHAT I CAN DO

Data and AI platforms. Multimodal AI training data pipelines, ETL orchestration and migration, LLM agents, agentic workflow design. Kafka, Python, Kotlin, Dagster, dbt.

Product craft. Continuous discovery, prototype-led validation, outcome negotiation with stakeholders, backlog and release ownership, SAFe at scale (PI planning, release trains), metric definition before build.

AI-first building. Claude Code, GitHub Copilot, Lovable for full prototyping, n8n for agent orchestration.

Cloud, delivery and operations. Bare-metal to container migration, rollout and hotfix pipelines, GitOps. Kubernetes, OpenShift, ArgoCD, Jenkins.

Integration and platforms. Payment and forecourt systems, messaging APIs (WhatsApp, Telegram), e-commerce platforms (Shopware), clinical interfaces (CGM/KIS).

Regulated environments. Defence, public sector, health data and insurance: identity management, highest privacy requirements, audit and governance cycles.

Working tools: Jira, Confluence.

§ PROFESSIONAL EXPERIENCE

CONSTRUCT8 · PRODUCT MANAGER · CONSTRUCTION MARKETPLACE, B2B SAAS 2025 TO NOW

Zero-to-one AI-assisted operations product; LLM agents and WhatsApp/Telegram APIs in production; full backlog ownership.

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM (FCAS),
B2B SAAS 2024 TO 2025

Multimodal AI data into one homogeneous training standard; rollout days to 30 min, fully hotfix-capable; product steered from UI-heavy to dev-code-friendly. Kafka, Kotlin, Python.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC ANALYTICS
PLATFORM 2023 TO 2024

Public labour-market data searchable, filterable, trend-sharp, social-media-ready; bare-metal-to-container migration, UI relaunch, big ETL migration. Dagster, dbt.

EMIL GROUP · PRODUCT MANAGER · INSURTECH LOW-CODE SAAS 2022

Insurers launch products in days; Claims Center launched; 17-person team restructured into three nimble teams with leads.

CLINET · PRODUCT OWNER · HEALTH-TECH MOBILE APP 2021 TO 2022

Native iOS/Android; integrated the CGM/KIS interface directly.

BUNDESDRUCKEREI · PRODUCT OWNER · NATIONAL HEALTH DATA
PLATFORM (RKI) 2021

RKI projects DIM and DESH: vaccination statistics, viral-mutation tracking; identity management, highest privacy requirements.

SCHEIDT & BACHMANN · PRODUCT OWNER · FUEL-RETAIL INTEGRATION
2020 TO 2021

POS, payment, and forecourt systems; SAFe: PI planning, release trains.

AOK ITSCARE · PROXY PRODUCT OWNER · PROCUREMENT PLATFORM 2019
TO 2020

Full migration of a legacy webshop to a modern Shopware application for ~20,000 users.

ENERCON · PROJECT LEAD · IT MODERNISATION, WIND ENERGY 2019

Full site modernisation: end devices, servers, switches, lines, software.

§ FOUNDER & EARLY-STAGE EXPERIENCE

Kvitt (mobile payments, acquired by Sparkasse) · Qcrypt (quantum encryption) · Smart Soil Technologies (nanotech)
