
Philipp Hilbert. *Product owner who turns complex workflows into shipped increments.*

Positioning, ten years of backlog-to-delivery ownership across regulated industries, now targeting Abu Dhabi's digital product ecosystem.

§ WHY HALIAN

Halian's posting describes exactly the pressure point I find most interesting: bridging business stakeholders and delivery teams in an environment where requirements are complex and the cost of ambiguity is high. The explicit call for experience in regulated industries, healthcare, insurance, and health-tech are all listed, matches four of my last six engagements directly, from the RKI national health data platform at Bundesdruckerei to the InsurTech low-code platform at EMIL Group. The Abu Dhabi on-site requirement is a genuine draw: I am actively targeting UAE relocation, not tolerating it. *That is precisely the environment where a decade of translating complexity into working software compounds fastest.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo ownership and spec generation
- **GitHub Copilot**, assisted development and review
- **Lovable**, full clickable prototypes from user stories
- **Framer**, design-heavy concept validation
- **n8n**, agentic workflow orchestration
- **Gamma.app**, stakeholder-ready presentation from rough notes

- **Jira**, backlog and sprint management
 - **Miro**, async workshop facilitation and flow mapping
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kafka, Kotlin, Python, Dagster, dbt, Kubernetes, ArgoCD, OpenShift, Jenkins, GitLab, Azure DevOps, PostgreSQL, MongoDB, REST APIs, WhatsApp and Telegram APIs, LLM agents, Shopware, CGM/KIS clinical interfaces, payment and forecourt systems.

§ HOW I WOULD WORK AT HALIAN

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow sprint ceremonies, interview the lead engineer, designer, and one key business stakeholder, and produce a gap-annotated backlog map that shows where acceptance criteria are missing, where priorities conflict, and where the definition of done is ambiguous.

WEEK 2

Sharpen and slice.

Run a structured backlog refinement session using the gap map, converting the top-priority items into properly sized user stories with measurable acceptance criteria and a clear rationale for their position in the queue.

WEEK 3+

Ship and measure.

Own the sprint review narrative, introduce a lightweight KPI dashboard tracking the metrics the posting names, customer satisfaction, feature impact, delivery cadence, and close the first improvement loop with concrete data.

I COVER LETTER

Dear Hiring Team,

I am applying for the Product Owner role at Halian in Abu Dhabi. I am an EU citizen relocating to the UAE: Abu Dhabi on-site, five days a week, is not a concession, it is the posting characteristic that made me apply first.

The role description names the exact failure modes I have spent ten years fixing. Backlog that is not well-prioritized, requirements that arrive as decrees rather than outcomes, engineering and business stakeholders operating with fundamentally different mental models of what is being built. At EMIL Group I inherited a seventeen-person team producing too little too slowly and split it into three focused teams with dedicated leads, delivery velocity and team ownership both improved measurably. At Bundesdruckerei I owned the RKI national health data platform under Germany's highest privacy and identity management requirements, coordinating across compliance, engineering, and public-sector governance simultaneously. At Scheidt & Bachmann I operated inside SAFe at scale, running PI planning and release trains across multiple teams and keeping forecourt payment integrations aligned across a complex stakeholder landscape.

The posting's preference for healthcare, health-tech, or insurance experience is a direct match. Four of my six most recent roles sit in those industries: Bundesdruckerei's RKI vaccination and viral-mutation tracking platform, CLINET's native iOS/Android health app where I integrated the CGM/KIS clinical interface myself, EMIL Group's low-code InsurTech SaaS, and AOK ITSCare's procurement platform serving approximately 20,000 users. I understand what makes regulated environments different, not just the audit cycles and compliance gates, but the stakeholder dynamics that come with them, where a change that is technically trivial can be politically complex.

I work AI-first in practice, not in slides. A disputed flow becomes a clickable Lovable prototype the same day; I do not write production code, I own it end-to-end. That means my discovery cycles are faster and my handoffs to engineering are more precise, user stories arrive with acceptance criteria stress-tested against edge cases I generated with LLM assistance before the story was ever written. I use Jira, Miro, and Figma daily and have been doing so for years.

I would welcome the opportunity to discuss the role in more detail. I am available for a call at short notice and can relocate within four weeks of an offer.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Ten years of product ownership across regulated B2B and public-sector environments, defence, national health infrastructure, InsurTech, fuel-retail, and public labour-market analytics. I am brought in when the backlog is a mess, the stakeholders are misaligned, and nobody can say whether the last quarter's work moved the needle. My operating mode is discovery-first, prototype-fast, and metric-before-build; I own the outcome, not just the output.

§ WHAT I CAN DO

Product craft. Continuous discovery, prototype-led validation, outcome negotiation with stakeholders, backlog and release ownership, SAFe at scale (PI planning, release trains), metric definition before build.

Regulated environments. Defence, public sector, health data and insurance: identity management, highest privacy requirements, audit and governance cycles.

Integration and platforms. Clinical interfaces (CGM/KIS), payment and forecourt systems, e-commerce platforms (Shopware), messaging APIs (WhatsApp, Telegram).

AI-first building. I own production code without writing it: Claude Code, GitHub Copilot, Lovable for full prototyping, agent frameworks under my own guardrails.

Data and AI platforms. Multimodal AI training data pipelines, ETL orchestration and migration, analytics platforms for public use. Kafka, Python, Kotlin, Dagster, dbt, LLM agents.

Cloud, delivery and operations. Bare-metal to container migration, rollout and hotfix pipelines, GitOps. Kubernetes, OpenShift, ArgoCD, Jenkins, GitLab, Azure DevOps.

Working tools: Jira, Confluence, Miro, Figma.

§ PROFESSIONAL EXPERIENCE

CONSTRUCT8 · PRODUCT MANAGER · CONSTRUCTION MARKETPLACE, B2B SAAS 2025 TO NOW

Zero-to-one build; AI-assisted operations with WhatsApp/Telegram APIs and LLM agents.

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM (FCAS), B2B SAAS 2024 TO 2025

Multimodal AI training data unified into one homogeneous standard; rollout time cut from days to 30 minutes, fully hotfix-capable; product steered from UI-heavy to dev-code-friendly. Kafka, Kotlin, Python.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC ANALYTICS
PLATFORM 2023 TO 2024

Public labour-market data made searchable, filterable, and social-media-ready; bare-metal-to-container migration and full UI relaunch. Dagster, dbt.

EMIL GROUP · PRODUCT MANAGER · INSURTECH LOW-CODE SAAS 2022

Insurers launched products in days instead of months; Claims Center shipped; 17-person team restructured into three focused teams with leads.

CLINET · PRODUCT OWNER · HEALTH-TECH MOBILE APP 2021 TO 2022

Native iOS/Android app; CGM/KIS clinical interface integrated directly.

BUNDESDRUCKEREI · PRODUCT OWNER · NATIONAL HEALTH DATA
PLATFORM (RKI) 2021

RKI projects DIM and DESH: vaccination statistics and viral-mutation tracking under Germany's highest identity management and privacy requirements.

SCHEIDT & BACHMANN · PRODUCT OWNER · FUEL-RETAIL INTEGRATION
2020 TO 2021

POS, payment, and forecourt systems; SAFe at scale: PI planning and release trains.

AOK ITSCARE · PROXY PRODUCT OWNER · PROCUREMENT PLATFORM 2019
TO 2020

Full legacy webshop migration to Shopware for approximately 20,000 users.

ENERCON · PROJECT LEAD · IT MODERNISATION, WIND ENERGY 2019

Full site modernisation: end devices, servers, switches, lines, and software.

§ FOUNDER & EARLY-STAGE EXPERIENCE

Kvitt (mobile payments, acquired by Sparkasse) · Qcrypt (encryption) · Smart Soil Technologies (nanotech)
