§ BEARING

Ten years of product ownership across regulated B2B and public-sector environments, defence, national health infrastructure, InsurTech, fuel-retail, and public labour-market analytics. I am brought in when the backlog is a mess, the stakeholders are misaligned, and nobody can say whether the last quarter's work moved the needle. My operating mode is discovery-first, prototype-fast, and metric-before-build; I own the outcome, not just the output.

§ WHAT I CAN DO

Product craft. Continuous discovery, prototype-led validation, outcome negotiation with stakeholders, backlog and release ownership, SAFe at scale (PI planning, release trains), metric definition before build.

Regulated environments. Defence, public sector, health data and insurance: identity management, highest privacy requirements, audit and governance cycles.

Integration and platforms. Clinical interfaces (CGM/KIS), payment and forecourt systems, e-commerce platforms (Shopware), messaging APIs (WhatsApp, Telegram).

AI-first building. I own production code without writing it: Claude Code, GitHub Copilot, Lovable for full prototyping, agent frameworks under my own guardrails.

Data and AI platforms. Multimodal AI training data pipelines, ETL orchestration and migration, analytics platforms for public use. Kafka, Python, Kotlin, Dagster, dbt, LLM agents.

Cloud, delivery and operations. Bare-metal to container migration, rollout and hotfix pipelines, GitOps. Kubernetes, OpenShift, ArgoCD, Jenkins, GitLab, Azure DevOps.

Working tools: Jira, Confluence, Miro, Figma.
