

Philipp Hilbert. *First PM hire, data-integration products.*

Positioning, 13 years shipping SaaS products from zero teaches you what to cut first, and Windsor's 300-integration pressure is exactly the problem I have solved before.

§ WHY WINDSOR.AI

Windsor connects 300+ marketing data sources to 30+ destinations for 6,000+ customers, and the hardest product problem at that scale is not adding the 301st integration, it is deciding what earns the next sprint. The posting is explicit: you need someone who says no more than yes and can defend the cut list with data. I have done that under similar pressure at the Bundesagentur für Arbeit, where I reduced a sprawling ETL backlog to the changes that actually mattered and cut data-update time by 75%. The async, distributed-Europe setup matches how I have worked for the last four years. *That is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, daily pair programming
- **Cursor/VSCode**, context-aware editing
- **Lovable**, rapid front-end prototyping
- **GPT**, research and edge-case generation
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder decks
- **Framer**, design-heavy prototypes

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, Python, REST APIs, Dagster, dbt, ETL pipelines, Kafka, Docker, Kubernetes, ArgoCD, Jenkins, GitLab, Azure DevOps, MongoDB, Kotlin/Spring Boot, Django, SQL, Matomo, MicroStrategy, all used in production, not listed for decoration.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace, zero to one, solo.

- Anonymity-until-payment model protecting both sides before commitment, with WhatsApp and Telegram as the product surface.
 - LLM agents across the full funnel so one operator runs day-to-day matching without headcount.
 - Funnel and conversion analysis written directly in SQL, no analyst in the loop.
 - Proves the zero-to-one and async-first muscle Windsor is hiring for.
-

§ HOW I WOULD WORK AT WINDSOR.AI

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Interview the five most vocal customers and the two engineers who field integration requests most often, then map where the 300+ connectors sit on a value-versus-maintenance-cost matrix.

WEEK 2

Cut the list.

Draft the first version of a kill/keep/build framework, walk engineering through it, and stress-test the assumptions on the connectors that generate the most support noise.

WEEK 3+

Ship one decision.

Pick the single highest-signal item surfaced by week two, deprecation, consolidation, or new feature, and carry it from spec to staging so the product function has a shipped output, not just a roadmap slide.

I COVER LETTER

Dear Windsor.ai team,

Windsor's core promise is simple to state and hard to execute: marketing data from 300+ sources, delivered clean to 30+ destinations, for 6,000+ customers who cannot afford pipeline failures. The product challenge that interests me is not the integration count, it is the prioritisation discipline required to keep that system trustworthy when every customer and sales call arrives with a new "just one more" request. You described it exactly right in the posting: the job is cutting the list down, not growing it blindly.

I have spent 13 years shipping SaaS products in environments where the backlog pressure was real and the engineering capacity was finite. At the Bundesagentur für Arbeit I owned a national labour-market analytics platform: I cut the data-update pipeline from a hand-held quarterly process to an automated Dagster and dbt flow, saving 75% of update time, and I did it by being willing to say no to the features that looked useful but would not survive the next data-structure change. At CLINET Platforms I inherited a roadmap a five-person team could not deliver; I reduced it to the top 10% of features against agreed success measures, and user acceptance rose more than fivefold. These are not process anecdotes, they are the same decision muscle Windsor needs on its integration backlog.

The data integration and ETL domain is not new territory for me. I have owned ETL pipelines, modelled data with dbt, run Dagster orchestrations, and worked directly in PostgreSQL for funnel and retention analysis without routing requests through an analyst. I understand what an API integration costs to maintain over time, and I have enough engineering fluency, Kubernetes, Docker, CI/CD, GitOps, to give estimates that engineers do not have to correct at standup.

Windsor is also the first PM hire, which means building the function, not inheriting one. I have done that twice: at Qcrypt AG I owned product from nothing through enterprise sales cycles, and at construct8 I built a two-sided marketplace solo from zero using LLM agents across the funnel. I know what the first ninety days look like when there is no roadmap to plug into, and I know that the first deliverable is a prioritisation framework the team trusts, not a Confluence page nobody reads.

The async, distributed-Europe way of working is how I have operated for four years. I do not need daily standups to stay unblocked, and I do not mistake activity for progress.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years of product ownership in SaaS, data platforms, insurance, healthcare, and fintech. I cut backlogs rather than grow them, pull my own data to make decisions, and work close enough to engineering to know the difference between a week of work and a quarter. I have built product functions from scratch twice and shipped at every stage from zero-to-one to scaled-agile release trains.

§ WHAT I CAN DO

Analytics and Data: funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, Matomo, MicroStrategy, SQL

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro

Technical Environments: Kubernetes, Docker, GitOps/ArgoCD, CI/CD, Jenkins, REST APIs, Python, PostgreSQL, MongoDB, Kafka, Kotlin/Spring Boot

Agile and Scaled Delivery: Scrum, Kanban, SAgile, ART, PI planning

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI/DATA PLATFORM 2024-2025

GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; redirected strategy from UI-first to developer-code-first after instrumented workflow analysis raised pipeline runs 200%; led 15+ engineers and data scientists through Scrum across multinational teams.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Introduced Dagster and dbt to automate quarterly ETL imports, saving 75% of update time per cycle; migrated bare-metal to containers; carried full UI relaunch and large ETL migration concurrently. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Cut an undeliverable roadmap to the top 10% of features; user acceptance rose fivefold. Implemented CGM/KIS interface reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022-2022

Restructured 18-person delivery org into three lean teams; attrition dropped from near-total to one departure. Shipped Claims Center from concept to production; cut new-product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND PAYMENTS 2021-2022

Moved research results to production across a matrix org in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA PLATFORM 2021-2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B SAAS 2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and 20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B MARKETPLACE 2025-PRESENT

Zero-to-one two-sided staffing marketplace: anonymity-until-payment model, WhatsApp/Telegram product surface, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY SAAS 2016-2021

Quantum-secure encryption product shipping in under two minutes install time; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013-2018

Built mobile group P2P payment product from zero to acquisition by Sparkasse inside the girocard ecosystem.
