

Philipp Hilbert. *Senior Product Manager, GRC SaaS.*

Positioning, product manager with 13 years in regulated B2B SaaS who turns discovery, data, and cross-functional alignment into shipped outcomes at pace.

§ WHY SAI360

SAI360 sits at the intersection of compliance, learning, and risk, a domain where the quality of the product directly shapes whether organizations behave with integrity. The posting's emphasis on empowered teams that own outcomes rather than outputs, and on using AI tooling for rapid prototyping and hypothesis testing, matches exactly how I have worked for the past several years. The fact that the platform integrates GRC software with Ethics & Compliance Learning resources means there is genuine complexity to map and prioritize, not just feature factories.

That is precisely the kind of multi-stakeholder, high-stakes product environment where careful discovery and fast, validated iteration produce real leverage.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
- **Lovable**, rapid low- and high-fidelity prototyping
- **GitHub Copilot**, assisted implementation and review
- **Cursor / VSCode**, code-level product exploration
- **Framer**, design-heavy concept prototypes
- **Gamma.app**, stakeholder decks and product narratives
- **GPT**, research synthesis and discovery prep
- **n8n**, agentic workflow automation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, ArgoCD, Docker, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Dagster, dbt, SQL, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built and operated solo.

- Anonymity-until-payment model protecting both sides until mutual commitment is made.
 - WhatsApp and Telegram as the primary product surface, reducing onboarding friction to zero.
 - LLM agents across the full funnel so one operator runs day-to-day matching and follow-up.
 - Proves end-to-end product ownership under constraint, zero budget, zero team, relevant for SAI360's expectation of autonomous, outcome-driven PMs.
-

§ HOW I WOULD WORK AT SAI360

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow client-facing meetings and internal sprint ceremonies, map the existing discovery pipeline and backlog against stated company objectives, and identify where the biggest gaps between customer-reported pain and current roadmap priorities sit.

WEEK 2

Slice and validate.

Pick one underspecified roadmap initiative, run a structured discovery session with a real client, and produce a one-pager opportunity assessment using RICE or WSJF to either sharpen the brief or surface a sharper alternative.

Ship and close loops.

Own the go-to-market coordination for the next release: align Product Marketing, Sales, and Customer Success on messaging, prepare demo paths and internal enablement materials, and instrument the feature with usage metrics that let the team judge whether the outcome was actually achieved.

I COVER LETTER

Dear SAI360 Hiring Team,

I am writing to apply for the Senior Product Manager role at SAI360. With 13 years of product ownership in regulated B2B SaaS environments, spanning insurance, public-sector analytics, healthcare, and defence AI, I have spent my career doing exactly what the posting describes: combining continuous discovery with empowered cross-functional teams to deliver outcomes that are valuable, viable, feasible, and usable.

Your description of the role resonated with me because it is not asking for a feature-writer or a project coordinator. It asks for someone who can own product strategy, run real client discovery, lead go-to-market coordination, and drive prioritization with data-backed rigor. At EMIL Group I restructured an 18-person delivery organization into three lean, accountable teams after it was losing senior engineers and client trust; attrition dropped from near-total to a single departure, and I shipped the Claims Center from concept to production in the same period. At Bundesagentur für Arbeit I owned a national labour-market analytics platform, integrated Dagster and dbt to reduce data update effort by roughly 75%, and served concurrently as Deputy IT Security Officer, a combination that gave me a clear picture of how compliance and data governance constraints shape product decisions at the platform level.

The GRC and Ethics & Compliance domain is one I can engage with seriously. Risk-first product discovery, framing every initiative against value, usability, feasibility, and business viability risk before committing engineering capacity, is not a technique I apply occasionally; it is the mental model I default to. I have worked in environments where the cost of a wrong decision is measured in regulatory exposure or patient safety, and that context sharpens prioritization in ways that standard feature-velocity metrics do not.

On the AI tooling dimension: the posting calls out rapid prototyping through AI as a core expectation, not a nice-to-have. I use Claude Code, Lovable, GitHub Copilot, and Cursor daily, not as productivity shortcuts, but as a way to compress the feedback loop between a hypothesis and a testable artifact. At Rohde & Schwarz I redirected an entire platform strategy based on instrumenting two competing workflows; the AI-native working style means I can do that kind of rapid validation without waiting for a design sprint to be scheduled.

I am based in Berlin, fluent in both German and English, and already accustomed to global virtual teams spanning the US, Europe, and India. I would welcome the opportunity to discuss how my background maps to SAI360's current product priorities.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years of product ownership in regulated B2B SaaS, insurance, public-sector analytics, healthcare, and defence AI. I run continuous discovery, translate strategy and customer needs into a prioritised roadmap, and lead cross-functional agile teams from problem framing to measurable outcome. My operating model is outcome over output: I agree success criteria before building, instrument what ships, and adjust based on data rather than opinion.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision and roadmap, prioritisation (RICE, MoSCoW, WSJF), MVP definition, PoC, A/B testing, user research and interviews, prototyping, go-to-market support, SaaS product lifecycle management

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, UAT, Jira, Confluence, Figma, Miro

AI Products and Tooling: LLM agents, agentic workflow design, prompt engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning, GitOps rollout with ArgoCD, CI/CD, release gating, defect-to-fix as a product metric

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management

Governance and Business: GDPR/DSGVO, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning

Technical Environments: Kubernetes, ArgoCD, Docker, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, SQL, PostgreSQL, MongoDB, Kafka

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI / DATA PLATFORM 2024-2025

GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; redirected platform strategy based on workflow instrumentation, growing pipeline runs 200%; led 15+ engineers and data scientists through Scrum on the FCAS AI and data platform.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Introduced Dagster and dbt, reducing data update effort by ~75%; containerised a bare-metal system and carried a full UI relaunch and ETL migration in parallel; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Cut an undeliverable roadmap to the top 10% of features by agreed success measures: user acceptance rose fivefold; integrated CGM/KIS hospital interface, reducing anamnesis time from 30 to 5 minutes.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total to one departure; shipped Claims Center from concept to production; cut new-product time-to-market from months to under one week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS / POS 2021-2022

Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE DATA / IDENTITY 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE / B2B SAAS 2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; backlog refinement and user stories in Jira.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals in a clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PRODUCT MANAGER · CONSTRUCTION
STAFFING 2025-PRESENT

Zero-to-one B2B marketplace; anonymity-until-payment model; LLM agents across the funnel;
one operator running day-to-day.

QCRYPT AG · CO-FOUNDER & PRODUCT OWNER · IT SECURITY /
ENCRYPTION 2016-2021

Quantum-secure encryption hardware and software; shipped a three-layer install that completes
in under two minutes for enterprise buyers; later Chair of the Board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO & CFO · AGRITECH
2018-2021

Took a nanotechnology fertiliser product from laboratory to investor rounds; owned financial
planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · FINTECH / P2P PAYMENTS
2013-2018

Built mobile group-based P2P payments from zero to acquisition by Sparkasse inside the
girocard ecosystem.
