

Philipp Hilbert. *Senior Product Manager, Platform & Customer Lifecycle.*

Positioning, Platform PM with 13 years of B2B SaaS experience turning complex operational systems into coherent, scalable product experiences across regulated industries.

§ WHY DATADOME

DataDome sits at an inflection point: the original bot-detection problem has expanded into agent trust management, and the platform that serves enterprise customers like Etsy and PayPal now has to carry a fundamentally different category of traffic. The shift from "block bots" to "trust the intent of every session" requires a platform team that can unify identity, integrate cleanly with MCP and agent surfaces, and make a technically dense product feel simple to onboard. What attracted me most is the explicit tension in the job description between near-term customer time-to-value and long-term platform leverage, that is the exact trade-off I have navigated at every stage of my career, from shipping a Claims Center at EMIL Group to running GitOps rollout automation for FCAS at Rohde & Schwarz. *That is precisely the environment where deliberate platform investment pays off fastest.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, continuous coding assistance
- **Cursor**, context-aware editor for exploratory work
- **Lovable**, rapid front-end prototyping

- **GPT**, research, structured drafting, edge-case generation
 - **n8n**, agentic workflow automation
 - **Gamma.app**, stakeholder presentations and product narratives
 - **Framer**, design-heavy prototypes and landing pages
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Production work spans Kubernetes, OpenShift, ArgoCD, Docker, Jenkins, GitLab, Azure DevOps, CI/CD pipelines, REST APIs, Python, Kotlin with Spring Boot, Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, GitOps rollout and rollback. Identity and data work includes RBAC structures, GDPR-compliant data handling, ETL pipeline product ownership, and LLM agent integration into operational workflows.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built and operated solo.

- Anonymity-until-payment model protects both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface; LLM agents run the funnel end-to-end.
 - Funnel and conversion analysis instrumented in SQL; one operator runs day-to-day with no support staff.
 - Demonstrates the zero-to-one platform thinking and AI-native automation this role requires at DataDome scale.
-

§ HOW I WOULD WORK AT DATADOME

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow customer onboarding calls, read every support ticket and dashboard interaction trace from the last quarter, and map the end-to-end customer lifecycle against the current platform capabilities to locate where friction and manual work concentrate.

WEEK 2

Slice and prioritise.

Run structured discovery sessions with Engineering, Revenue Operations, and the 24/7 SOC team to validate the gap map, then cut a first-draft roadmap ranked by time-to-value impact against onboarding speed, self-service expansion, and provisioning reliability.

WEEK 3+

Ship, measure, close loops.

Deliver the first scoped improvement, likely an onboarding or configuration workflow, with agreed success metrics in place before build starts, instrument the outcome, and establish the cadence that keeps platform, customer experience, and operational automation moving in parallel.

I COVER LETTER

Dear DataDome team,

I am applying for the Senior Product Manager role focused on the DataDome platform and customer lifecycle. Your expanded mission, managing not just bot traffic but the intent of every session from human visitors to AI agents, is exactly the kind of inflection point that produces the most interesting platform problems, and the description of this role maps closely to work I have done repeatedly across B2B SaaS, data platforms, and regulated infrastructure.

The core challenge you have described is one I recognise: a product that has grown from a focused security tool into a full traffic control plane now needs a platform layer that makes it coherent for customers to adopt, configure, and expand without white-glove support at every step. At EMIL Group I inherited an 18-person delivery organisation losing senior engineers and client trust simultaneously. I restructured it into three focused teams, shipped the Claims Center from zero to production, and cut new insurance product launch time from months to under a week, all while the platform's underlying architecture was being stabilised. The throughline was the same discipline this role requires: clear trade-offs between near-term customer value and long-term platform investment, aligned across Product, Engineering, and Revenue teams.

At Rohde & Schwarz I owned an internal AI and data platform for the FCAS programme, multi-team, multinational, technically deep. I used instrumented workflow analysis to redirect the roadmap away from a UI-first approach that recorded zero real usage and toward developer-code-first flows that tripled pipeline utilisation. At Bundesagentur für Arbeit I introduced Dagster and dbt to eliminate manual data-update cycles, saving 75% of the time per release, and migrated the full system from bare-metal to containers so the team owned its own environments. Both cases involved the same fundamentals DataDome needs: shared

foundations that reduce manual work, improve reliability, and let the product team move faster rather than slower as the system grows.

Your specific mention of identity, authentication, SSO, RBAC, and developer-facing APIs including MCP and agent access is well-matched to my background. At Qcrypt AG I owned the product architecture for quantum-secure encryption across hardware and software, including the installation model that brought enterprise setup time under two minutes. At Bundesdruckerei I shaped data structures and identity management for Robert Koch Institute programmes. I am fluent in the operational mechanics of entitlements, provisioning, and the security constraints that enterprise SaaS customers require, and I have shipped in environments where those constraints were non-negotiable.

I work best in exactly the kind of environment DataDome describes: technically demanding, cross-functional, outcome-driven, with real ambiguity about what the right next platform investment is. I bring 13 years of product ownership, deep fluency across data, infrastructure, and AI tooling, and a track record of shipping in regulated, high-stakes contexts where reliability and trust are the product. I would welcome the conversation with your Chief Product Officer and the product case discussion.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager with 13 years of product ownership in B2B SaaS, data platforms, and regulated infrastructure. Career-long focus on platform coherence: shared foundations, identity and access management, API and integration design, and the operational workflows that make enterprise software scale without proportional support overhead. Known for redirecting roadmaps based on instrumented evidence, shipping through ambiguity, and aligning technical and business stakeholders around clear outcomes.

§ WHAT I CAN DO

Platform & API Product Management: platform vision and roadmap, shared foundations, REST APIs, identity management, SSO, RBAC, authentication, developer-facing capabilities, MCP and agent access, integrations, data ingress and egress

B2B SaaS & Lifecycle: onboarding, product-led growth, self-service expansion, provisioning, entitlements, metering, billing, customer lifecycle workflows, time-to-value reduction

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable

Data Platform Ownership: ETL, Dagster, dbt, PostgreSQL, funnel and churn analysis, KPI definition, Matomo, MicroStrategy, DuckDB

Agile and Scaled Delivery: Scrum, Kanban, SAgile, ART, PI planning, Jira, Confluence, CI/CD, GitOps with ArgoCD

Technical Environments: Kubernetes, OpenShift, Docker, Jenkins, GitLab, Azure DevOps, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, REST APIs

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Led cross-functional team of 15+ engineers and data scientists for the FCAS European programme AI and Data platform. Introduced GitOps with ArgoCD, cutting rollout from days to 30 minutes; redirected roadmap from UI-led to developer-code-first based on instrumented workflow analysis, increasing pipeline runs by 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Deputy IT Security Officer. Introduced Dagster and dbt, saving 75% of time per data update; integrated test automation into Jenkins pipeline; migrated bare-metal system fully into containers.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut a five-person team's overloaded roadmap to the top 10% of features; user acceptance rose fivefold. Integrated CGM KIS interface, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022

Restructured 18-person delivery org into three lean teams; attrition dropped from near-total exodus to one departure. Shipped Claims Center from concept to production; cut new product launch time from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS POS 2021-2022

Moved research results into production in a fully SAFe environment with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT SECURE DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B SAAS 2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-PRESENT

Zero-to-one two-sided B2B marketplace. Anonymity-until-payment model, WhatsApp/Telegram product surface, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER & PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Shipped three-layer encryption product with sub-two-minute enterprise installation. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO & CFO · NANOTECHNOLOGY & AGRICULTURE 2018-2021

Laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · FINTECH P2P PAYMENTS
2013-2018

Mobile group-based P2P payment product built from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
