

Philipp Hilbert. *Product Lead, B2B Commerce & AI-Native Procurement.*

Positioning, Product leader with 13 years of product ownership who turns complex B2B workflows into scalable platform architecture and measurable customer outcomes.

§ WHY NOON

noon is not building a B2B marketplace with a chatbot bolted on, it is reimagining procurement as an agent-driven workflow from intent to execution, at the scale of an entire region. The Noon Procurement Agent represents the kind of 0-to-1 architecture problem I find genuinely hard: aligning AI agents with enterprise trust requirements, approval chains, and credit/invoicing workflows that do not forgive errors. The specific combination of RFQs, bulk pricing, and agentic discovery in a single platform is a complexity density I have dealt with in parts, procurement webshops, B2B SaaS for insurers, payment flows, but never assembled at this scale. *That is exactly the environment where the thinking compounds.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo feature delivery and spec generation
- **GitHub Copilot**, daily coding assist and review
- **Cursor / VSCode**, agentic refactors and codebase navigation
- **Lovable**, rapid front-end prototyping and validation
- **n8n**, multi-agent orchestration and agentic workflow design
- **GPT**, requirements drafting and edge-case generation
- **Gamma.app**, stakeholder decks and discovery synthesis
- **Framer**, design-heavy prototyping

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD pipelines, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipelines, SQL, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built zero-to-one.

- Anonymity-until-payment model that protects both sides until commitment is made.
 - WhatsApp and Telegram as the primary product surface; LLM agents across the acquisition funnel.
 - One operator running day-to-day through agentic automation; funnel and conversion analysis in SQL.
 - Direct precedent for agentic B2B commerce: trust mechanics, payment gates, and agent-assisted discovery in a two-sided market, the same pattern noon's Procurement Agent requires.
-

§ HOW I WOULD WORK AT NOON

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the current B2B buyer journeys, RFQ flows, enterprise account checkout, approval chains, and map where the handoff between human and agent breaks trust or creates latency.

WEEK 2

Instrument, then prioritise.

Define the success metrics for each AI use case against real procurement outcomes, identify which guardrails and human-in-the-loop checkpoints are non-negotiable, and produce a ranked opportunity list the engineering team can act on.

WEEK 3+

Ship, measure, close loops.

Drive the first scoped agent capability to production, instrument it against the agreed metrics, and run the post-launch measurement cycle that distinguishes shipping from delivering.

I COVER LETTER

Dear noon Talent Team,

I am applying for the Product Lead 1 role on Noon B2B. I have spent 13 years owning product in environments where the complexity is real and the tolerance for vague requirements is zero, defence AI platforms, national public-sector analytics infrastructure, B2B SaaS for insurers, and a two-sided B2B marketplace I built from scratch in construction. The thread connecting all of them is the same challenge noon is facing: translate an ambiguous business problem into a product architecture that engineering can execute and customers will trust.

The Noon Procurement Agent is a genuinely hard product problem. Building an AI-native procurement platform is not a matter of adding a search bar and a recommendation engine. It requires designing trust at every layer: which decisions the agent makes autonomously, which ones require a human approval, where credit and invoicing create failure scenarios that an agent must handle gracefully, and how you evaluate whether the agent's recommendations are actually improving procurement outcomes. I have designed human-in-the-loop mechanisms for AI governance in a regulated defence context (FCAS programme, Rohde & Schwarz) and shipped agentic workflows in my own marketplace. That combination of enterprise trust design and hands-on agent delivery is not common in PM profiles, and it maps directly to what the Noon Procurement Agent needs.

On the execution side, I know what rigorous PRDs look like. At Bundesagentur für Arbeit I owned a national analytics platform where a missed edge case in an ETL migration meant wrong labour-market statistics in front of policymakers. At CLINET I cut a five-person team's roadmap to the top 10% of features by agreeing success measures first and measuring against them, user acceptance rose fivefold. At EMIL Group I restructured an 18-person delivery organisation that was bleeding senior engineers and client trust. These are not portfolio talking points; they are the kind of structural interventions that a Product Lead needs to make, and I have made them under pressure.

I am also genuinely AI-native rather than AI-adjacent. I use Claude Code, GitHub Copilot, and n8n daily for product work, prototyping, requirements generation, agentic orchestration, and I stay current on LLM evaluation, retrieval, latency and cost trade-offs, and the emerging agentic-commerce patterns that will define what noon's B2B platform looks like in two years. I do not

need to be convinced that agents will reshape procurement; I am building in that direction already.

Noon's mission to redefine what technology does in the Middle East is specific enough to be credible and ambitious enough to be worth the effort. I am relocating-ready for Dubai and available at short notice.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager and Product Owner with 13 years of product ownership across B2B SaaS, AI and data platforms, public-sector analytics, payments, and e-commerce. I translate ambiguous business problems into rigorous requirements engineering and a prioritised roadmap, lead cross-functional teams through Scrum and SAFe delivery, and own outcomes beyond the ticket queue. For the Product Lead 1 role at noon, I bring demonstrated 0-to-1 platform building, hands-on AI product execution, and B2B commerce depth across procurement, payments, and marketplace dynamics.

§ WHAT I CAN DO

B2B Platform and Commerce: B2B marketplace design, procurement workflows, RFQ and approval-chain product ownership, payments, e-commerce, Shopware webshop implementation, two-sided market mechanics, unit economics, go-to-market support.

AI Products and human-in-the-loop design: LLM agents, agentic workflow design, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Requirements Engineering: user stories, acceptance criteria, definition of done, PRDs, edge-case definition, backlog refinement, dependency and failure-scenario mapping, UAT.

Product Management: continuous discovery, product vision and roadmap, MVP and PoC definition, A/B testing, user research and interviews, prioritisation, product lifecycle management.

Analytics and data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, SQL.

Agile and scaled delivery: Scrum, Kanban, SAFe, agile release trains, PI planning, WIP limits, velocity and burndown, release planning, CI/CD.

Stakeholder and leadership: C-level reporting, cross-functional team leadership, workshop facilitation, conflict resolution, PM coaching and team development.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Internal AI and data platform for the FCAS European programme; 15+ engineers and data scientists. Championed GitOps delivery with ArgoCD, cutting rollout time from days to 30 minutes; redirected strategy on user-workflow data, increasing pipeline runs 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics platform; Deputy IT Security Officer. Integrated test automation, introduced Dagster and dbt saving 75% of time per data update, and carried a full ETL migration and UI relaunch in parallel.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut a five-person roadmap to the top 10% of features against agreed success measures: user acceptance rose fivefold. Implemented CGM/KIS interface, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022

Restructured an 18-person delivery organisation into three lean teams; attrition dropped from near-total exodus to one departure. Shipped the Claims Center from concept to production; cut new-product launch time from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS AND POS 2021-2022

Retail and payments, POS and forecourt systems. Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · B2B PROCUREMENT WEBSHOP
2019-2020

Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, user stories and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end across two wind-energy sites.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B CONSTRUCTION
MARKETPLACE 2025-2026

Zero to one alone: two-sided B2B marketplace, anonymity-until-payment model, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped a three-layer product installing in under two minutes for enterprise buyers; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRITECH
2018-2021

Nanotechnology fertiliser from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.

§ LANGUAGES

German, native. English, C2.
