

Philipp Hilbert. *Senior Product Manager, Search, Discovery & Personalization.*

Positioning, ten years shipping customer-facing products in fast-moving, data-intensive environments, ready to own the full search and discovery CX for Amazon Now MENAT.

§ WHY AMAZON

Amazon Now is building quick commerce in one of the world's fastest-growing consumer markets, and the search and discovery surface is the product, it is where intent meets inventory in under two minutes. The posting names a concrete gap: own search relevance, ranking, and personalization end-to-end, including UX decisions made without waiting for a designer. That combination of customer obsession, data-driven experimentation, and AI-accelerated execution is exactly how I have operated for the past several years. *That is exactly the environment where my strengths compound.*

§ HONEST FRAMING

The posting requires hands-on experience deploying AI products at scale in a quick-commerce context specifically. My AI product delivery has been in defence data platforms and B2B SaaS rather than consumer quick commerce. The transferable mechanic is strong: I have designed and shipped AI-driven workflows, run A/B experiments, and owned full product metrics cycles end-to-end, the domain is new, the operating model is not.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, pair-programming across story drafting and PRDs
- **Cursor / VSCode**, prototype iteration
- **Lovable**, rapid front-end mockup and UX validation
- **GPT**, research synthesis and PRFAQ drafting
- **Framer**, design-heavy interaction prototypes
- **n8n**, agentic workflow orchestration
- **Gamma.app**, stakeholder-ready decks from raw briefs

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, ArgoCD, GitOps rollout and rollback, Docker, OpenShift, Jenkins CI/CD, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, Azure DevOps, GitLab, Jira, Confluence, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B construction staffing marketplace, built zero-to-one as a solo founder.

- Matches construction firms with workers directly, removing the headhunter from the hire with an anonymity-until-payment model that protects both sides.
- WhatsApp and Telegram as the product surface; LLM agents handle qualification, scheduling, and follow-up across the funnel.
- Funnel and conversion analysis in SQL, run by one operator.
- Demonstrates full-stack product thinking, discovery, UX, agentic automation, and unit economics, the same disciplines the A-Now role demands at scale.

§ HOW I WOULD WORK AT AMAZON

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Instrument the current search and discovery funnel, shadow customer sessions in MENAT, and map the delta between where clicks go and where the ranking logic sends them.

WEEK 2

Diagnose, slice, rank.

Translate the gap analysis into a prioritised opportunity backlog, score each against CX impact and experiment feasibility, and align the science and engineering leads on the first two bets.

WEEK 3+

Ship, measure, loop.

Launch the first experiment, instrument it against agreed guardrail metrics, read results, and immediately cycle into the next slice, no ceremony, just data and decisions.

I COVER LETTER

Dear Amazon Now Hiring Team,

Quick commerce lives or dies on discovery. If a customer types "sparkling water" and your search returns still water with a promoted placement and three out-of-stock items, the session is over. The MENAT market is growing faster than the tooling that serves it, and Amazon Now is at exactly the moment when owning search relevance, ranking, and personalization end-to-end becomes a compounding advantage rather than a hygiene factor. That is the problem I want to work on.

I have spent ten years shipping products in environments where the cost of a wrong decision is visible in a number the next morning. At Rohde & Schwarz, I owned an AI and data platform for the FCAS defence programme: I instrumented two competing developer workflows, found that the beautiful UI-led design had recorded exactly zero clicks, and redirected the entire roadmap. Pipeline runs increased 200%. At the Bundesagentur für Arbeit, I migrated a national labour-market analytics platform from bare metal to containers, rebuilt the ETL layer with Dagster and dbt, and cut data-update time by 75%, all while carrying a full UI relaunch in parallel. Both roles required writing clear requirements, driving cross-functional alignment with engineering and data science teams, and making decisions with data rather than consensus.

The AI-native execution requirement in this role is not aspirational for me, it is current practice. I draft PRFAQs and edge-case matrices with Claude and GPT, prototype UX flows in Lovable and Framer before a designer is in the room, and build agentic pipelines in n8n to automate the research and synthesis work that typically queues up a team for days. At construct8, my

construction staffing marketplace, LLM agents handle the entire top-of-funnel qualification loop; one person runs what would otherwise require a small operations team. I bring that same acceleration instinct to search and personalization: faster spec cycles, faster experiment designs, faster read-outs.

Amazon's experimentation culture is the specific capability I most want to operate inside. I have run A/B tests and instrumented competing workflows before, but I have not had access to the scale and rigour of Amazon's experimentation framework. I am honest about that. What I bring is the discipline to design an experiment so that the result is unambiguous, the speed to move from signal to decision without waiting for a meeting, and the stakeholder management to get engineering and science aligned on the interpretation rather than the politics.

I am based in Berlin, hold EU citizenship, and am actively targeting the UAE, I am ready to relocate to the MENAT region on short notice. I would be glad to discuss the role further at your convenience.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager with 13 years of product ownership across regulated and high-stakes environments, now focused on AI-driven consumer product execution. I own roadmaps end-to-end, run continuous discovery, instrument competing workflows to make data the deciding voice, and use AI tooling daily to compress the distance between insight and shipped code. Direct enough to cut a roadmap to the top 10% of value; structured enough to carry a cross-functional team of 15 through a multinational programme.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt (data build tool), PostgreSQL.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART, PI planning.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Technical Environments Owned: Kubernetes, ArgoCD, GitOps, Docker, OpenShift, Jenkins, CI/CD, Git, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA 2024-2025

GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; redirected roadmap after A/B instrumentation showed the UI-led workflow had zero adoption, lifting pipeline runs 200%; led 15+ engineers and data scientists through Scrum across the FCAS programme.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Cut data-update time 75% with Dagster and dbt; migrated bare-metal to full container environment; carried concurrent UI relaunch and ETL migration; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Cut roadmap to top 10% of features; user acceptance rose fivefold. Implemented CGM/KIS interface, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022-2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production; cut new-product launch from months to under one week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS 2021-2022

Moved research results to production in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA
2021-2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019-2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL
NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PRODUCT MANAGER · CONSTRUCTION
STAFFING 2025-PRESENT

Zero-to-one B2B two-sided marketplace; anonymity-until-payment model; LLM agents across the funnel; funnel and conversion analysis in SQL.

QCRYPT AG · CO-FOUNDER & PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped three-layer product with sub-two-minute install time; enterprise security hardware and software; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO & CFO ·
NANOTECHNOLOGY 2018-2021

Laboratory to investor rounds; financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · FINTECH P2P PAYMENTS
2013-2018

Built from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
