

Philipp Hilbert. *Analytics platform PM with a data engineering backbone.*

Positioning, B2B SaaS product manager with 13 years of end-to-end ownership, bringing hands-on data platform and analytics delivery to CelebriOS's mid-market build.

§ WHY CELEBRIOS

CelebriOS is doing the work that matters in B2B analytics: building tools mid-market teams can actually use day-to-day rather than enterprise software that sits underused after procurement. The job description's emphasis on defining success criteria before launch and evaluating results after release signals a team that takes evidence seriously, not just shipping velocity. The combination of customer discovery ownership and tight engineering partnership is exactly the PM shape I default to. *That is precisely the environment where deliberate product practice compounds into durable customer value.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, pair-coding with engineering
- **Cursor / VSCode**, LLM-assisted requirements drafting
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy explorations
- **Dagster**, data pipeline product ownership
- **Jira / Confluence**, backlog and documentation
- **Miro**, discovery workshops and journey mapping

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD (GitOps), Jenkins, CI/CD pipelines, Dagster, dbt, PostgreSQL, MongoDB, REST APIs, Python, Kotlin (Spring Boot), Kafka, Azure DevOps, GitLab, Matomo, MicroStrategy.

§ SIDE PROJECT

PHOENIX882 / LIBERATION OF BAJOR [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A self-built trading-strategy backtesting engine and multi-agent coding framework, operated solo.

- phoenix882.com runs strategy backtests over historical market data with configurable parameters.
 - Liberation of Bajor is a file-queue-based multi-agent framework orchestrating LLM coding loops without a managed runtime.
 - Both built and operated solo, combining Python, agentic workflow design, and GitOps discipline.
 - Demonstrates end-to-end technical ownership, the same muscle needed to evaluate engineering trade-offs on a data-intensive analytics platform.
-

§ HOW I WOULD WORK AT CELEBRIOS

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow customer success calls, read the analytics platform's open tickets and NPS verbatims, and map the current user journey against the posted roadmap to find where evidence and prioritisation decisions diverge.

WEEK 2

Instrument, hypothesise, slice.

Define the two or three measurable outcomes that matter most for the product area I own, draft the first discovery interview guide, and slice the backlog so the next sprint has a clear success criterion attached to every item.

WEEK 3+

Ship, evaluate, iterate.

Carry the first meaningful feature from signed-off requirements through release, run a post-launch evaluation against the pre-defined metrics, and feed results back into the roadmap before the next planning cycle.

I COVER LETTER

Dear CelebriOS hiring team,

I am writing about the Product Manager role for your mid-market analytics platform. My interest is direct: I have spent the better part of a decade owning analytics and data platform products in B2B environments, and the work you describe, discovery through launch, tight engineering partnership, evidence-based prioritisation, is the model I default to rather than aspire to.

At the Bundesagentur für Arbeit I owned the national labour-market analytics platform used by policymakers and researchers. I instrumented the data pipeline, introduced Dagster and dbt so quarterly indicator imports ran without hand-holding, and migrated the system from bare metal into containers, all while carrying a full UI relaunch and serving as Deputy IT Security Officer. At Rohde & Schwarz I inherited an AI data platform where rollout took days and could not carry a hotfix; I introduced GitOps delivery with ArgoCD and brought rollout time to 30 minutes. Both engagements required me to define what success looked like before investing engineering effort, and to redirect the product when the data said otherwise, including, at Rohde & Schwarz, killing a UI-led design that recorded zero real clicks in favour of a developer-code-first approach that people actually used.

Your posting asks for someone who can say no when evidence does not support an idea. I have done this consistently: at CLINET Platforms I cut a three-person team's roadmap to the top 10% of features, and user acceptance rose more than fivefold. At EMIL Group I restructured an 18-person delivery organisation into three lean teams after diagnosing that sprawl, not effort, was the root cause of attrition and missed trust with clients. Prioritisation and trade-off communication are not skills I practise on the side; they are the core of how I run a product area.

On the analytics and data dimension specifically: I have owned ETL pipeline design, KPI definition, and funnel analysis as product artefacts, not as adjacent activities handed off to data engineers. This means I can have a genuine conversation with your data team about what is feasible, and a genuine conversation with your mid-market customers about what is useful, without needing a translator in either direction.

I would welcome the chance to discuss the role and the specific product area in more detail.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager with 13 years of end-to-end ownership in B2B SaaS, public-sector analytics, insurance, and regulated data platforms. I run continuous discovery, translate customer and market signals into a prioritised roadmap, and stay embedded in engineering and design through delivery rather than treating handoff as the end of the job. My data platform background, Dagster, dbt, ETL pipeline ownership, KPI definition, means I bring technical credibility to analytics product work without losing sight of what customers are actually trying to accomplish.

§ WHAT I CAN DO

Analytics and Data: funnel and churn analysis, KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Technical Environments Owned: Kubernetes, OpenShift, Docker, ArgoCD, Jenkins, CI/CD, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, EU AI Act; prototyping with Claude, GitHub Copilot, Cursor, Lovable.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024 TO 2025

Owned the internal AI and data platform for the FCAS European programme. Cut rollout time from days to 30 minutes via GitOps with ArgoCD; redirected product design to developer-code-first after instrumented user research showed zero engagement with the UI-led alternative.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023 TO 2024

Owned national labour-market analytics platform. Introduced Dagster and dbt to automate quarterly imports; migrated bare-metal system to containers; carried full UI relaunch; served as Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut a three-person team's roadmap to the top 10% of features; user acceptance rose more than fivefold. Implemented the CGM/KIS interface directly, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022

Restructured an 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production, reducing new insurance product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL & PAYMENTS POS 2021 TO 2022

Moved research results into production in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · SECURE GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · B2B PROCUREMENT WEBSHOP 2019 TO 2020

Migrated legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · SITE IT MODERNISATION 2019

Full end-to-end IT modernisation of a wind energy site.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK 2017
TO 2018

WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B CONSTRUCTION
STAFFING MARKETPLACE 2025 TO 2026

Zero to one: anonymity-until-payment two-sided marketplace with LLM agents across the
funnel, WhatsApp and Telegram as the product surface, operated solo.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016 TO 2021

Shipped a three-layer security product with sub-two-minute installation. Later Chair of the
board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · MOBILE P2P PAYMENTS
2013 TO 2018

Built from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
