
Philipp Hilbert. *AI product leader who ships, not just strategises.*

Positioning, Thirteen years delivering complex digital products across defence AI, public-sector analytics, insurance, and fintech, now applying that discipline to AI-native enterprise and government products in the UAE.

§ WHY HALIAN / THIS ORGANISATION

The combination of enterprise and government clients operating under a mandate to turn ambiguous challenges into demonstrable AI products in rapid cycles is exactly the environment my career has been calibrated for. The emphasis on stakeholder trust, particularly with executive and government audiences, maps directly to the work I did at Bundesagentur für Arbeit and Rohde & Schwarz, where I ran workshops, redirected products based on real usage data, and reported to senior civil servants and defence stakeholders. The explicit appetite for AI agents, automation, and LLMs as first-class product primitives rather than add-ons is notable, because most enterprise PM roles still treat AI as a feature layer rather than the architecture. *That difference in mindset is where I want to spend the next chapter.*

§ HONEST FRAMING

I have not previously held a role with a smart-cities or IoT product title, though the infrastructure and government-platform work at Bundesagentur für Arbeit and the secure data platform at Bundesdruckerei touched adjacent territory. The mechanic I am genuinely strong in, mapping complex operational workflows, making build-vs-integrate trade-offs, and managing the distance between a government stakeholder's stated need and the deliverable they will actually use, transfers cleanly.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo requirements and spec generation
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy stakeholder demos
- **Cursor / VSCode**, LLM-assisted implementation review
- **GitHub Copilot**, pair-programming with engineering teams
- **n8n**, multi-agent agentic workflow orchestration
- **Gamma.app**, executive and client presentation drafts
- **GPT**, edge-case and acceptance-criteria generation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, ArgoCD, Helm, Docker, GitOps, Jenkins, CI/CD, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, Azure DevOps, GitLab, Jira, Figma, Miro, Matomo, MicroStrategy.

§ SIDE PROJECT

LIBERATION OF [BAJOR GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A self-built multi-agent coding framework for autonomous development workflows.

- Orchestrates multiple LLM agents across a file-queue-based loop with handoff and error-recovery logic.
- Architecture: stateless agents communicating via structured file queues, with a supervisor layer for routing and retries.
- Used as the execution backbone for building and iterating the construct8 marketplace solo.
- Directly relevant to this role's mandate to identify where AI agents create tangible business value.

§ HOW I WOULD WORK AT THIS ORGANISATION

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the delivery teams and sit in on at least one client or government workshop to understand where the gap between stated requirements and actual product expectations currently lives.

WEEK 2

Map, slice, validate.

Take one in-flight initiative and produce a revised PRD with explicit assumptions surfaced, run a short working session with engineering and design to stress-test feasibility before the next sprint starts.

WEEK 3+

Ship, unblock, close.

Own the backlog prioritisation for at least one product track, drive the first internal demo, and establish a lightweight feedback loop from end-users or client stakeholders back into the roadmap.

I COVER LETTER

Dear Hiring Team,

I am writing to apply for the AI Product Manager position in Abu Dhabi. Abu Dhabi is one of my primary target locations and I am prepared to relocate and work fully on-site, so the geography is a positive rather than a compromise.

The role description is unusually honest about what it actually requires: not a PM who has read about AI, but one who can assess technical feasibility, shape AI-native product experiences, and manage the trust of government and enterprise clients simultaneously. That combination is what I have been doing for the past several years, first at Rohde & Schwarz on a defence AI platform for the FCAS programme, then at Bundesagentur für Arbeit on a national labour-market analytics system, and through my own company across healthcare, insurance, and security products.

At Rohde & Schwarz I inherited a platform whose rollout took days and could not carry a hotfix. I introduced GitOps delivery with ArgoCD across a multinational team: rollout time fell to thirty minutes. More importantly, I pushed to instrument two competing product directions against real user behaviour. The UI-led approach recorded zero clicks. I redirected the product accordingly. That is the kind of decision this role requires, using data and direct customer contact to override assumptions, then executing cleanly across engineering and design. At EMIL

Group I shipped the Claims Center from concept to production with no precedent, cutting time-to-market for a new insurance product from many months to less than a week, after restructuring an eighteen-person delivery organisation that had been losing its senior engineers.

On the AI side, I build and use multi-agent workflows daily. I have designed agentic systems for autonomous delivery, built evaluation loops with human-in-the-loop checkpoints, and applied LLM tooling across discovery, prototyping, and backlog generation. My github.com/hilbertp repository includes a self-built multi-agent coding framework I use as production infrastructure. I know where LLMs are genuinely useful in a product workflow and where they introduce latency or risk, which matters when advising government clients on AI adoption.

Abu Dhabi's focus on AI-powered enterprise and government products at speed is exactly the environment where structured product thinking and AI fluency compound. I would welcome the opportunity to discuss fit.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of end-to-end ownership across regulated, complex environments: defence AI, public-sector analytics, insurance, healthcare, payments, and security. I translate ambiguous government and enterprise mandates into prioritised roadmaps, run cross-functional teams through agile delivery, and use AI tooling as operational infrastructure rather than decoration. Relocating to Abu Dhabi; ready at short notice.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI; prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP and PoC definition, PRD authoring, A/B testing, user research and interviews, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level and executive reporting, workshop facilitation, conflict resolution, change management.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning.

Analytics and Data: KPI definition, funnel and churn analysis, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Technical Environments: Kubernetes, OpenShift, ArgoCD, Docker, GitOps, CI/CD, Jenkins, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI / DATA PLATFORM 2024 TO 2025

Reduced rollout time from days to 30 minutes via GitOps with ArgoCD; redirected product from UI-first to developer-code-first after instrumenting competing workflows against real usage data.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023 TO 2024

Introduced Dagster and dbt for autonomous data pipelines; migrated bare-metal to containers; carried full UI relaunch. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023

Cut roadmap to top 10% of features; user acceptance rose fivefold. Implemented CGM interface personally, reducing anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B INSURANCE SAAS 2022

Restructured 18-person delivery into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center concept to production, compressing new-product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS POS 2021 TO 2022

Moved research to production across a matrix organisation under SAFe, agile release trains, and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · GOVERNMENT SECURE
DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE B2B 2019 TO
2020

Migrated legacy procurement system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK 2017
TO 2018

WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING MARKETPLACE 2025 TO 2026

Zero to one: two-sided B2B marketplace with anonymity-until-payment model; WhatsApp/Telegram as product surface; LLM agents across the funnel, one person runs the day-to-day.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016 TO 2021

Shipped a three-layer hardware-software product installing in under two minutes; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013 TO 2018

Built mobile group P2P payments from zero to acquisition by Sparkasse inside the girocard ecosystem.
